

MINISTRY OF AGRICULTURE OF THE RUSSIAN FEDERATION

ORDER

No. 456 dd. December 29, 2010

**ON APPROVAL OF THE RULES OF PLANT QUARANTINE ASSURANCE
WHILE IMPORTING QUARANTINE PRODUCTS IN THE RUSSIAN
FEDERATION, AS WELL AS DURING STORAGE, CARRIAGE,
TRANSPORTATION, PROCESSING AND USAGE THEREOF**

In order to implement article 2 of the Protocol of 21 May 2010 amending the Customs Union Agreement on Plant Quarantine dd. December 11, 2009, and in accordance with paragraphs 1 and 5.2.25.25. of the Regulation on the Ministry of Agriculture of the Russian Federation as approved by Government Regulation of the Russian Federation no. 450 dated 12 June 2008 (Code of Laws of the Russian Federation, 2008, № 25, Art. 2983; № 32, art. 3791; № 42 Art. 4825; № 46, Art. 5337, 2009, № 1, Art. 150; № 3, Art. 378; № 6, Art. 738; № 9, Art. 1119, Art. 1121; № 27, Art. 3364; № 33, Art. 4088, 2010, № 4, Art. 394; № 5, Art. 538; № 16, art. 1917; № 23, Art. 2833; № 26, st.3350; № 31, art. 4251; № 32, Art. 4330; № 40, Art. 5068), hereby it is ordered as follows:

1. To approve the attached Rules of Plant Quarantine Assurance While Importing Quarantine Products in the Russian Federation, as well as During Storage, Carriage, Transportation, Processing and Usage Thereof (hereinafter the Plant Quarantine Assurance Rules).

2. The Plant Cultivation and the Federal Veterinary and Phytosanitary Monitoring Service acting jointly with the interested subdivisions of the Ministry shall assure notification of the foreign economic activity participants of the quarantine phytosanitary requirements of the Russian Federation in digital format subject to their individual requests.

3. Order of the Ministry of Agriculture of the Russian Federation no. 681 dated September 3, 2002 On Approval of the Rules of Plant Quarantine Assurance while Importing, Storing, Carrying, Processing and Using Grain and its Derivatives Imported into the Russian Federation for Alimentation, Feeding and Technical Purposes (registered by the Ministry of Justice of the Russian Federation under no. 4008 on December 9, 2002) shall become ineffective.

4. The control over implementation of the Order shall be imposed on the Deputy Minister, O.N. Aldoshin.

Minister
E. SKRYNNIK

Annex
to Order of the Ministry of Agriculture of the Russian Federation
No.456 dd. December 29, 2010

**RULES OF PLANT QUARANTINE ASSURANCE WHILE IMPORTING
QUARANTINE PRODUCTS IN THE RUSSIAN FEDERATION, AS WELL AS
DURING STORAGE, CARRIAGE, TRANSPORTATION, PROCESSING AND
USAGE THEREOF**

I. General Provisions

1. These Rules are intended to prevent penetration and distribution of quarantine objects in the Russian Federation.

These Rules have been developed in accordance with the International Convention on Quarantine and Plant Protection, 1997, FAO, Rome, Commission Decision of the Customs Union no. 318 dd. June 18, 2010 On Assurance of Plant Quarantine in the Customs Union, Decree of the President no. 120 dd. January 30, 2010 On Approval of the Doctrine of Food Security in the Russian Federation (Code of Laws of the Russian Federation, 2010, no. 5, Art. 502, Rossiyskaya Gazeta, no. 21, 03.02.2010) and other regulatory acts of the Russian Federation in the field of plant quarantine.

2. These Rules cover the quarantine products being imported in the Russian Federation, which is included in the List of Quarantine Products (Quarantine Cargo, Quarantine Materials, Quarantine Goods) subject to Quarantine Phytosanitary Control (Supervision) at the Customs Border of the Customs Union and in the Customs Territory of

the Customs Union as approved by a Decision of the Customs Union Committee no. 318 dd. June 18, 2010 (hereinafter the Quarantine Products).

3. The types of quarantine products shall be identified in accordance with the stock list of the foreign economic activity of the Customs Union.

II. Quarantine Phytosanitary Requirements of the Russian Federation for the Quarantine Products Imported in the Russian Federation

4. The imported quarantine products should be free of quarantine facilities in a viable state included in the List of quarantine objects (plant pests, plant pathogens and plants (weeds)) as approved by Order of the Ministry of Agriculture of Russia no. 673 dd. December 26, 2007 (registered with the Ministry of Justice of Russia under no. 10903 on January 17, 2008, Bulletin of normative acts of federal executive bodies, 2008, no. 6) (hereinafter the List of Quarantine Objects), specific for the type of quarantine objects, the country of origin or country of export quarantine products according to Appendix to these Rules.

