

State of play of the revision of the feed ban for non-ruminants

Plenary Meeting of the Advisory Group on
the Food Chain and Animal and Plant Health
Brussels, 8 May 2020

Unit G4- Food hygiene
DG SANTE – European Commission

CURRENT SITUATION	Feed for farmed animals other than fur animals			Feed for pets and fur animals
	Ruminants	Non-ruminants (except fish)	Fish	
<ul style="list-style-type: none"> • Ruminant PAP, including ruminant blood meal • Blood products from ruminants • Gelatine and collagen from ruminants • Hydrolysed proteins <u>other than those</u> derived from non-ruminants or from ruminant hides and skins 				
<ul style="list-style-type: none"> • Non-ruminant PAP, including non-ruminant blood meal but excluding fishmeal • Insect PAP 				
<ul style="list-style-type: none"> • Fishmeal • Blood products from non-ruminants • Di and tricalcium phosphate of animal origin • Animal proteins other than those mentioned elsewhere in the table 				
<ul style="list-style-type: none"> • Hydrolysed proteins from non-ruminants or from ruminant hides and skins • Gelatine and collagen from non-ruminants • Egg, egg products, milk, milk products, colostrum 				

CURRENT SITUATION	Feed for farmed animals other than fur animals			Feed for pets and fur animals
	Ruminants	Non-ruminants (except fish)	Fish	
<ul style="list-style-type: none"> • Ruminant PAP, including ruminant blood meal • Blood products from ruminants • Gelatine and collagen from ruminants • Hydrolysed proteins <u>other than those</u> derived from non-ruminants or from ruminant hides and skins 				
<ul style="list-style-type: none"> • Non-ruminant PAP, including non-ruminant blood meal but excluding fishmeal • Insect PAP 			2013	
<ul style="list-style-type: none"> • Fishmeal • Blood products from non-ruminants • Di and tricalcium phosphate of animal origin • Animal proteins other than those mentioned elsewhere in the table 				
<ul style="list-style-type: none"> • Hydrolysed proteins from non-ruminants or from ruminant hides and skins • Gelatine and collagen from non-ruminants • Egg, egg products, milk, milk products, colostrum 				

CURRENT SITUATION	Feed for farmed animals other than fur animals			Feed for pets and fur animals
	Ruminants	Non-ruminants (except fish)	Fish	
<ul style="list-style-type: none"> • Ruminant PAP, including ruminant blood meal • Blood products from ruminants • Gelatine and collagen from ruminants • Hydrolysed proteins <u>other than those</u> derived from non-ruminants or from ruminant hides and skins 				
<ul style="list-style-type: none"> • Non-ruminant PAP, including non-ruminant blood meal but excluding fishmeal 			2013

<ul style="list-style-type: none"> • Fishmeal • Blood products from non-ruminants • Di and tricalcium phosphate of animal origin • Animal proteins other than those mentioned elsewhere in the table 				
<ul style="list-style-type: none"> • Hydrolysed proteins from non-ruminants or from ruminant hides and skins • Gelatine and collagen from non-ruminants • Egg, egg products, milk, milk products, colostrum 				

