

# Main elements of the delegated act

**Bartosz Zambrzycki**

European Commission, DG Health and Food Safety  
Unit E1, Food information and composition,  
food waste

## ***Definitions***

No new definitions, but recalling relevant definitions from other legislation

## ***Monitoring***

- Separately for 5 stages of food supply chain, as mentioned in Waste Directive (originating from FUSIONS) – delineation by NACE rev. 2
- Separate monitoring for food waste to waste treatment and food waste to sewer

## ***Exclusions***

Based on food definition:

- Exclusion of water other than intentionally incorporated into food
- Exclusion of packaging (as non-food material)

On practical reasons:

- Exclusion of potential food waste from street cleaning
- Exclusion of food which may be still in separately collected packagings (code 15.01 of LoW)

## ***Cost efficient annual monitoring***

- Detailed analysis of food waste in the first years and at then repeated regularly at least once every 4 years. Techniques to be used are described in Annex II
- MS are to prepare and report yearly estimates, linking detailed information of share of food waste with other relevant data e.g. Waste Statistics, economic data for specific sectors, production statistics, consumers panel, population number and income etc.

## ***Quality requirements:***

- Provide to the Commission the information about:
  - Methods used for detailed analysis and how there are used for annual reporting
  - Description of representative sample
  - Sources and range of uncertainties

European  
Commission
