Komárom-Esztergom	617	5.03
Fejér	40	0.33
TOTAL	12 278	100

Overview of ASF in wild boars in Hungary

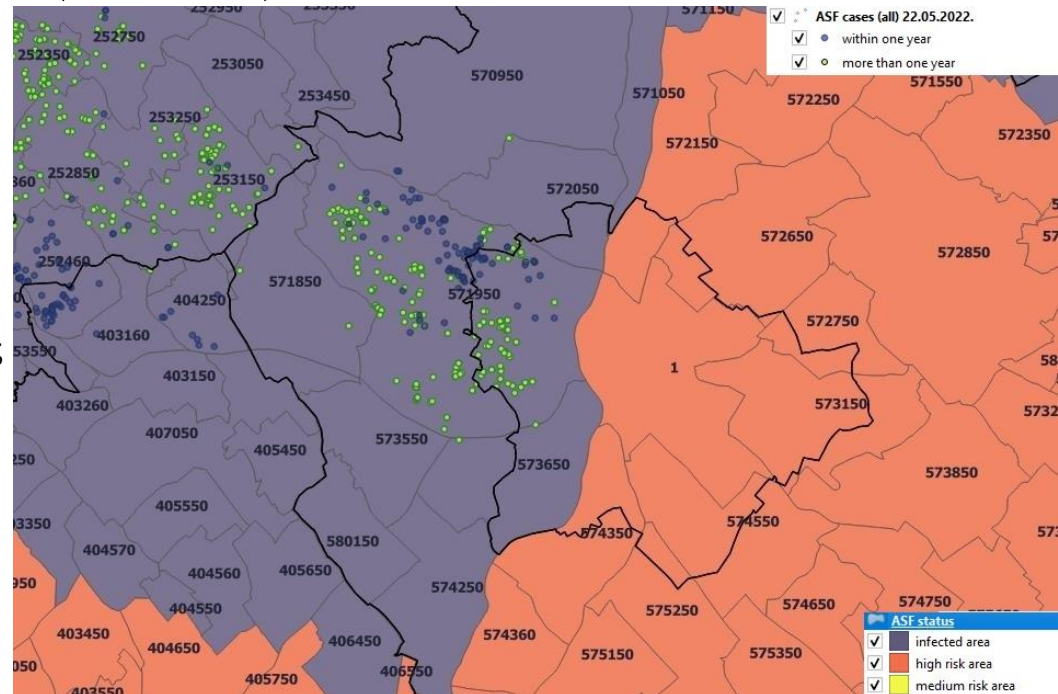

Data on a weekly basis, between week No 51 of 2021 and week No 21 of 2022

Epidemiological developments of late

ASF-situation in Pest county

- Wild boar outbreaks – Buda (Western) side
- Danube – natural barrier
 - CSF (2007-2009)
 - ASF (two epi. waves)
 - 2019/2020: WB outbreaks closer to the Danube than now; ASFV did not cross the river
- No amendment to zoning is proposed

