

Implementation of the Rabies Programme 2017 in Bulgaria

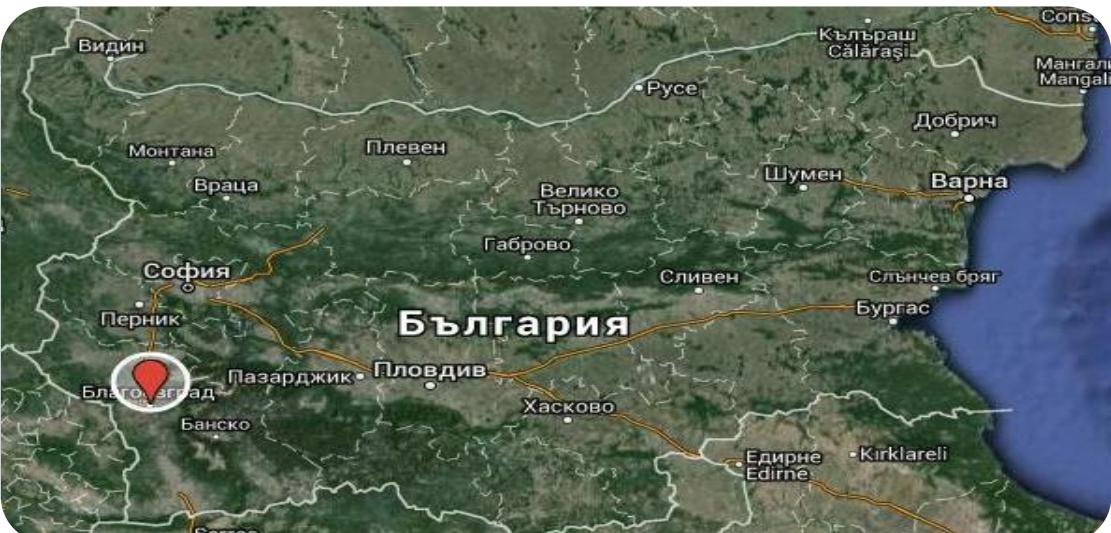

SC PAFF, 13-14th June 2018, Brussels

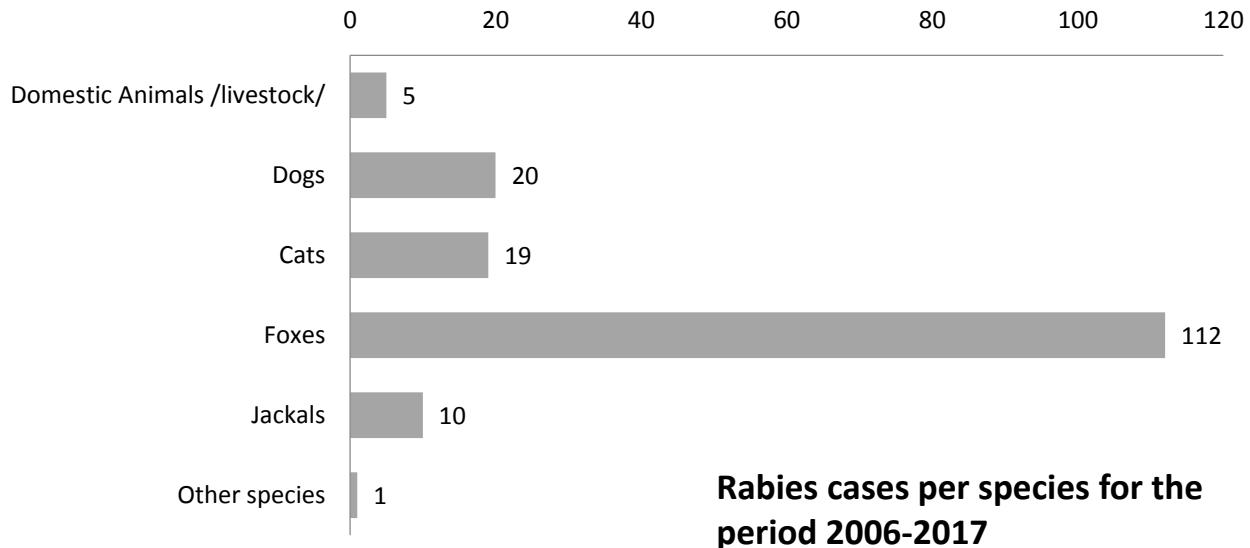

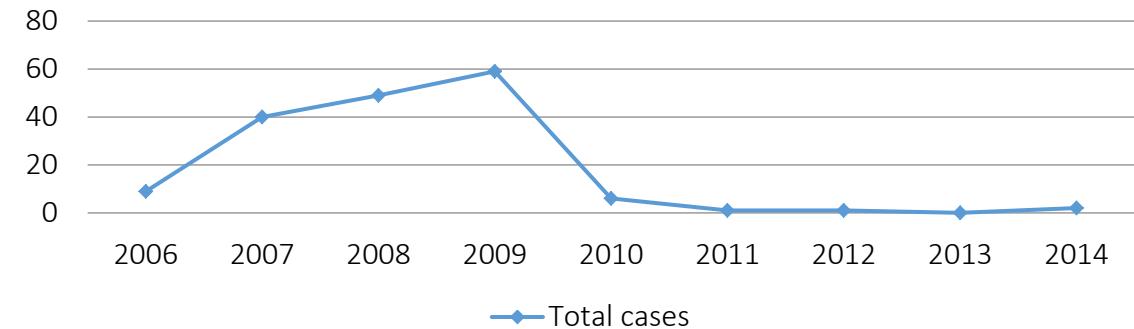

Epidemiological situation

NO RABIES CASES REGISTERED IN 2017

- Total number of cases for the last 10 years – 167
- Last rabies case reported in June 2014 - 2 rabies cases in foxes registered in Blagoevgrad region, close to the border with FYROM

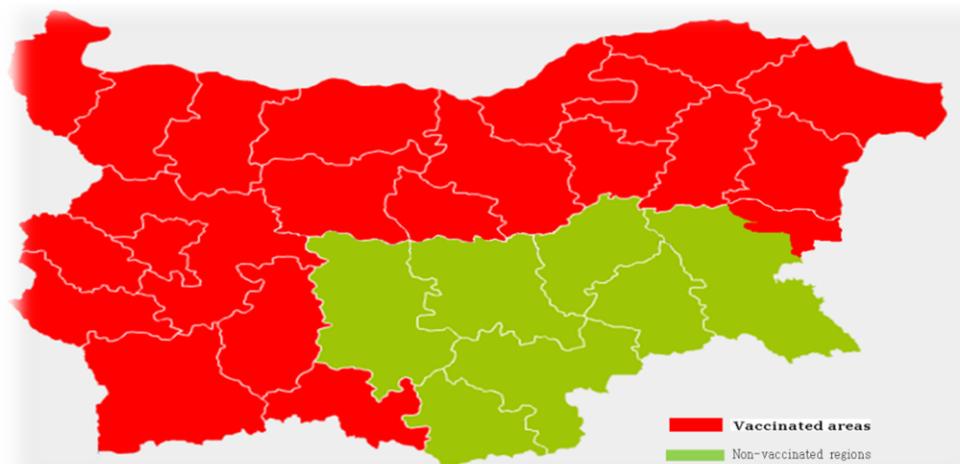

Rabies cases 2006-2017

Vaccination campaigns

- Oral vaccination of foxes – operational since 2009
- Lysvulpen vaccine, Bioveta Czech Republic, 20 baits/sq km
- Total number of baits distributed in 2017 – 2 042 920
- 10 batches distributed – all tested in EURL

Year	Campaigns	Districts	Territory covered (km ²)
2009	2 spring & autumn	18	55037
2010	1 spring	19	55995
2011	1 spring	19	55995
2012	2 spring & autumn	20	59500
2013	2 spring & autumn	20	59500
2014	2 spring & autumn	22	79119
2015	2 spring & autumn	16	54716
2016	2 spring & autumn	16	55394.5
2017	2 spring & autumn	16	56807.5