2. If there are any quarantine objects in a viable state in the lot of imported quarantine products the owner of the lot shall assure processing thereof in accordance with the technologies that ensure that the quarantine facilities lose their viability (hereinafter the Processing) or get disinfected.

3. The quarantine objects referred to a group of high phytosanitary risk should be accompanied by a phytosanitary certificate (a re-export phytosanitary certificate) issued by a competent authority of the country of (re-) export of the quarantine products.

III. Quarantine Phytosanitary Requirements of the Russian Federation for the Processes of Import, Carriage, Transportation, Storage and Usage of Import Quarantine Products

1. Quarantine Phytosanitary Requirements for Importing Quarantine Products of High Phytosanitary Risk

7. A lot of high phytosanitary risk quarantine products shall be imported in the Russian Federation subject to a phytosanitary certificate issued by a competent authority of the exporting country, which shall confirm compliance of such products with the Russian Federation requirements in the field of plant quarantine.

8. In case of export of high phytosanitary risk quarantine products from a country in respect of which no information on occurrence of quarantine objects is contained in the Appendix to these Rules the quarantine products imported from such country shall be subject to inspection on a compulsory basis.

2. Quarantine Phytosanitary Requirements for Importing Grain and its Derivatives, as well as for the Processes of Import Carriage, Transportation, Storage and Usage thereof

9. The Grain and its derivatives may be imported into the Russian Federation throughout the year with the exception of the cases stipulated in these Rules.

10. The Grain and its derivatives imported into the Russian Federation for further processing shall be processed in accordance with the technologies that assure absence of viability of the seeds irrespective of presence of absence of quarantine weed seeds.

The grain and its derivatives may not be brought from the place of their processing together with viable seeds.

11. Waste grain and its derivatives shall be processed, disposed of, destroyed according to the technology that assures non-viability of seeds.

12. No grain and its derivatives containing striga seeds shall be allowed for import into the Russian Federation.

The grain and its derivatives may be imported into the Russian Federation only from the countries free of striga among the countries of striga dissemination specified in Appendix to these Rules; the absence of striga shall be confirmed by a competent authority of the exporting country on the basis of inspections carried out not later than three year prior to delivery of grain and its derivatives to the Russian Federation. The competent authority shall mention the respective information in the "supplementary declaration" section of the phytosanitary certificate. The grain and its derivatives may be brought from striga dissemination countries into the Russian Federation only after the phytosanitary state of the lot of quarantine products has been established.

13. It shall be allowed to import for further processing the corn grain containing pathogens *diploidea* maize (*Stenocarpella macrospora*; *Stenocarpella maydis*), southern maize *Helminthosporium* race T (*Cochliobolus heterostrophus* race T) and bacterial wilt (wilt) of maize (*Pantoe stewartii*).

14. Wheat, rye, meslin and their derivatives may be imported into the Russian Federation from the countries <*> of dissemination of Indian wheat smut (*Tilletia indica*) only if they originate from the areas free of Indian smut, which must be confirmed by field inspections and laboratory studies and reflected additional declaration of a

phytosanitary certificate issued by the competent authority of the exporting country. Import and use of wheat, its processing products from the spread of Indian smut can be resolved only on the advice of the laboratory examination.

<*> The quarantine objects that are spread in the exporting countries and specific for quarantine products imported into the Russian Federation are listed in Appendix to these Rules.

In case of detection of Indian smut of wheat the wheat grain and its derivatives shall be returned, disposed of or destroyed.

Wheat, rye, meslin and their derivatives may be imported into the Russian Federation from the countries of dissemination of Indian wheat smut only from November 1 till March 31 through the ports of St. Petersburg and the ports of the Arctic Ocean, Magadan, Petropavlovsk-Kamchatsky for usage for technical purposes at mills and bakery enterprises of the Novgorod, Vologda, Kirov, Perm, Sverdlovsk, Tyumen, Tomsk, Krasnoyarsk, Murmansk Regions, the Republic of Karelia, Arkhangelsk Region, Komi Republic, Kamchatka Region, Sakhalin Region, Magadan Region, Sakha Republic.

The unloading of wheat, rye, meslin and their derivatives shall be carried out in ports on isolated piers according to the ship board-vehicle scheme; after the transportation has been completed the vehicle shall be treated.

The wheat, rye, meslin and their derivatives imported from the countries of dissemination of Indian wheat smut shall not be used for retail and feeding.

