Foyers PPA en Allemagne et zone réglementée

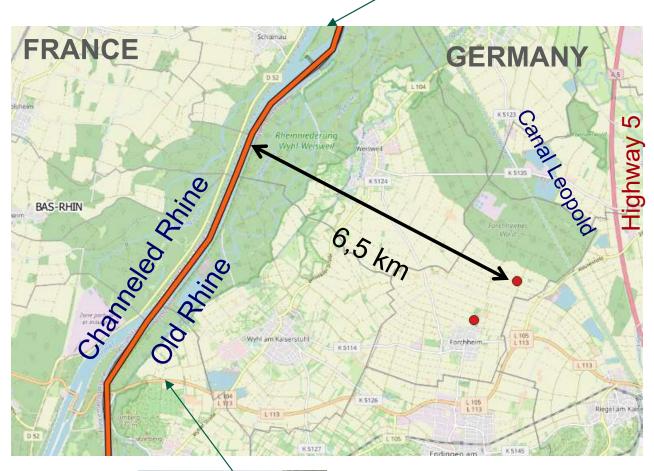

### Localisation

## Surveillance of wild boars : methods & levels of risk in France

SURVEILLANCE METHODS	LEVEL	LEVEL	LEVEL	LEVEL
	1	2A	2B	3
Generalist passive surveillance SAGIR NETWORK (hunters, lesion/clinic supicion)	X			
Reinforced analyses = all found dead		X	X	X
Reinforced awareness (forester, fisher)			X	X
Reinforced collection: road-kill included				X
Active search of carcasses: hunter patrols, systematic scanning, searching dogs				X
Active surveillance (culled): % according to the risk				X

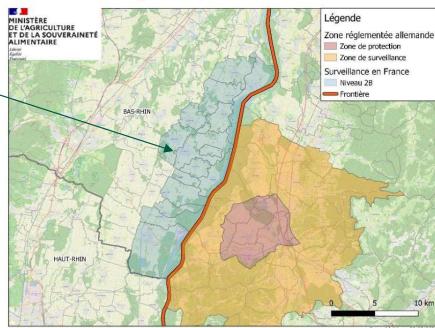

### Enhancement of wild boar (WB) surveillance

- Awareness of hunters raised on 25/05/2022
- In a 5 km deep, 20 km long area (14 municipalities): surveillance increased to « level 2B »
  - Enlargement of WB cadavers observers : hunters but also walkers, cyclists, fishermen
  - Dedicated phone number
- Upgrade to level 3 if WB infected found in Germany

PPA en Allemagne : zone de renforcement de la surveillance

### **Actions for kept pigs**

- Complete census of pig holders: backyard and companion pigs
  - Immediately within 20 km radius from the german outbreak
  - then generalization to Bas-Rhin and Haut-Rhin départements
- Farm visits (clinical surveillance, biosecurity assessment, awareness)
  - In farms located within 20 km radius from the german outbreak
- Private biosecurity audits in the region

#### Communication

- Strict compliance with biosecurity rules by all actors in the sector:
  - Compliance of good practices
  - Compliance with the ban on swill feeding
  - Implementation of structural elements (fences, transition area, feed protection)
- Raise awareness of stakeholders
  - Farmers
  - Pig keepers
  - Transporters
  - Seasonal workers
  - Travellers
  - Truck drivers

### Merci pour votre attention