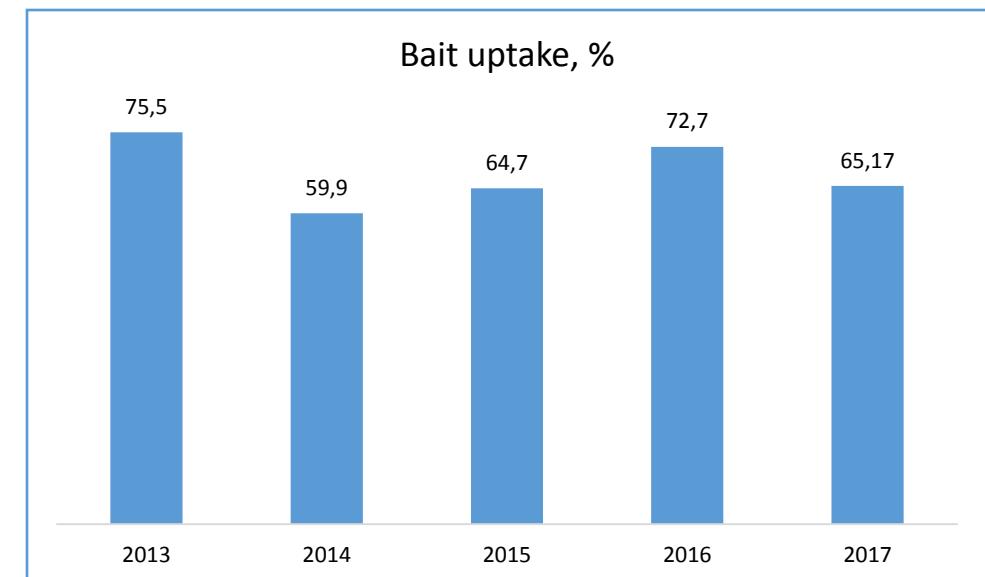

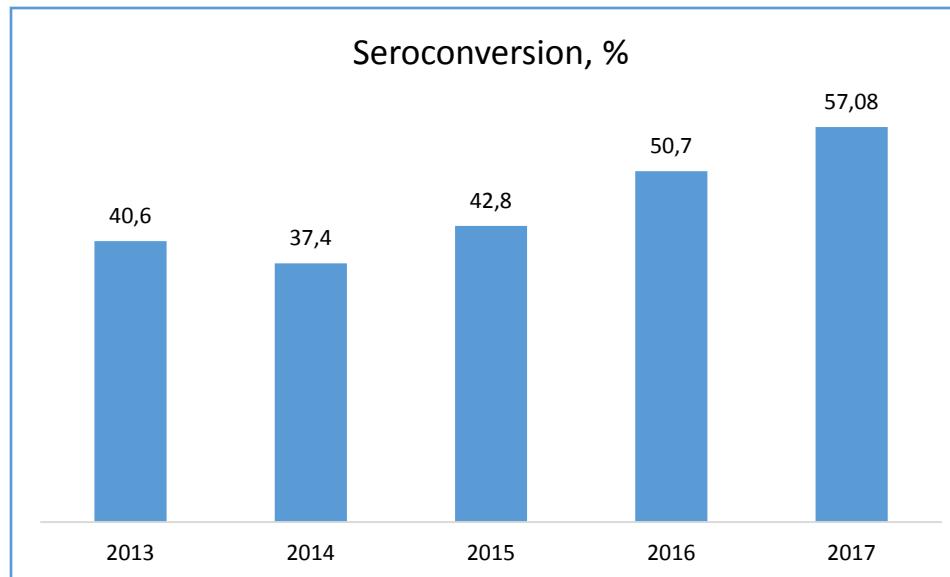

Vaccination campaigns

Wildlife oral vaccination- aerial distribution					
Region/Area	Month	Number of baits *	Size of vaccinate d area (km ²)	Distributi on method	Bait density (per km ²)
Blagoevgrad, Kyustendil, Pernik, Sofia city, Sofia district, Smolyan, Pazardzhik, Dobrich, Slistra, Pleven, Veliko Tarnovo, Razgrad, Ruse, Montana, Vratza, Vidin	Spring 18.04 - 03.05.2017	1010800	50286	aircrafts	20.10
	Autumn 28.10 - 07.12.2017	1010100	52508		19.24
Total		2020900	51397	aircrafts	19.67

Wildlife oral vaccination- manual distribution					
Region/Area	Month	Number of baits *	Size of vaccinate d area (km ²)	Distributi on method	Bait density (per km ²)
Kozlodui Powerplant (Vraca and Montana), Sofia city- suburbs	Spring	12000	4300	manual	2.79
	Autumn	12000	4300		2.79
Total		24000	4300	manual	2.79