The package used for wheat grain and its derivatives imported from the countries of dissemination of Indian wheat smut shall be disinfected by thermal method at temperatures higher than 110 ° C at any point of the package with the exposure period of at least 3 hours or destroyed.

15. The grain and its derivatives imported into the territory of the Russian Federation from the countries of dissemination of Capridae beetle (*Trogoderma granarium*) specified in the Appendix to these Rules upon detection in any of them of any live objects in the active state shall be subject to preventive disinfection in the transport following the regime of treatment against the larvae of Capridae beetle, and in case of failure to perform such treatment the grain and its derivatives shall be returned or destroyed.

The malt originating from countries of dissemination of Capridae beetle may be unloaded from transport at the point of destination only after its quarantine pest inspection of vehicles; the usage of such malt shall be allowed exclusively on the basis of quarantine pest inspection in warehouses.

16. If any living specimens of caryopses (*Callosobruchus* spp.) are detected in black crop grains and their derivatives the grain shall be disinfected, and in case of failure returned or destroyed, and the vehicles shall be disinfected.

17. In the Russian Federation, the grain, meal, oilcake may be transported in the holds of ships, containers, wagons subject to application of measures for elimination of spillage.

The grain, meal, oilcake may be transported from the storing companies to enterprises for their processing by motor transport using all-metal containers (including containers). The outside surfaces of containers and vehicles must be free of spillage of grain, meal, oilcake.

18. If the grain and its derivatives are imported packed the package must be new and gas-permeable.

19. While unloading grain and its derivatives from the holds of ships the technical means that exclude spillage in the water shall be used.

The unloading of grain, meal, oilcake from transport shall be allowed only in the areas with hard surface (concrete, asphalt).

The railway cars may be brought outside the unloading areas only if they have been fully cleared from grain and its derivatives including the outside surfaces of cars.

20. Spillage of grain and its products in the unloading areas and on railroad tracks shall be removed on a daily basis.

21. Vehicles, vessels, storage facilities and equipment used for storage, transportation, processing of grain and its derivatives shall be cleared from spillage and residues of grain and its derivatives.

22. Waste grain and its derivatives that do not represent any economic value shall be destroyed through incineration in the places of unloading, storage and processing thereof. The materials remaining from incineration shall be buried in phytosanitary pits or at a depth of 50 cm at least.

23. The warehouses of organizations, individual entrepreneurs and citizens engaged into storage and processing of grain and its derivatives shall be subject to preventive phytosanitary decontamination through fumigation on a regular basis, but not less than once a year.

24. It shall be prohibited to use as seeds the grain that is imported into the Russian Federation for the purpose of alimentation, animal feeding and for technical purposes.

25. The organizations, individual entrepreneurs and citizens engaged into storage and processing of imported grain and its derivatives must have:

- a technology of processing of the grain and its derivatives assuring non-viability of seeds;
- protected areas;
- unloading areas with hard surface;

- furnaces or equipment for incineration of waste grain and its derivatives, sweepings and debris or phytosanitary pits.

3. Quarantine Phytosanitary Requirements for Importing Seeds and Planting Material, as well as for the Processes of Import Carriage, Transportation, Storage and Usage thereof

26. It shall be prohibited to import into the Russian Federation the plant seeds and planting material infected with quarantine pests that are included in the List of Quarantine Objects.

27. At the points of entry the lots of seeds and planting material shall be subject to identification under their accompanying phytosanitary certificates and through visual inspection.

28. The seeds and planting material must be in original packaging till completion of the inspection, sampling and expert examination of samples.

29. It shall be prohibited to use seeds and planting material according to their intended use unless the results of laboratory phytosanitary examination have been received. Pending completion of expert examination the quarantine material must be kept in the conditions that prevent dissemination of quarantine pests.

30. The potato imported into the Russian Federation for seeds and breeding shall include actual seeds, tubers, tuber-bearing species of the *Solanum* genus (mainly *S. tuberosum*), minitubers (tubers originating from microplant potatoes grown in breeding ground) and microplants (plants including tubers contained in tissue culture of tuber *Solanum* spp.). The breeding material that has not been specified hereabove may also include other stolons or tuber species or hybrids of *Solanum*.

31. Lots of seed potatoes must be packed in new packaging.

32. The content of soil in lots of seed potato shall not exceed 1% of the product weight.

33. Potted plants and plants with closed root system must be imported into the Russian Federation in nutrient substrate free of quarantine pests.

34. The plants with a lump of basal soil from the areas, places and / or sites of production that are recognized to be free from quarantine pests may be imported into the Russian Federation subject to quarantine phytosanitary control including mandatory laboratory examination of soil samples against the full range of quarantine objects that can spread with the soil.