European
Commission

ROAD TO ANY FURTHER RELAXATION OF THE TOTAL FEED BAN

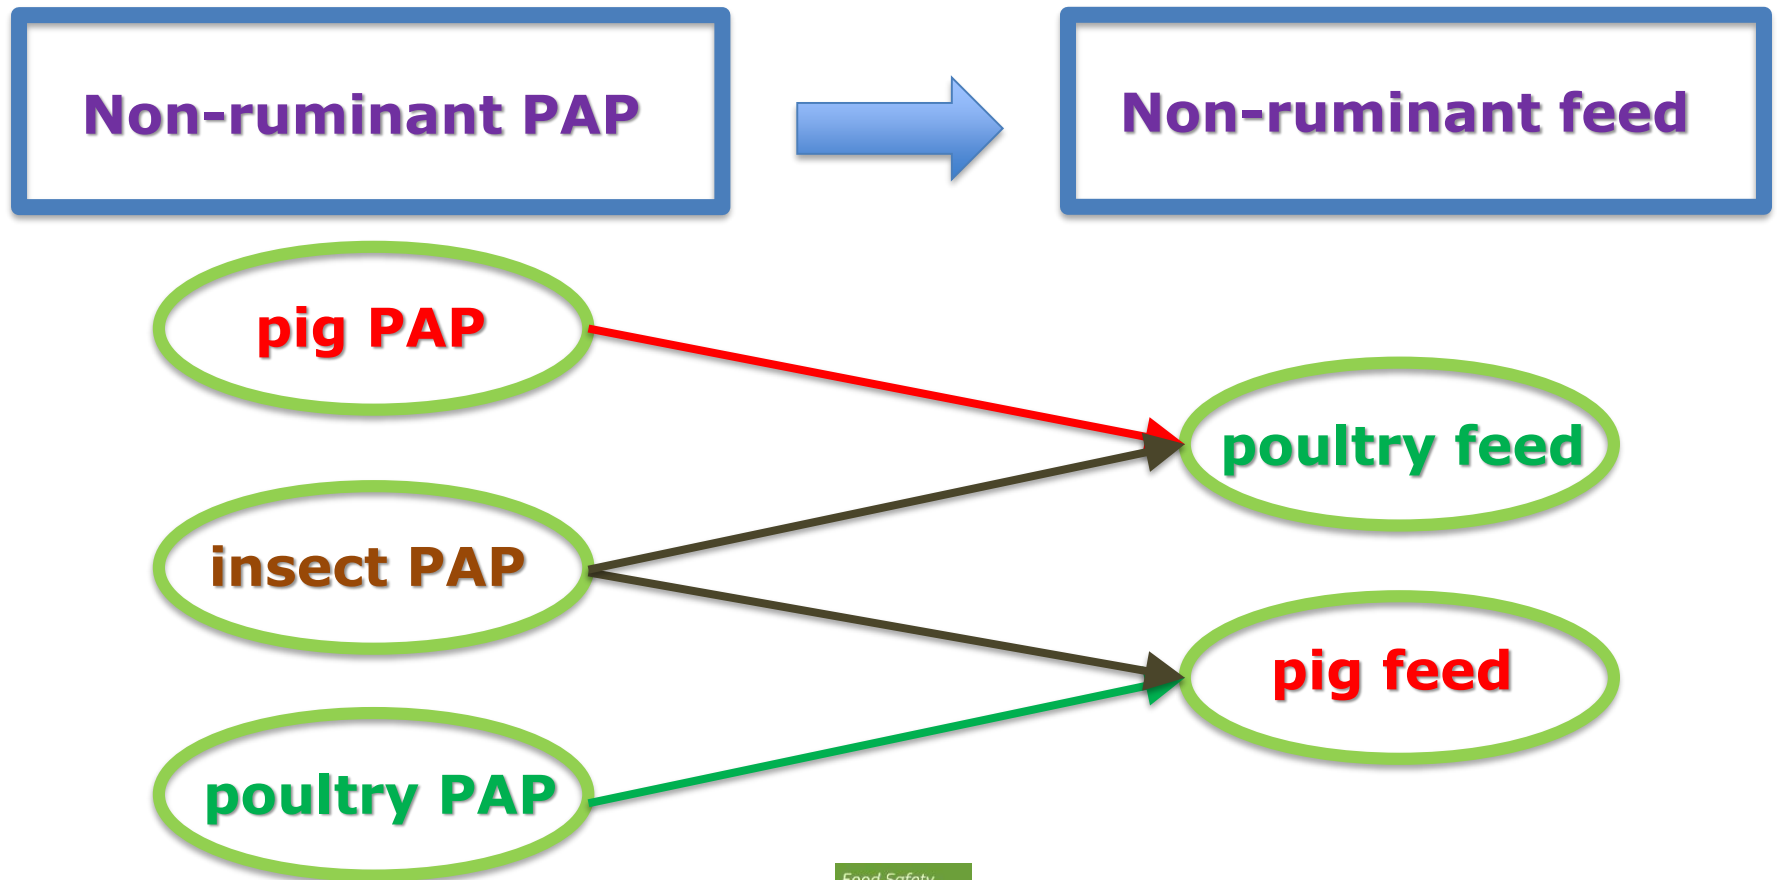

- **Is the proposal consistent with the TSE strategy proposed by the Roadmap of 2010 for the short, medium and long-term?**
- **Is the proposal scientifically sound (positive EFSA opinion)?**
- **Are the necessary laboratory methods available to control?**
- **Does the proposal comply with the prohibition of intra-species recycling (cannibalism)?**
- **Can cross-contamination in feed for ruminants be prevented?**
- **Political support? Commissioner, Member States, EP, stakeholders**

WHERE WE COULD ACT

	Feed for farmed animals other than fur animals			Feed for pets and fur animals
	Ruminants	Non-ruminants (except fish)	Fish	
<ul style="list-style-type: none"> • Ruminant PAP, including ruminant blood meal • Blood products from ruminants • Gelatine and collagen from ruminants • Hydrolysed proteins <u>other than those</u> derived from non-ruminants or from ruminant hides and skins 				
<ul style="list-style-type: none"> • Non-ruminant PAP, including non-ruminant blood meal but excluding fishmeal • Insect PAP 			2013	
			2017	
<ul style="list-style-type: none"> • Fishmeal • Blood products from non-ruminants • Di and tricalcium phosphate of animal origin • Animal proteins other than those mentioned elsewhere in the table 				
<ul style="list-style-type: none"> • Hydrolysed proteins from non-ruminants or from ruminant hides and skins • Gelatine and collagen from non-ruminants • Egg, egg products, milk, milk products, colostrum 				

Feed ban: next possible move

European
Commission

	Pig PAP → poultry feed	Poultry PAP → pig feed	Insect PAP → poultry and pig feed
In the TSE roadmap?	✓	✓	No, but new ✓
EFSA opinion?	✓ June 2018		✓ Oct. 2015
Laboratory method?	✓ poultry PCR (fully operational in 2021)	✓ pig PCR	✓ double sedimentation / light microscopy
Intraspecies recycling?	??? Addressed on paper, but the level of separation of the production lines for poultry and pig feed could be an issue		✓ No risk
Cross-contamination?	✓ see current measures separating feed for ruminants from other feeds		✓ No risk
Political support?	???		???