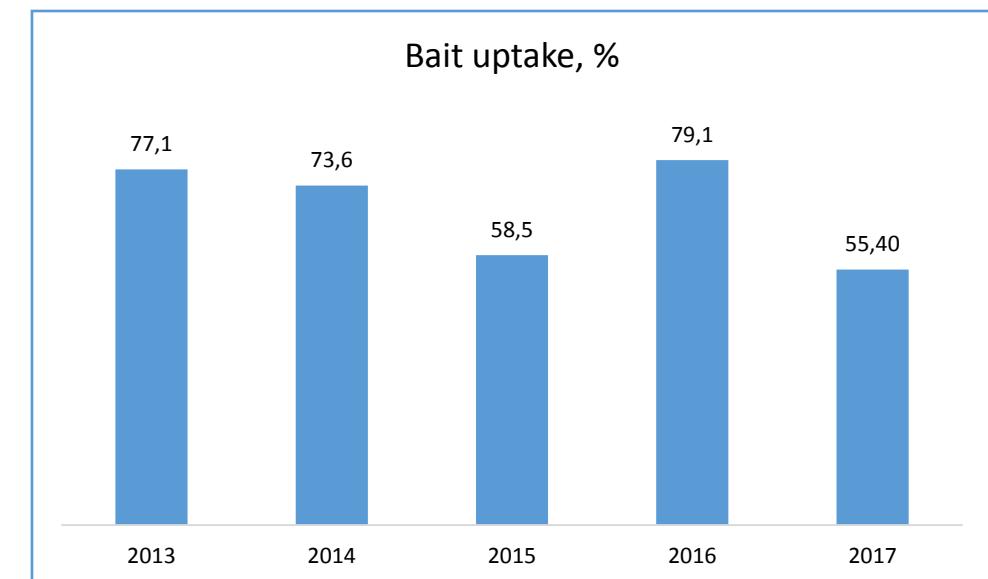

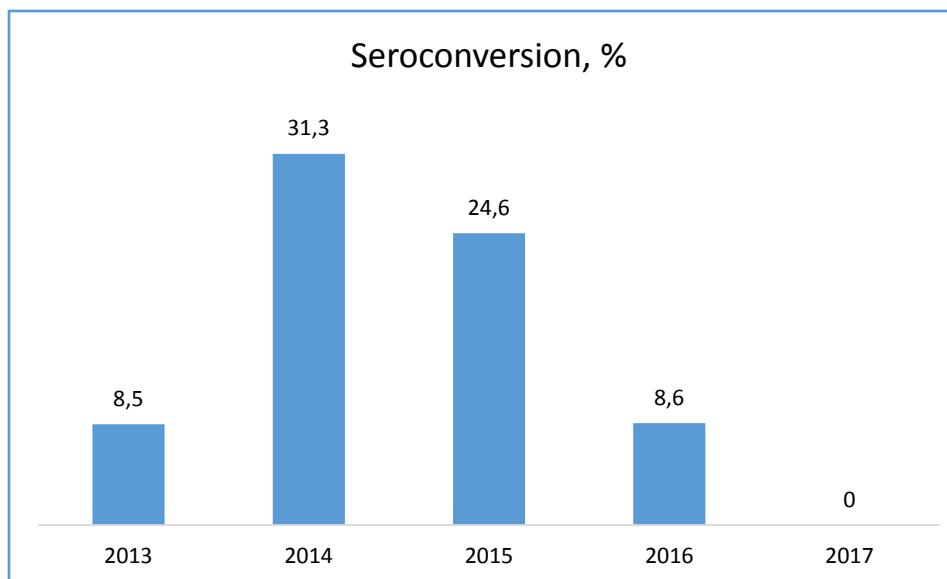

Monitoring of vaccination effectiveness, foxes

Region	Species	Serological tests				Tests for the presence of biomarker –Tetracycline (T)				IFT		
		Type of test	Number of tests	Seropositive	% seropositive	Type of test	Number of tests	Biomarker	% marker presence	Type of test	Number of tests	Positive
Total	foxes	ELISA	226	129	57.08	T	999	651	65.17	IFT	997	0

