ASF surveillance, cases and outbreaks map in North Italy from 25 October 2024 (last PAFF)

ASF surveillance, cases and outbreaks map in North Italy from 25 October 2024 (last PAFF)

ASF outbreak from 25 October 2024 (last PAFF)

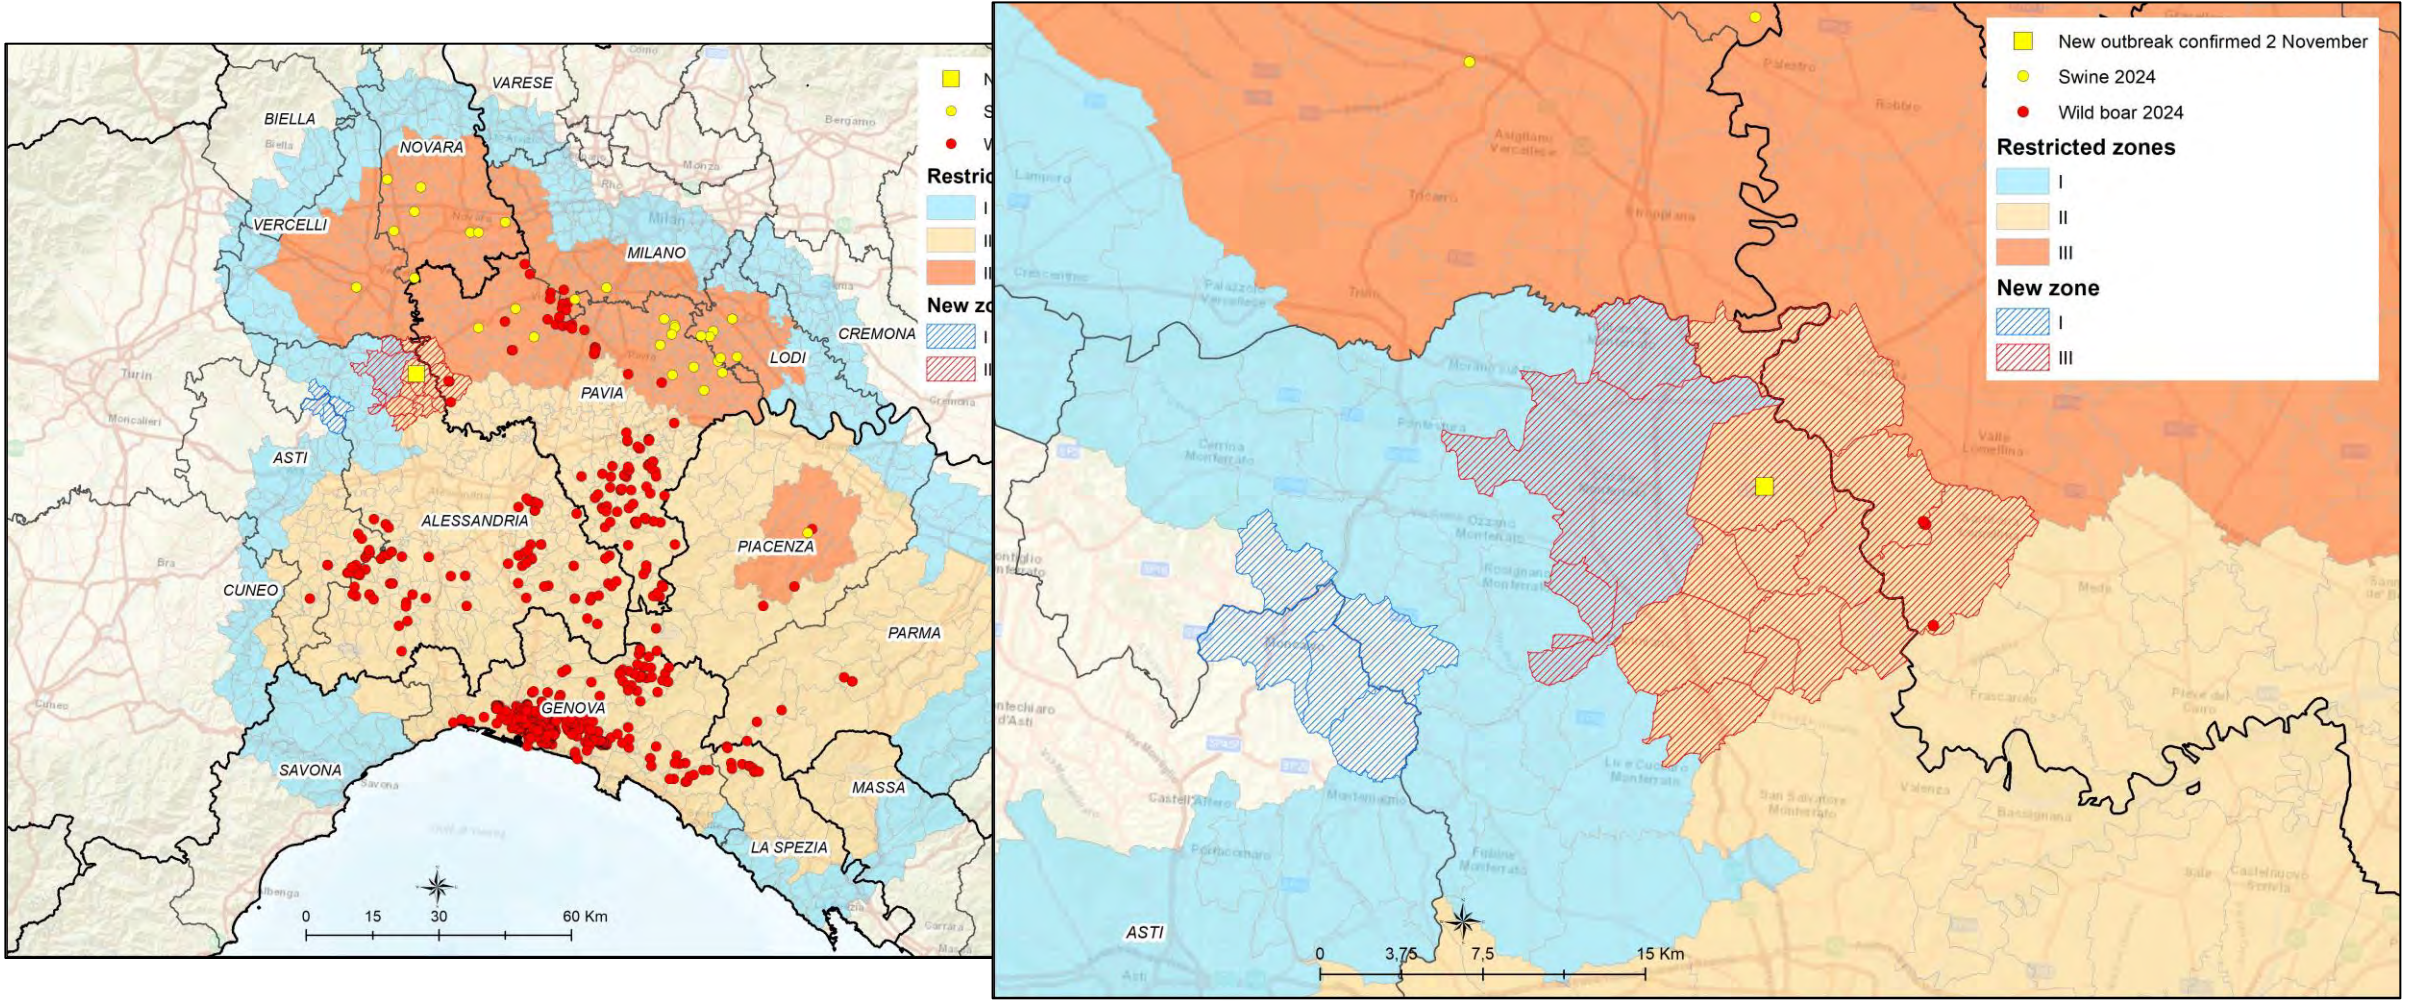

SIMAN reference	ADIS Reference	Type	Disease name	Cod. Aziendale	Regione	Provincia	Comune	Species 1	Measuring unit 1	Susceptible 1	Cases 1	Dead 1	Killed 1	Suspicion/Start date	Confirmation date	Estinto
ASF-2024-1185	IT-ASF-2024-01185	Primary	A.S.F. in domestic pigs	073AL001	Piemonte	Alessandria	Frassineto Po	Swine	Animals	2435	29	29	2406	2024-10-31	2024-11-02	09/11/2024

It is a reproduction establishment keeping around 2400 pigs located in the Municipality of Frassineto Po, Alessandria province (Piemonte Region), already in the restriction zone 2 according to the Regulation 594/2023.

