Avian Influenza

The Netherlands

21 October 2022

> Paul Leijs DVM MBA

14 September 2022

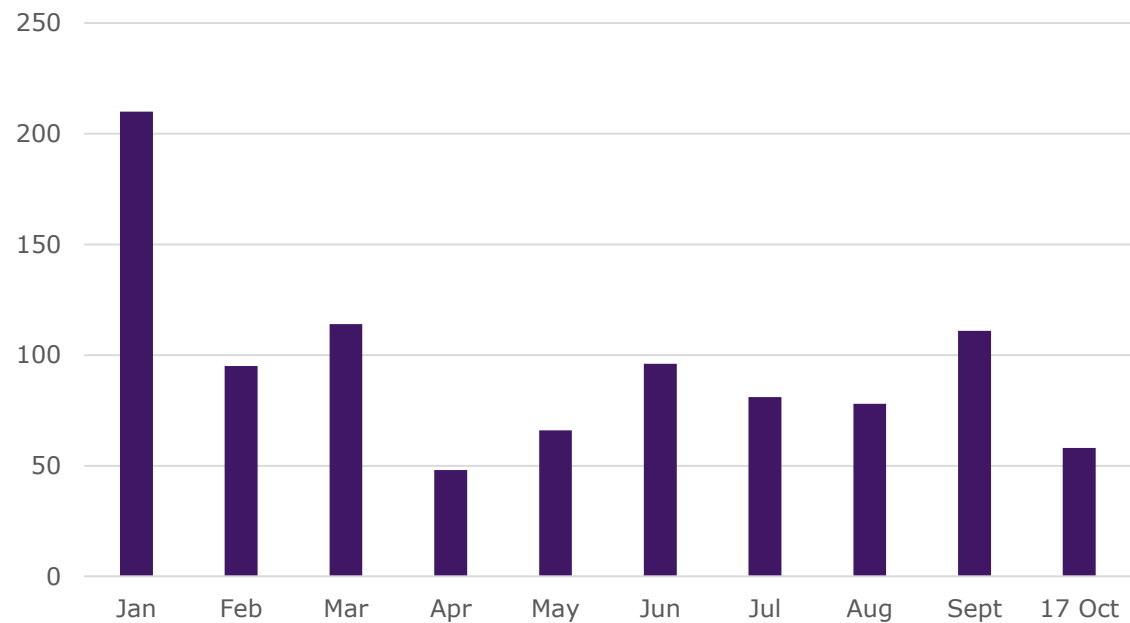

New developments in the current status of HPAI

- > Since 5 October there is again a general duty to keep poultry indoors and hobby poultry fenced
- > An intensification plan for prevention of HPAI is being developed:
 - speeding up the vaccination process
 - Strengthening biosecurity with a mandatory biosecurity plan for all poultry farms
- > Analyze the effects of all measures
- >