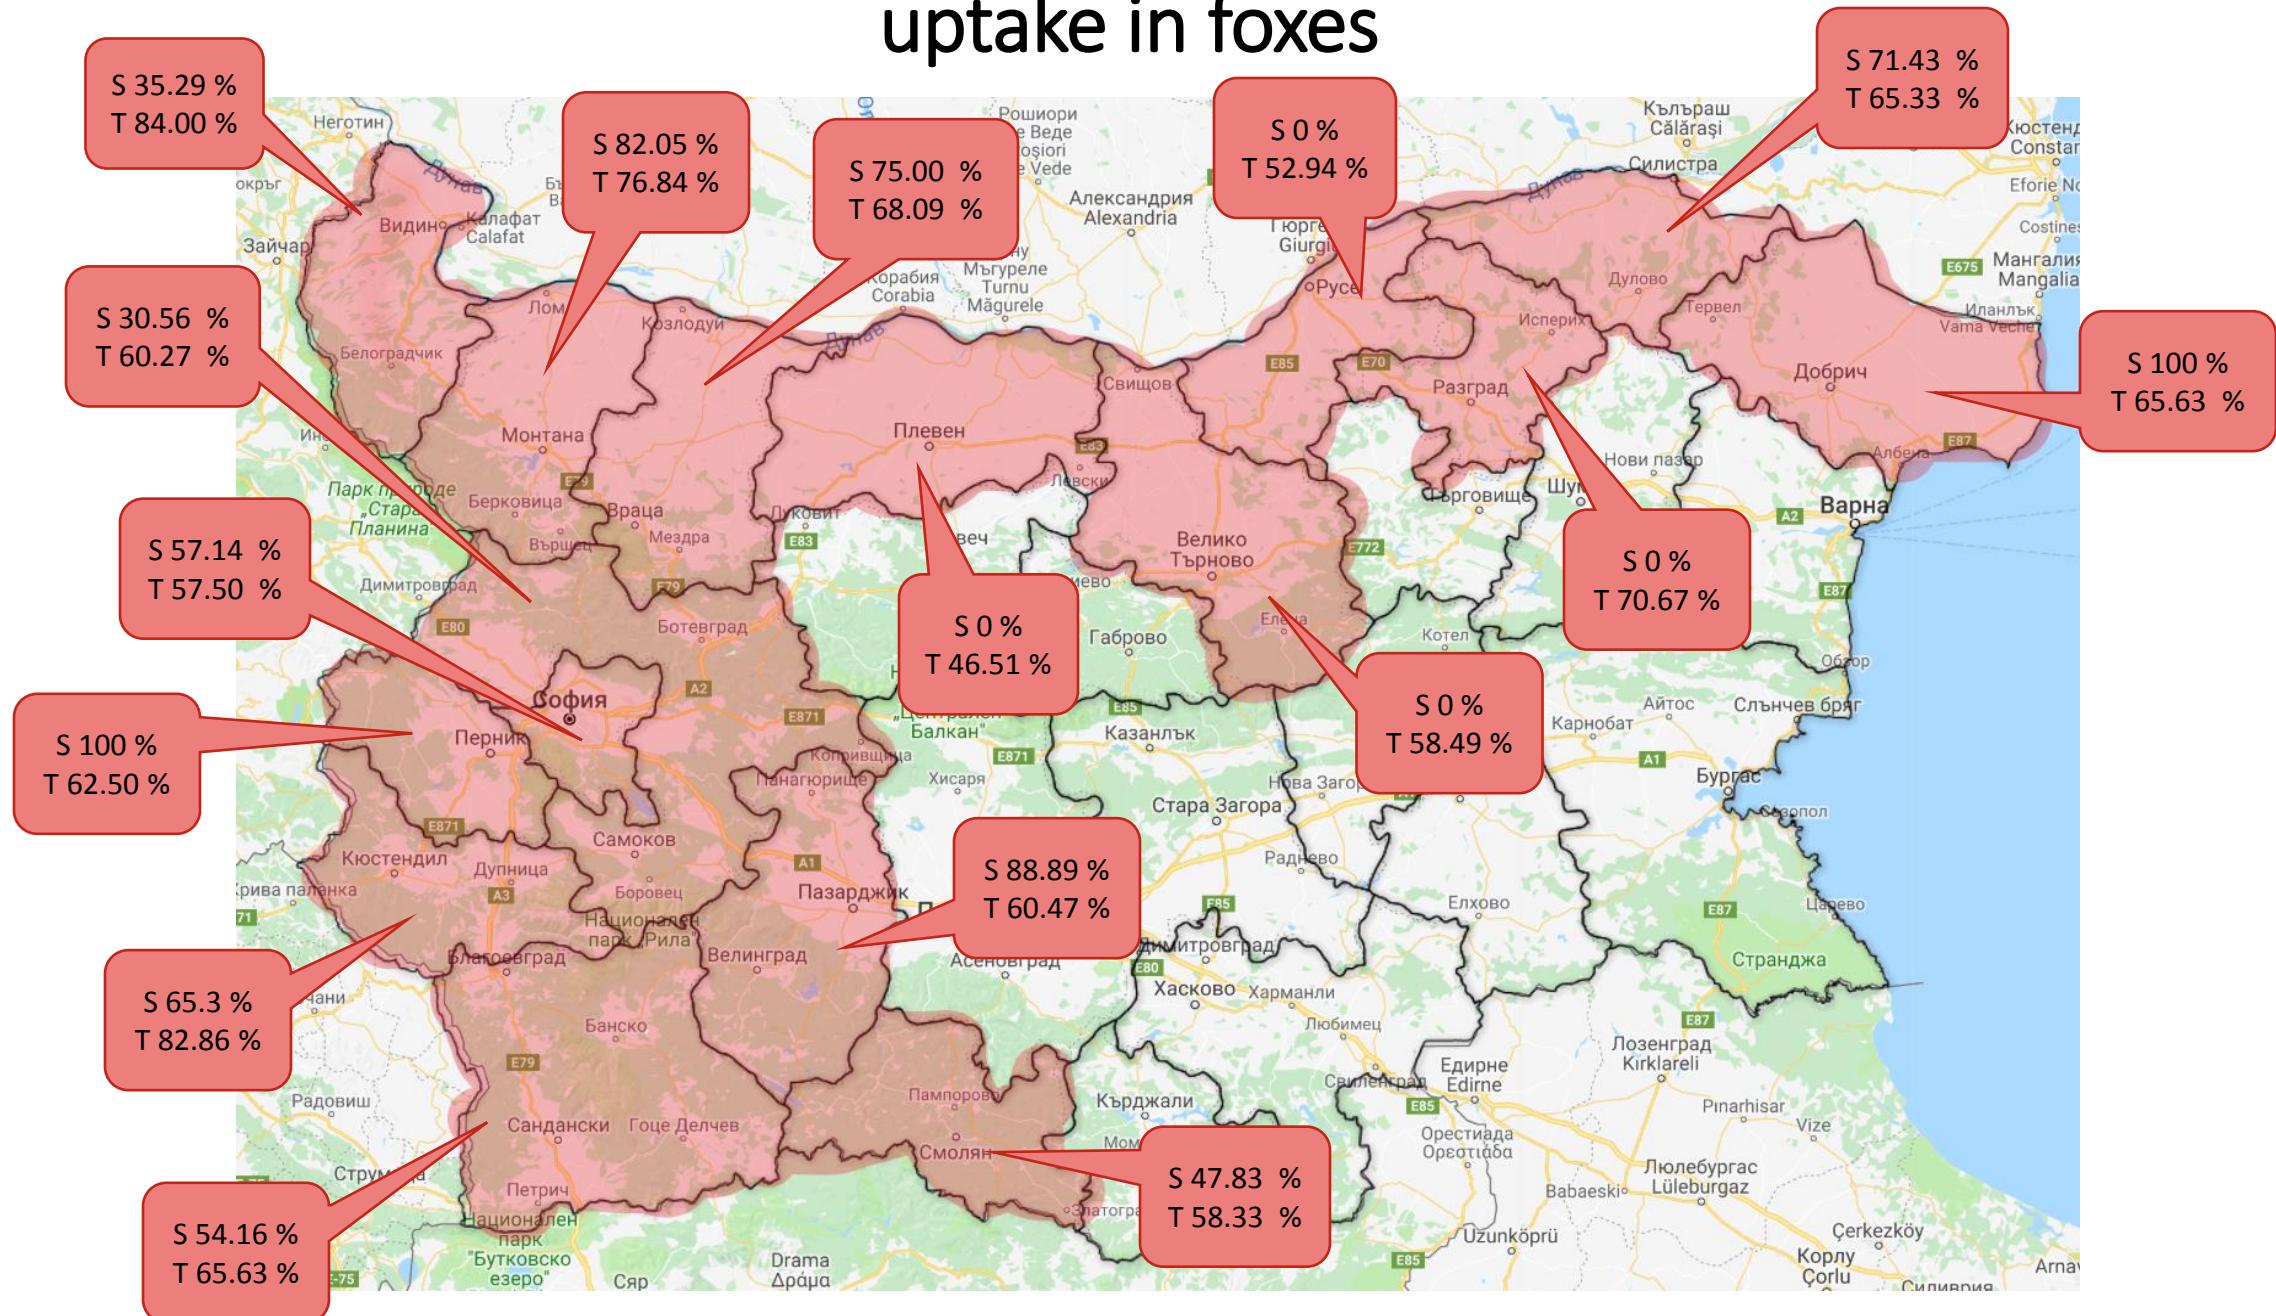

Monitoring of vaccination effectiveness, jackals

Region	Species	Serological tests				Tests for the presence of biomarker –Tetracycline (T)				IFT		
		Type of test	Number of tests	Seropositive	% seropositive	Type of test	Number of tests	Biomarker present	% marker presence	Type of test	Number of tests	Positive
Total	jackals	ELISA	91	0		T	787	436	55.40	IFT	786	0