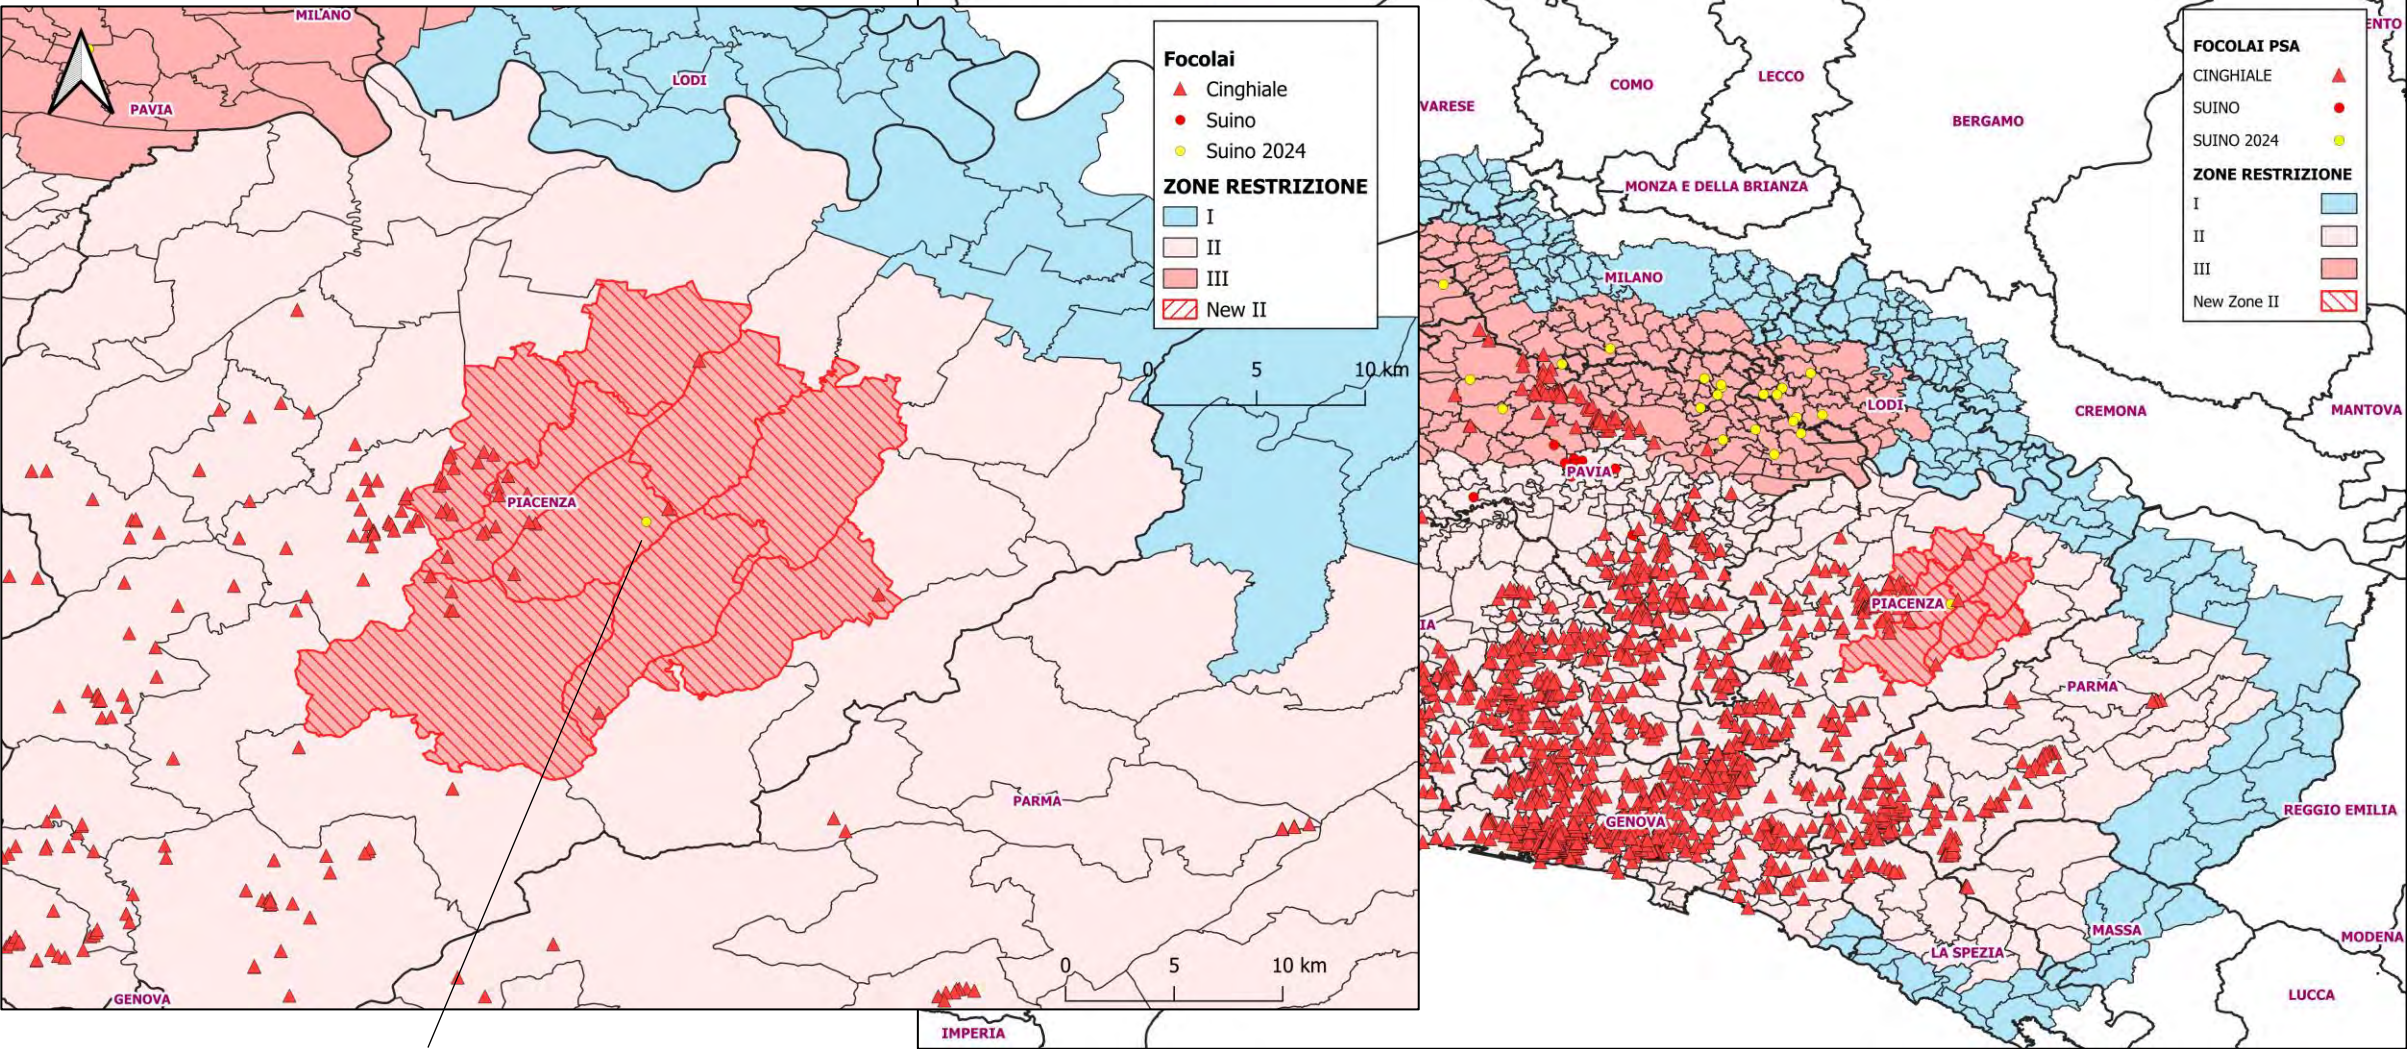

The sample resulted positive was taken on a dead animal according to the reinforced surveillance ongoing in the restricted zones. While waiting for the result the owner observed an increase of mortality and a group of animals with respiratory symptoms not able to stand. The farm was subjected to passive surveillance sampling in October on a weekly basis and all the previous results were negative. The Local veterinary service put in place all the measures to avoid any spread of the virus according to the Regulation 687/2020 and carried out the epidemiological investigation that fortunately did not show any at risk contact.

ASF outbreak from 25 October 2024 (last PAFF) Commission implementing regulation (EU) 2024/2886 of 12 November 2024

Proposal to revoke the zone under restriction 3 in Piacenza province (Emilia Romagna)

31st July 2024
