		✎ Update

Patch 6.8.0 & next

Latest ADIS Patch 6.8.0

- Search engine optimized (elastic search)
- Bug fixing
 - Disease type not saved if not defined (Pending, not sampled,...). Real disease type were saved correctly
 - Weekly emails
 - Laboratory tests
- Add the selection of species by *latin name*
- ADIS – WAHIS link to be a single-entry point for notification (not yet visible)

Upcoming ADIS Patches

- ADIS public pages
- Map in the weekly email
- Daily summary email
- Union reporting – adaptation to new legislation

Timeline ADIS -WAHIS

Plans for pilot group

- 1st phase: Continuous testing during development phase
- 2nd phase: Full internal testing phase with ADIS and WAHIS testing teams
- **3rd phase: pilot group** with triple encoding of outbreaks:
 - WAHIS real notifications (like now)
 - ADIS real notifications (like now)
 - ADIS Acceptance in test environment (not production data)
- **4th phase: pilot group** use **ADIS production as a single entry point**. No more notification in WAHIS. (Events for those MS will need to be closed in WAHIS to begin this phase)
- 5th phase: All MS will be able to use ADIS as a single entry point

ADIS – WAHIS linking timeline

- Brainstorming with WOAH to simplify the ADIS-WAHIS connection parameters → simplify development
- The goal is to begin phases 3 and 4 with the **pilot group** in the first semester, ideally in March 2024
- But there are **still a lot of challenges to overcome**
- MS invited to the **pilot group: BG, DE, DK, ES, NL**

Thank you
