Dear Robert,

You received the views of Europatat previously in the consultation phase, in line with this position our preference regarding the proposed options goes to option 2. Should there be additional financial means available, option 3 would be acceptable as well.

Besides these options, I'm preparing a separate position requesting greater flexibility with regard to self-control in the seed potato sector. I should be able to send you this in the course of next week.

Kind regards,

Frédéric ROSSENEU
Secretary General
