Official visits & clinical examination in kaliski and żuromiński clusters

„Kaliski cluster”:

1. The official veterinarians visited and clinically examined all the establishments keeping birds (including backyards) in protection zone.
2. Official veterinarians visited and clinically examined in surveillance zone:
 - a. in kaliski district: 19 registered holdings which is 41% in affected gminas
 - b. in ostrowski district: 21 registered holdings which is 30% in affected gminas
 - c. in ostrzeszowski district: 14 registered holdings which is 16% in affected gminas
3. Laboratory test:

Voivodship part of „kaliski cluster”	Protection zone		Surveillance zone	
	Farms tested	Farms tested with ducks and geese	Farms tested	Farms tested with ducks and geese
Łódzkie	1	1	11	10
Wielkopolskie	20	13	51	41
Summary	21	14	62	51

Official visits & clinical examination in kaliski and zuromiński clusters

„Kaliski cluster”:

- in the areas affected by the Kaliski cluster there is 2 062 155 poultry and 461 897 of them are ducks and geese;
- the protection and surveillance zones have been lifted → the restocking of the unaffected establishments in those areas is possible;
- the confinement of the poultry is ordered by the CA and implemented

Official visits & clinical examination in kaliski and zuromiński clusters

„Zuromiński cluster”:

1. In the protection zone until 18 June CA will finished the official controls with clinical examinations of poultry kept in holdings (100% commercial and non-commercial)
2. In mazowieckie voivodship it is considered to use indicator animals.
 - in the areas affected by the zuromiński cluster there is 4 049 638 poultry and 165 828 of them are ducks and geese;
 - currently it is not allowed to restock animals in mazowieckie part of cluster, in part of this cluster in warmińsko-mazurskie it is allowed under certain conditions.

Official visits & clinical examination in kaliski and zuromiński clusters

Laboratory tests in „Żuromiński cluster”:

Voivodship part of cluster	Protection zone		Surveillance zone	
	Farms tested	Farms tested with ducks and geese	Farms tested	Farms tested with ducks and geese
Mazowieckie	4	1	2	2
Warmińsko-mazurskie	9	1	7	2
Summary	13	2	9	4

Surveillance in wild birds (in clusters)

In poviats affected by HPAI wild birds were sampled and tested to indicate the presence of the virus in the environment. Numbers of wild birds tested from 1 March 2021 in certain poviats are as follows:

„żurmiński cluster”:

-sierpecki powiat: 1 tested, **1 positive (swan) on 13 March**

-żuromiński powiat: 3 tested, **1 positive (stork) on 2 May**

„kaliski cluster”:

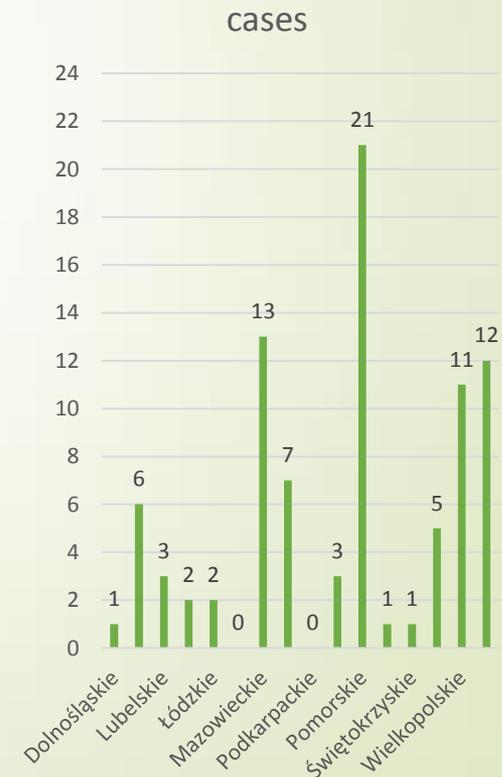

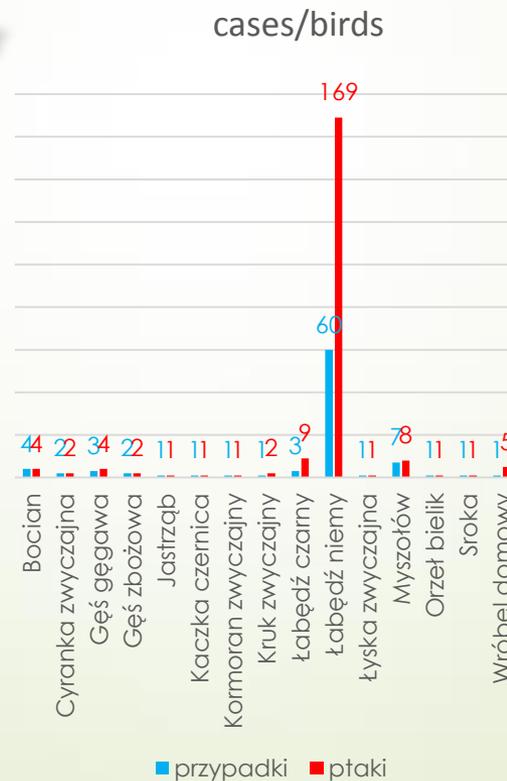

-kaliski powiat: 2 tested, 0 positive

-ostrzeszowski powiat: 8 tested, **4 positive (2 buzzards i 2 ravens) – the last positive on 26 March**

Location of HPAI occurrence in wild birds in 2021

In total 88 outbreaks of HPAI in wild birds- no change since last PAFF

Thank you
