Year of implementation: 2019

1. Technical implementation of the programme

1.1 Description and evaluation of the evolution of the epidemiological situation, the technical implementation of the activities foreseen under the programme and the cost-effectiveness of the programme.

In 2019 the activities carried out under the programme were as follows:

- Clinical examinations of all categories of pig farms - industrial, family farms, backyards and East-Balkan pigs by official and private veterinarians;
 - Laboratory testing of samples collected from animals from industrial, family farms, East-Balkan pigs farms;
 - Laboratory testing of samples collected from wild boars - under active and passive surveillance and
- Further to the surveillance activities, no positive case of CSF was detected in 2019 on the territory of Bulgaria.

Details on the activities are presented in the tables below.

1.2 Details on the level of achievement of the targets set in the approved programme and technical difficulties.

In 2019 in total 4696 domestic pigs were tested serologically 8 of which virologically, 3 wild boars were tested serologically. All of the sampled animals shown negative results of tests.

1.3 Epidemiological maps for infection and other relevant data on the disease/activities (information on serotypes involved,...) (Please attach files of data using the PDF attachment feature) Use the textbox below to provide clarifications for the maps you attach, if needed.
