

Summary of the application: *Schizochytrium* sp. (ATCC PTA 9695) oil

Applicant: DSM Nutritional Products Europe, Regulatory Affairs HNH / Bau 242 Wurmisweg 576, CH-4303 Kaiseraugst, Switzerland

The novel food application concerns the request for authorisation of an extension of use of *Schizochytrium* sp. (ATCC PTA 9695) oil. The application requested to extend the use of *Schizochytrium* sp. (ATCC PTA 9695) oil to fruit and vegetable purees.

Commission Implementing Regulation (EU) 2018/1032 extended the authorisation of oil from the microalgae *Schizochytrium* sp. (T18) as a novel food under Regulation (EU) 2015/2283 to fruit/vegetable purees following notifications from three companies. In their notifications, the companies demonstrated that the oil from *Schizochytrium* sp. (T18) is equivalent to “*Schizochytrium* sp. oil” as authorised by Commission Implementing Decision (EU) 2014/463 and “*Schizochytrium* sp. (ATCC PTA 9695) oil” authorised by Commission Implementing Decision (EU) 2015/545.

The applicant therefore requested that the use to fruit and vegetable puree is also extended to “*Schizochytrium* sp. (ATCC PTA 9695) oil”.
