

Maize-5307

Organisation: la sousta

Country: France

Type: Others...

a. Assessment: Comparative analysis (for compositional analysis and agronomic traits and GM phenotype)

I don't want OGM in my fields in fault my neighbours

b. Food Safety Assessment:

Toxicology

Let's open your eyes on for example the Seralini's studies...

Allergenicity

The animals feed with OGM are sick!

Nutritional assessment

Farmer can cultivate in Europe other forms of vegetal proteins for their animals

Others

OGM is not ecologic but ask for more pesticides Their utilisation makes jobless

3. Environmental risk assessment

For our safety and for the bees OGM can't proove they are riskless!

4. Conclusions and recommendations

no OGM in Europe! !!

6. Labelling proposal

revisit the PAC to increase cereals for animals and autonomy for our continent! Food first with quality fields for humans not for our cars! Stop diester too!

Organisation: None

Country: United Kingdom

Type: Individual

a. Assessment: Molecular characterisation

I think it dangerous.

Comparative analysis (for compositional analysis and agronomic traits and GM phenotype)

More dangerous, no?

b. Food Safety Assessment: Toxicology

I don't want in cake.

Allergenicity

I think it make cake allergy

Nutritional assessment

make less health

Others

make taste not good

3. Environmental risk assessment

big risk to pests.

4. Conclusions and recommendations

no new alien technology

5. Others

maybe okay for Belgium

6. Labelling proposal

big red and gold warning sticker. Make sure visible to blind too, I see poorly now.
