# Experience of searching for dead wild boar with trained dogs

- Monitoring programme for 2021 provides the possibility to use dogs to search for dead wild boar
- The first action in 2021 of search for dead wild boars with trained dogs took place on 23 August 2021 in the district of Nowe Miasto Lubawskie
- The first outbreak of ASF in wild boar in the district of Nowe Miasto Lubawskie was confirmed on 17 August (No. 1982). Then the search with trained dogs for a dead wild boar within this area.
- Dogs were trained by appropriate handlers, including a person who trains the dogs to look for dead human corpses

# Experience of searching for dead wild boar with trained dogs

- The action was attended by dog guides, hunters who know the nature of the wild boar and where they live in a given area, as well as veterinarians ready to collect the samples for laboratory tests. A cleaning and disinfection company was also on standby.
- The dogs did not touch the corpse, but barked loudly that they had found it.
- During the action 1 dead wild boar was found. Samples were collected.
- Virological examination of samples taken from the found wild boar confirmed the infection with ASF.

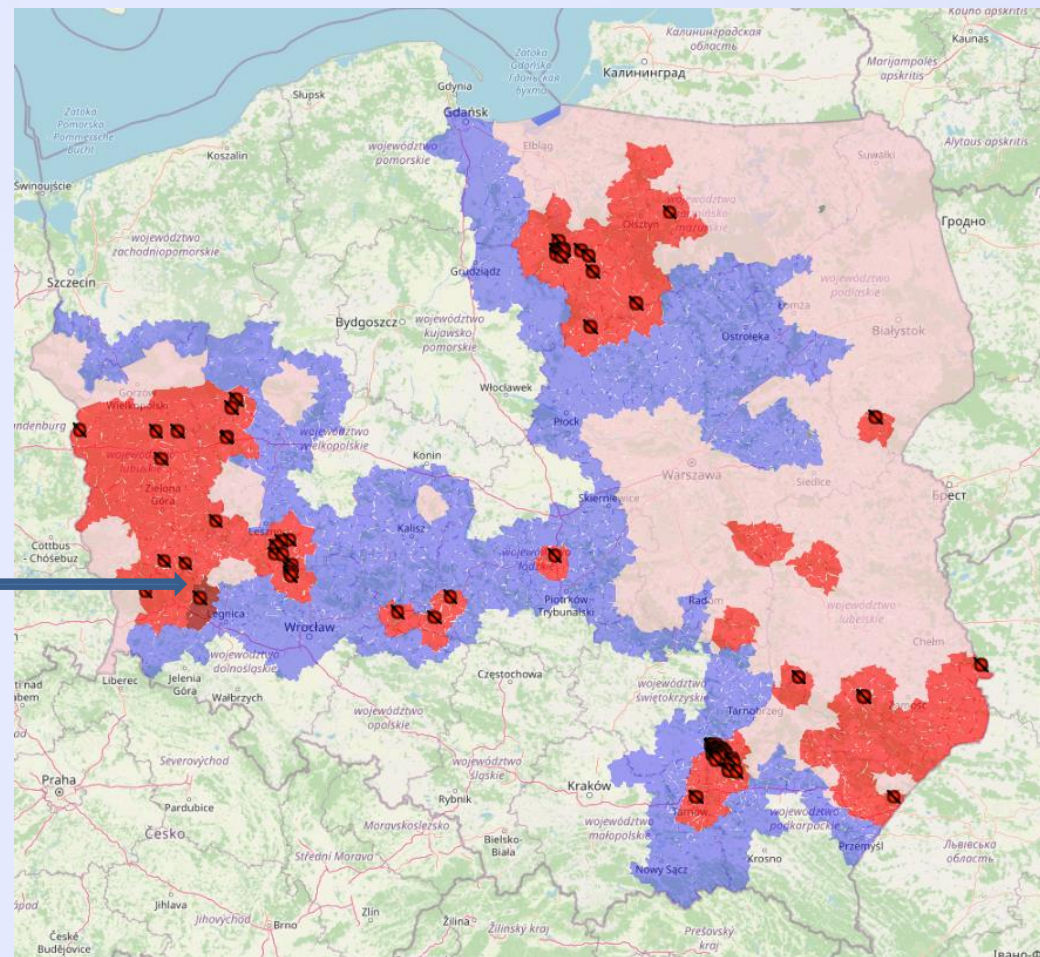

# Amendments of regionalisation