Ministry of Agriculture

Measures

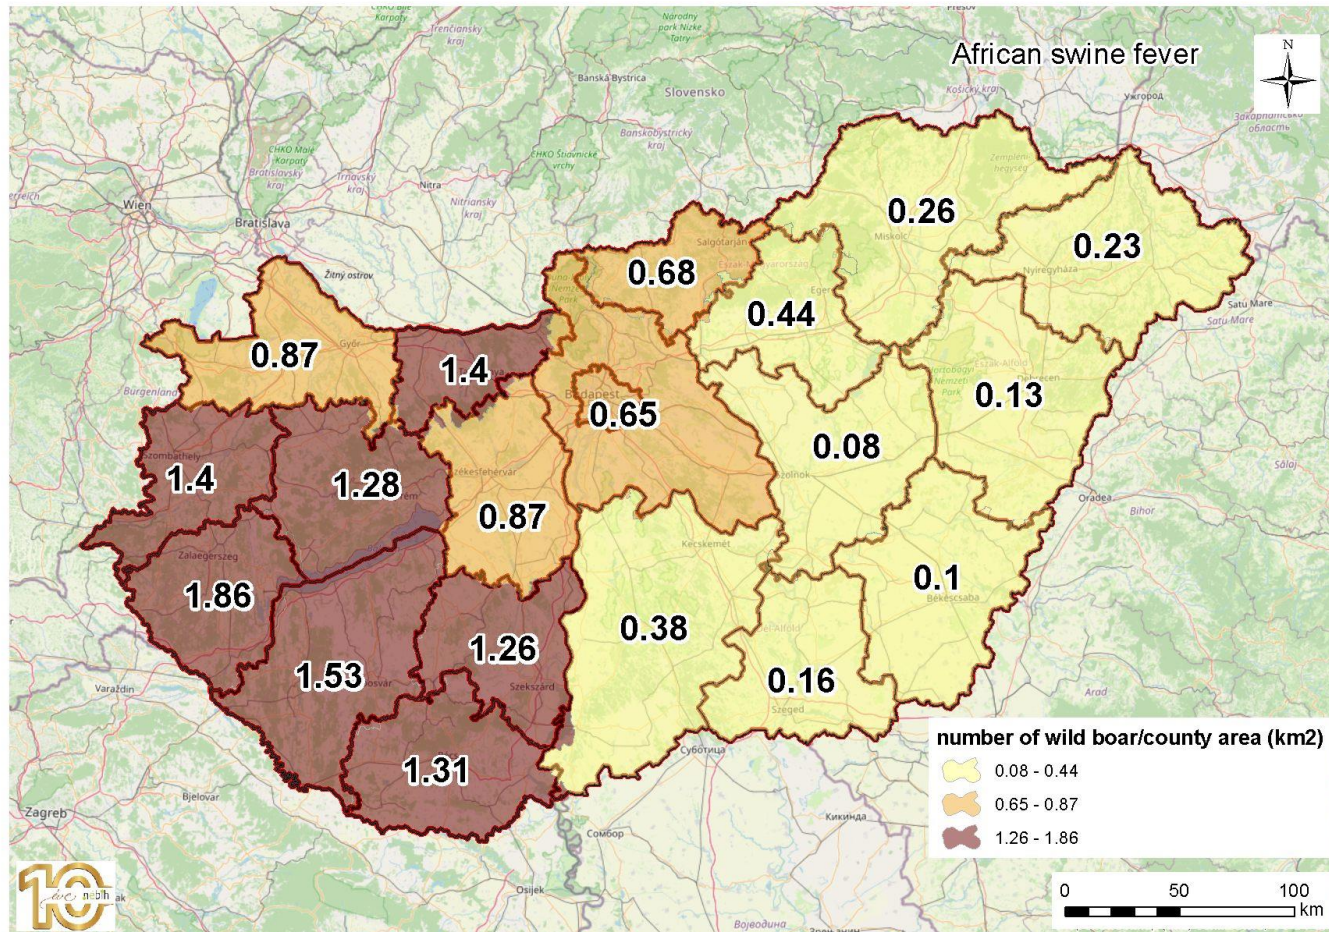

Outline

- National Action Plan on Wild Boar Management (detailed information given at PAFF of March, 2021)
-

Ministry of Agriculture

Measures – Wild boar density

Measures

Highlights

- New set of measures to be introduced (not in force yet)
 - Biosecurity plan of pig keeping holdings
 - General direction: pre-requisit for eligibility to dispatch live pigs or pork products outside Hungary
 - Minimum criteria to be met defined by the CVO
 - Approval and regular on-site verification by the district, supervision (including on-site verification) by the county, further supervision, record-keeping and publication in the form of a list by the NDCC
-

Ministry of Agriculture

Measures

Highlights

- Census for all holdings in the entire country (by age-groups)
 - Extending the possibility to authorized approved vets to supervise small-scale holders and hunting entities (medium-risk to be included)
 - Strengthened supervisory role of central authority
 - Full-scale ASF-related auditing and targeted inspection of counties
