# Hatchery?

# Newly introduced hatching system for broiler production in Denmark

Chickens moved from hatchery to production site day 18  
Hatching takes place in broiler production facilities

- Hatching in healthier air
- Making chick transport unnecessary
- Immediate access to water and feed
- Better productivity – early start of feeding

# Definition of hatchery in Council Directive 2009/158/EC

**An establishment which incubates and hatches eggs and supplies day-old chicks**

<http://www.vencomaticgroup.com/en/products/broilers/housing-solutions/x-treck>

## **COUNCIL DIRECTIVE 2009/158/EC**

### **Definition:**

Hatchery: an establishment which incubates and hatches eggs and supplies day-old chicks;

### **DVFA approach**

**As no supply of day-old-chicks takes place → not a hatchery**