35. The planting material of fruits, berries, ornamental plants and vines (except strawberries) imported in the Russian Federation shall be dormant and contain no leaves, flowers and fruits.

36. It shall be prohibited to import seeds and planting materials in luggage, carry-on baggage and by post unless such seeds and planting materials are accompanied by a phytosanitary certificate.

37. If any quarantine pests have been detected in lots of imported seed and planting material such lots shall be subject to disinfection, and in case of impossibility thereof the seed and planting material shall be returned or destroyed.

38. If any quarantine pests are detected in a lot of seed or planting material only the infected part of the lot shall be subject to decontamination, return or destruction.

Seed potatoes must be produced in the areas, locations and / or sites of production that are free of pathogens of fungal, bacterial, viral, nematode diseases included in the List of Quarantine Objects, which shall be confirmed by respective information in the "supplementary declaration" section of the phytosanitary certificate.

39. Seedlings, rootstocks, cuttings of pome fruits, stone fruit and nut crops must be free of pests, pathogens of fungal, bacterial, viral and nematode diseases, and produced in the areas, places and / or sites free from the abovementioned diseases, which must be confirmed by relevant information mentioned in the "supplementary declaration" of the phytosanitary certificate.

40. It shall be allowed to import planting material from areas of widespread *Quadrascidiotus porniciosus* and *Pseudaulacaspis pentagona*, i.e. from the country or a part of country for which such organisms have no quarantine value provided decontamination of plants in the exporting country, which shall be confirmed by relevant information mentioned in the "supplementary declaration" of the phytosanitary certificate.

41. It shall be allowed to import and sell planting and inoculative material from the areas of dissemination of *Quadrascidiotus porniciosus* and *Pseudaulacaspis pentagona* from the countries specified in the Appendix to these Rules subject to their prior disinfection.

42. It shall be allowed to import seedlings and cuttings of apple rootstocks, cherries from the areas, locations and production sites free of Cherry rasp leaf nepovirus *Cheravirusa rasp leaf cherry*, which shall be confirmed by relevant information mentioned in the "supplementary declaration" of the phytosanitary certificate.

43. Sowing (planting) performed using imported seed and planting material are subject to quarantine phytosanitary inspection.

4. Quarantine Phytosanitary Requirements for Importing Fruits and Vegetables, and Potatoes for Food and Technical Purposes, as well as for the Processes of Import Carriage, Transportation, Storage and Usage thereof

44. It shall be forbidden to import pome fruit, stone fruit, citrus and other crops with quarantine objects included in the List of Quarantine Objects except as provided in these regulations.

45. Each package of fruits and vegetables must be marked with information about the types of products, their country of origin, exporter and / or re-exporter.

46. Fruits and vegetables should be in original packaging till completion of the state quarantine pest control.

47. If quarantine pests are found in the specimen (s) of fruits and vegetables sampled from a lot such lot shall be disinfected or in case of failure returned or destroyed.

48. The admixture of soil in potatoes and other tuberous plants and root vegetables should not exceed 1% of the weight of products.

49. The import and sale of pome and stone fruit crops damaged by eastern moth *Grapholitha molesta* Busck and peach moth *Carposina niponensis* Wisgh to the north of the border of the area of potential habitat located along the line connecting the cities of Petrozavodsk, Syktyvkar, Solikamsk, Perm, Ekaterinburg, Omsk, Tomsk, Krasnoyarsk, Irkutsk, Ulan-Ude, Chita, Blagoveshchensk, Khabarovsk, Aleksandrov-Sakhalinsk shall be allowed throughout the year without any restrictions.

50. In the areas of risk, i.e. to the south of the line specified in paragraph 4.7 the import and sale of pome and stone fruit crops damaged by eastern moth *Grapholitha molesta* Busck and peach moth *Carposina niponensis* Wisgh shall be allowed from October 15 till April 15. In the period from April 16 to October 14, the pome and stone fruit crops brought into this area shall be totally free from eastern and peach moth, which shall be established at entrance of the abovementioned products in the Russian Federatio following examination, and where necessary inspection of this type of quarantine products.

51. The import of fruits damaged by the Mediterranean fruit fly *Ceratitis capitata* Wied and fruit weevil *Conotrachelus nepuphar* Hb. into the area located to the north of the administrative boundaries of Rostov and Voronezh regions, shall be allowed without restrictions, and for the area located to the south of the border the import shall be allowed in the period from November 1 to March 31. In case of import of citrus fruit damaged by the Mediterranean fruit fly *Ceratitis capitata* Wied. and fruit weevil *Conotrachelus nepuphar* Hb. through the southern ports of the Black and Azov Seas it shall be permitted to export them to the regions located to the north of the administrative boundaries of Rostov and Voronezh regions subject to their transportation in refrigerated trucks and refrigerated sections of motor and railway transport.