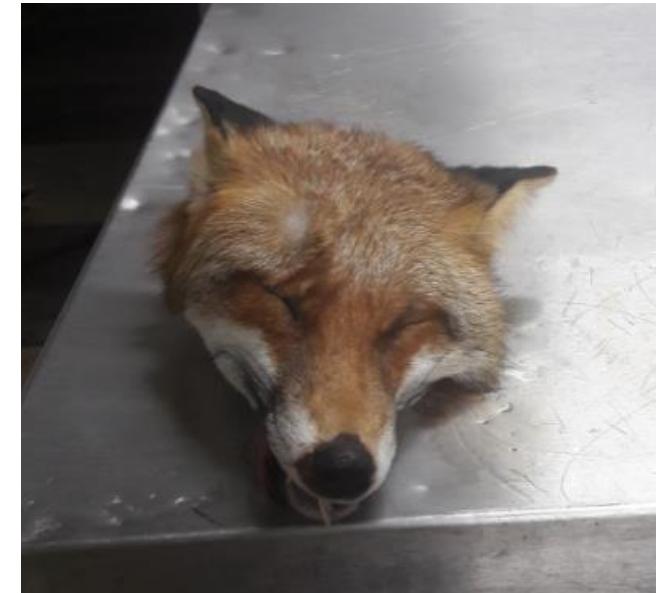

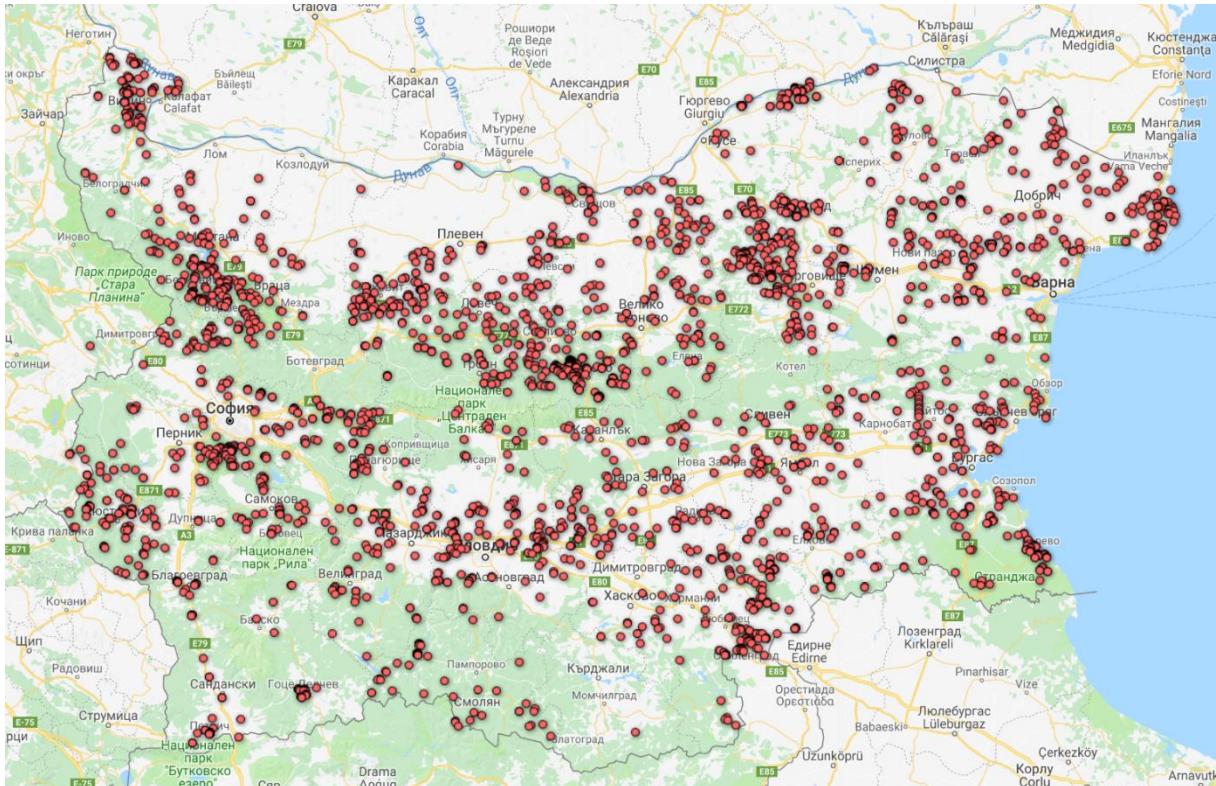

Monitoring of vaccination effectiveness- seroconversion and bait uptake in foxes

Surveillance activities – active surveillance

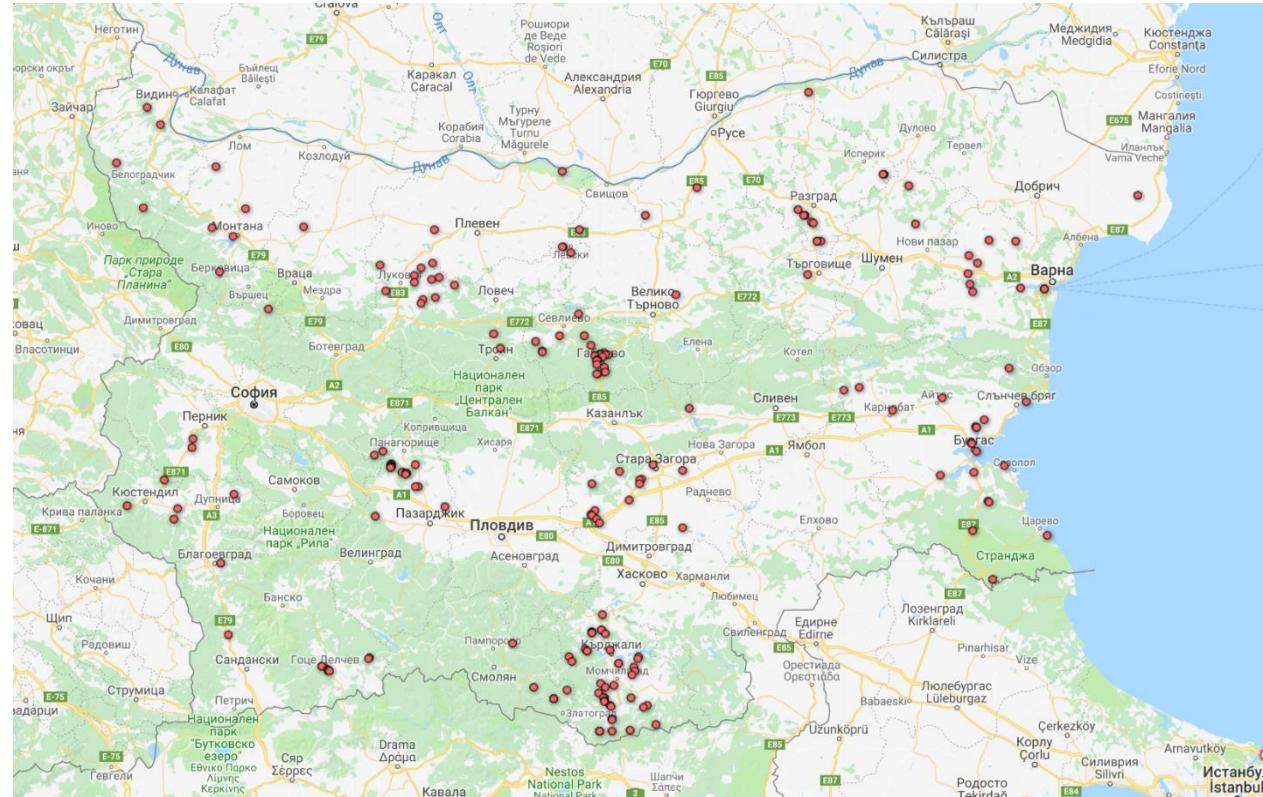

Species	IFT					Species	IFT					Tested and distributed
	Type of test	Number of tests, vacc zones	Number of tests, non - vacc zones	Positive			Type of test	Number of tests, vacc zones	Number of tests, non - vacc zones	Positive		
Foxes	IFT	997	476	0		Jackals	IFT	786	966	0		3225

Distribution
of samples
collected
under active
surveillance
in 2017

Surveillance activities – passive surveillance

Region	Domestic animals							Wild animals					Tested	Distributed	
	dog	cat	cattle	sheep	goat	stray dog	other	fox	wolf	marten	red deer	jackals	bat		
Total	10	7	1	2	2	26	1	3	3	1	1	5	1	63	102

Distribution of samples collected under passive surveillance in 2017