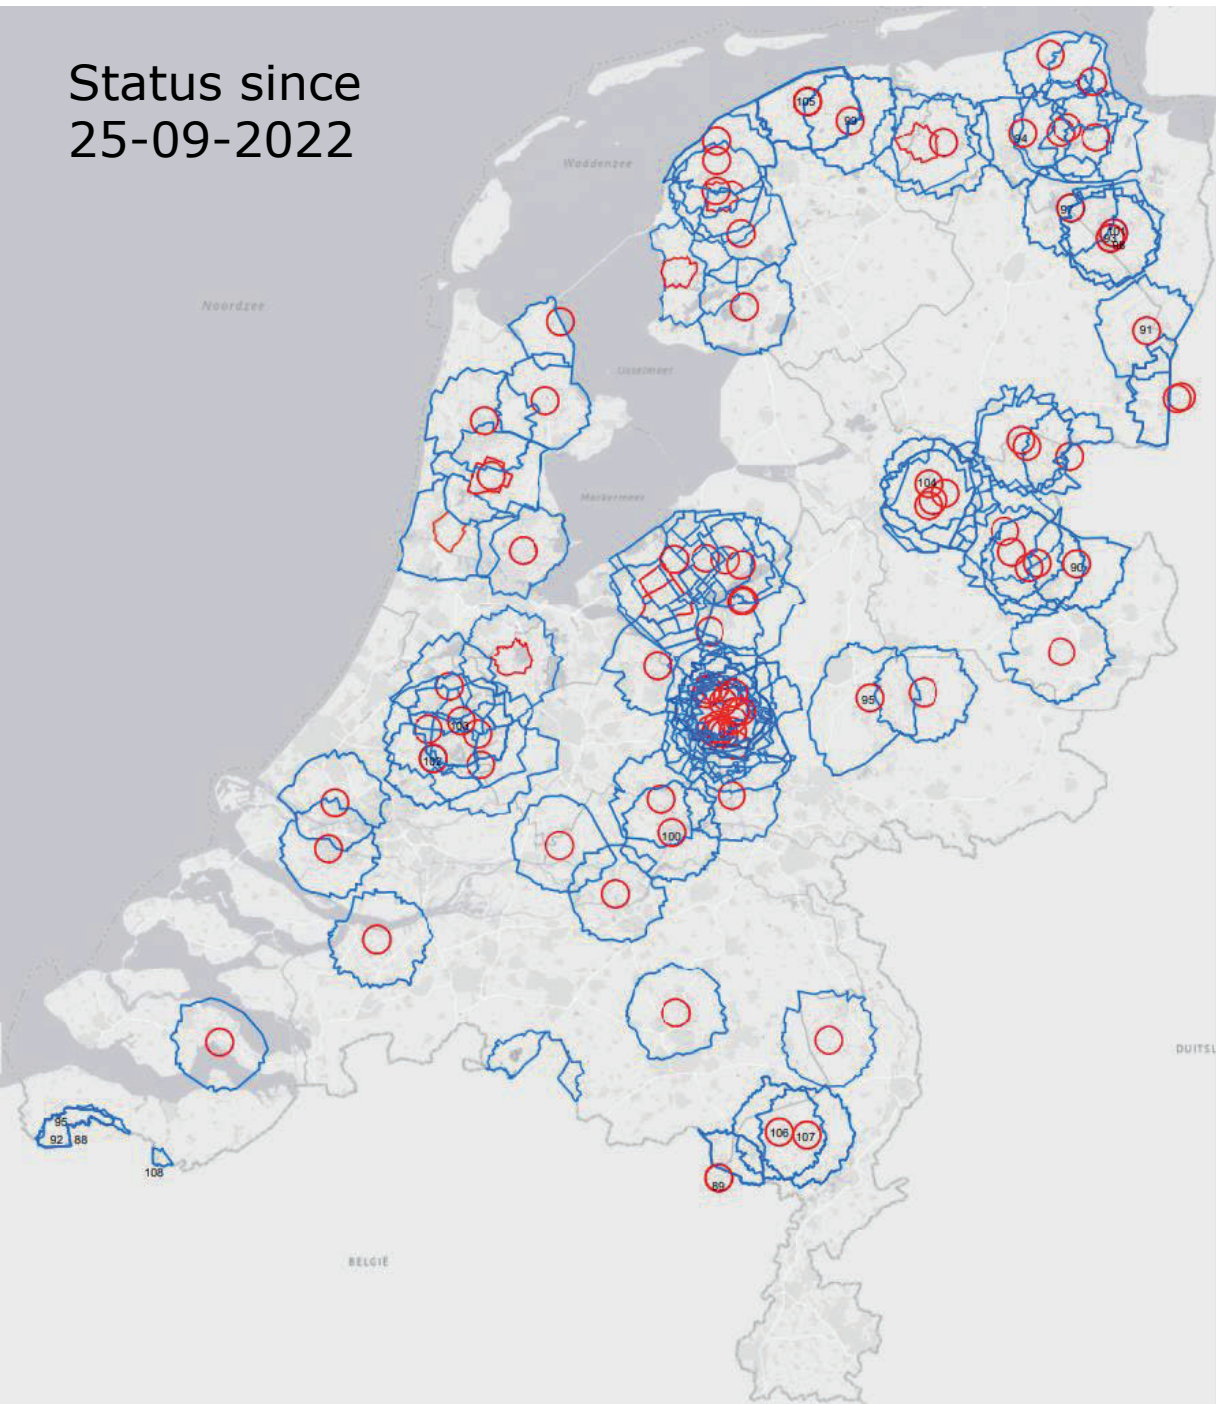

Outbreak of HPAI in wild birds

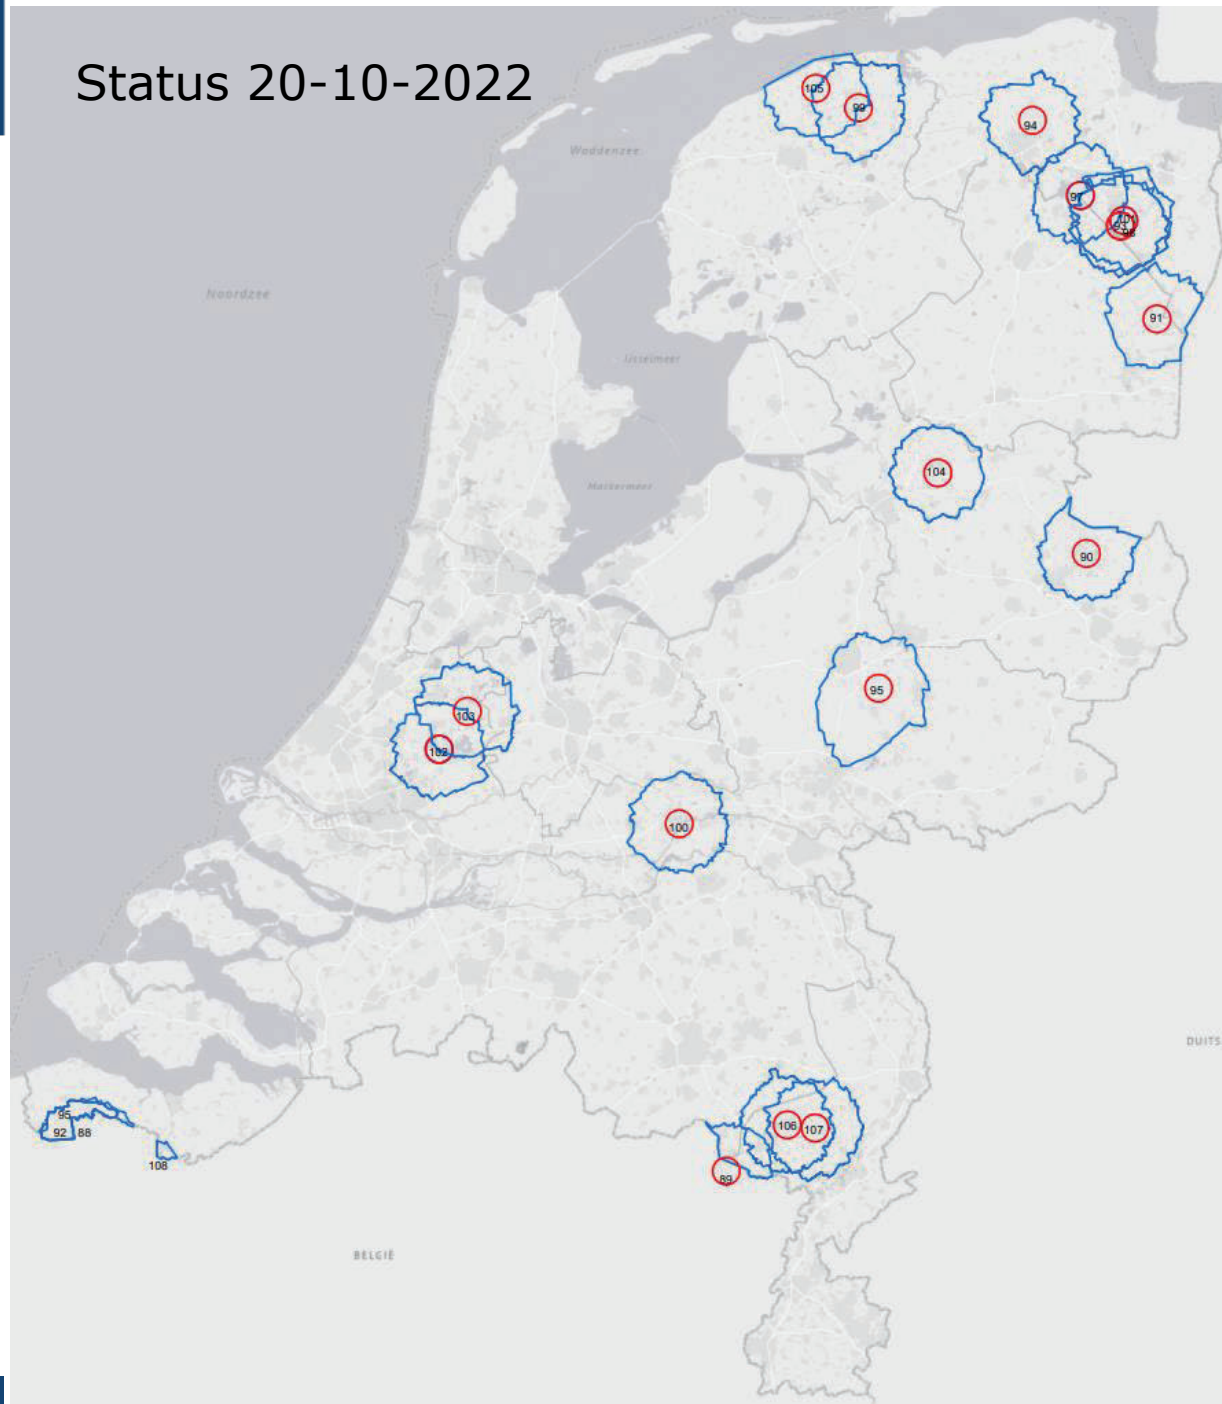

HPAI positive wild birds

Status since
25-09-2022

Status 20-10-2022

Infections of HPAI since last Scopaff

# Infection	Location	Status	Contamination date	KM	KM	Kind of poultry location	Date of culling	1st C&S	Type
81	Zuid-Scharwoude	Lifted	14-9-2022	3	10	Small animal farm	15-9-2022	15-9-2022	H5N1

106	Ospel	Active	16-10-2022	3	10	Turkey's	16-10-2022	16-10-2022	H5N1
107	Heythuysen	Active	20-10-2022	3	10	Laying hens	20-10-2022	23-10-2022	H5N1
108	Evergem(BE)	Active	20-10-2022	3	10	ornamental birds	22-10-2022	22-10-2022	H5N1

All measures according 2016/429 and 2020/687 have been taken.

Conclusion of the current status of HPAI

- > The virus is still active in the wild birds
- > Regards still only H5N1
- > Ongoing single introduction of the virus in poultry holdings
- > Due to a new supplier it seems that the shortage of CO₂ is currently a minor issue

Thank you for your
attention