The motor refrigerators and refrigerated sections of motor and railway transport shall not be open when they are to the south of the abovementioned borders.

52. To the south of the administrative boundaries of Rostov and Voronezh regions the use of fruit damaged by the Mediterranean fruit fly *Ceratitis capitata* Wied and fruit weevil *Conotrachelus nepuphar* Hb. shall be allowed throughout the entire year subject to disinfection.

53. The transportation of the products contaminated by quarantine pests in the risk area of Russia, i.e. in the territory where the soil and climatic conditions allow acclimatization of a quarantine object and which can become a potential habitat of quarantine object dissemination shall be allowed exclusively in covered, properly working and sealed railway cars, trucks, motor refrigerators or containers.

54. It shall be prohibited to use phylogenous bedding for importing fruits and vegetables.

55. The refrigeration of citrus fruits shall be carried out in summer (from April 1 to October 1) using refriagaerators working in the anti-Mediterranean fruit fly (*Ceratitis capitata*) modes. It shall be allowed to perform refrigeration on the way subject to measuring of temperatures in each hold and each hold deck at least 3 times per day if the way to Russian ports takes not less than 20 days, and the temperature in holds for such period shall not exceed 4.5°C

5. Quarantine Phytosanitary Requirements for Importing Cut Fresh Flowers, as well as for the Processes of Import Carriage, Transportation, Storage and Usage thereof

56. It shall be prohibited to import cut fresh flowers with quarantine objects included in the List of Quarantine Objects.

57. Each package of cut fresh flowers should be marked with information about the types of products, their country of origin and exporting party.

58. Cut fresh flowers should be in original packaging till completion of the quarantine phytosanitary control.

59. A lot of cut fresh flowers infected with quarantine objects shall be disinfected or in case of failure returned or destroyed.

60. If it has been detected that a lot of cut fresh flowers being a part of cargo containing several lots has been infected only the infected lot of cut fresh flowers shall be decontaminated or in case of failure returned or destroyed.

61. The area, location and site of production of chrysanthemums (*Chrysanthemum*, *Dendranthema*) should be free from the pathogen of chrysanthemums askohitoza *Didymella ligulicola* (KF Baker, Dimock & Davis) von Arx and chrysanthemum white rust pathogen *Puccinia horiana* P. Henn., which must be confirmed by a competent authority of the exporting country according to the results of inspections performed during the three years preceding to shipment. A respective record thereof shall be made in the "supplementary declaration" section of a phytosanitary certificate.

62. 1-2 bouquets of fresh flowers may be brought into the Russian Federation without any phytosanitary certificate as carry-on luggage, baggage and through postal delivery subject to the results of quarantine phytosanitary control.

**6. Quarantine Phytosanitary Requirements for Importing
Wood Packaging and Mounting Parts, as well as for the Processes of Import
Carriage, Transportation, Storage and Usage thereof**

63. Wood packaging and mounting materials imported into the Russian Federation, including the parts of repaired wood packaging and mounting materials must be decontaminated and labeled in the prescribed manner.

64. While carrying out quarantine phytosanitary control (supervision) of wood packaging and mounting materials no phytosanitary certificates shall be requested. The official of a competent authority performing such examination or inspection of the abovementioned quarantine products shall verify availability of special international label.

65. In the absence of labeling the wood packaging and mounting materials may be imported on the basis of the results of a quarantine phytosanitary control.

66. Wood packaging and mounting materials that should be decontaminated, returned or destroyed shall be stored in the conditions that exclude dissemination of quarantine object from the moment of their detection till application of respective phytosanitary measures.

**7. Phytosanitary Requirements for Importing
Quarantine Products of Low Phytosanitary Risk**

67. Low phytosanitary risk products are imported into the Russian Federation without any phytosanitary certificate of the exporting country.

68. In respect of low phytosanitary risk products the selective quarantine phytosanitary monitoring shall be carried out.

69. In case of export of low phytosanitary risk quarantine products from a country in respect of which no information regarding dissemination of quarantine objects is contained in the Appendix to these Rules the quarantine products exported from such country shall be subject to compulsory quarantine examination.

70. If a quarantine object is detected in the imported quarantine products of low phytosanitary risk as a result of quarantine phytosanitary monitoring the respective phytosanitary measures shall be applied to such products.
