## SUMMARY RECORD OF THE APPEAL COMMITTEE

### Genetically modified food and feed – Genetically modified organisms for cultivation

16 MAY 2017

Chair: Ladislav Miko

#### 1. Adoption of the Agenda

The agenda was adopted without amendments.

#### 2. Exchange of views and possible opinion of the Committee on Draft Commission Implementing Decision authorising the placing on the market of products containing, consisting of, or produced from genetically modified cotton GHB119 (BCS-GH005-8) pursuant to Regulation (EC) 1829/2003 of the European Parliament and of the Council.

**SANTE/12309/2016**

The Chair introduced the draft Commission Implementing Decision authorising the placing on the market of products containing, consisting of, or produced from genetically modified cotton GHB119, which was the same as that presented to the Standing Committee on 27 March 2017.

No questions were raised by Member States and the draft was put up for vote.

**Vote taken: no opinion**

*Reasons for the negative vote or abstention:*

- No agreed national position
- Negative public opinion
- Political reasons
- Disagreement with Article 2(c) of the decision
- Risk assessment deemed not sufficient
- Precautionary principle

Sweden made the following declaration:

*"The authorisation of placing on the market of products containing, consisting of, or produced from genetically modified cotton GHB119 (BCS-GH005-8) is on the agenda for this meeting. The authorisation does not include cultivation. Cotton GHB119 (BCS-GH005-8) is tolerant to glufosinate-ammonium-based herbicides.*

*The Swedish Board of Agriculture and the National Food Agency make the same conclusion as stated by EFSA i.e. this product is safe for human and animal health as well as for the environment. Sweden therefore votes in favour of granting the product authorisation according to the Commission proposal.*

*This does not preclude the Swedish vote on a possible future granting of authorisation of cultivation of seeds that are tolerant to glufosinate-ammonium.*

*Glufosinate-ammonium is classified as a substance toxic for reproduction in category 1B which means that it does not fulfil the approval criteria for active substances according to the Regulation (EC) No 1107/2009.*

*In our view, potential use and cultivation of genetically modified organisms in Sweden should not have a negative effect on biodiversity and, as far as possible, not lead to an increased use of pesticides."*

The chair informed the members of the Committee that, in accordance with Regulation (EU) No 182/2011, it is now for the Commission to decide on this authorisation.

**3. Exchange of views and possible opinion of the Committee on Draft Commission Implementing Decision authorising the placing on the market of products containing, consisting of, or produced from genetically modified maize DAS-40278-9 pursuant to Regulation (EC) 1829/2003 of the European Parliament and of the Council.**

**SANTE/10277/2017**

The Chair introduced the draft Commission Implementing Decision authorising the placing on the market of products containing, consisting of, or produced from genetically modified maize DAS-40278-9, which was the same as that presented to the Standing Committee on 27 March 2017.

No questions were raised by Member States and the draft was put up for vote.

**Vote taken: no opinion**

*Reasons for the negative vote or abstention:*

- No agreed national position
- Negative public opinion
- Political reasons
- Disagreement with Article 2(c) of the decision
- Risk assessment deemed not sufficient
- Precautionary principle
- Lack of long-term feeding studies

The chair informed the members of the Committee that, in accordance with Regulation (EU) No 182/2011, it is now for the Commission to decide on this authorisation.
