

**European Union comments on
Codex Circular Letter CL 2022/59-FICS**

**Request for comments on a new work proposal for the development of
principles and guidelines on the use of remote audit and verification in
regulatory frameworks**

*Mixed Competence
European Union Vote*

The European Union and its Member States (EUMS) support the proposal for new work to develop guidance on remote audits and verification. This work is very timely as these tools are increasingly used by Codex members for assessing food control systems.
