Application for lifting certain areas of Part III

Based on the Commission Delegated Regulation (EU) 2020/687 and African swine fever in the Union ('ASF guidelines') (C/2023/1504) of 18 December 2023:

- In the event of a single or limited ASF outbreaks clustered in space and in time (during a period of 30 days from the first outbreak in that zone) in establishments of kept porcine animals in a sufficiently large area with no ASF outbreak in kept porcine animals for the past 12 months – the three year or 12 months period referred to in point 6.1. can be reduced to 3 months’;
- This criterion was implemented under official veterinary supervision by the SFVS.
- Passive surveillance system for establishments of kept porcine animals is implemented;
- Active and passive surveillance for wild porcine animals are implemented;
- No ASF outbreaks above mentioned territories were confirmed since 19 July 2024.
- No ticks of the genus *Ornithodoros* have been found in Lithuania.

Application for lifting certain areas of Part III

No	ADIS Outbreak reference	Date of outbreak confirmation	
1	LT-ASF-2024-00291	13/6/2024	There was one outbreak in zone detected in establishments of kept porcine animals.
2	LT-ASF-2024-00320	3/8/2024	There was one outbreak in zone detected in establishments of kept porcine animals.
3	LT-ASF-2024-00337	15/7/2024	There was one outbreak in zone detected in establishments of kept porcine animals.
4	LT-ASF-2024-00316 LT-ASF-2024-00338 LT-ASF-2024-00339	2/7/2024 16/7/2024 19/7/2024	In the zone there were limited ASF outbreaks detected in establishments of kept porcine animals. These three outbreaks were clustered in space and in time (clustered within an 18-day period). No epidemiological links between these three outbreaks.
