Restricted areas (according to Decision 2014/709/EU) (4 December, 2014)

LATVIJAS ADMINISTRATĪVI TERITORĪLAIS IEDALĪJUMS

ASF surveillance in Latvia

Wild boar

- all dead /sick wild boar are tested for ASF using qRT-PCR (passive surveillance for whole country)
- all hunted animals, using qRT-PCR and ELISA (Part 2 and Part 3)

Domestic pigs

- Sampling in the case of suspicion (for whole country)
- Clinical inspection at home slaughtering and sampling in case of suspicion (Part 1, 2, 3)
- Sampling of pigs according to requirements to Commission Implementing Decision 2014/709/EU (trade of live animals or meat)

Active surveillance - the number of animals tested (25 June – 4 December)

	PCR investigated/ positive	ELISA investigated/ positive
Domestic pigs	3468/ 69	2840/ 6
Wild boar	3919 / 181	3742/ 28
TOTAL	7387/ 250	6582/ 34

Amount of meat/milk products taken out on the border with RU and BY (since the beginning of 2014)

Summary:

6 out of 20 tested meat product samples found PCR positive on ASF virus

Meat and meat products: **29 066,02 kg**

Milk and milk products: **18 618,51 kg**
