- ➔ occurrence confirmed after 20 months period (last occurrence in May 2013)

The Number of Positive Cases of Wild and Domestic Animals from 1993 to 2015 in the Slovak Republic (state of play 13/1/2015)

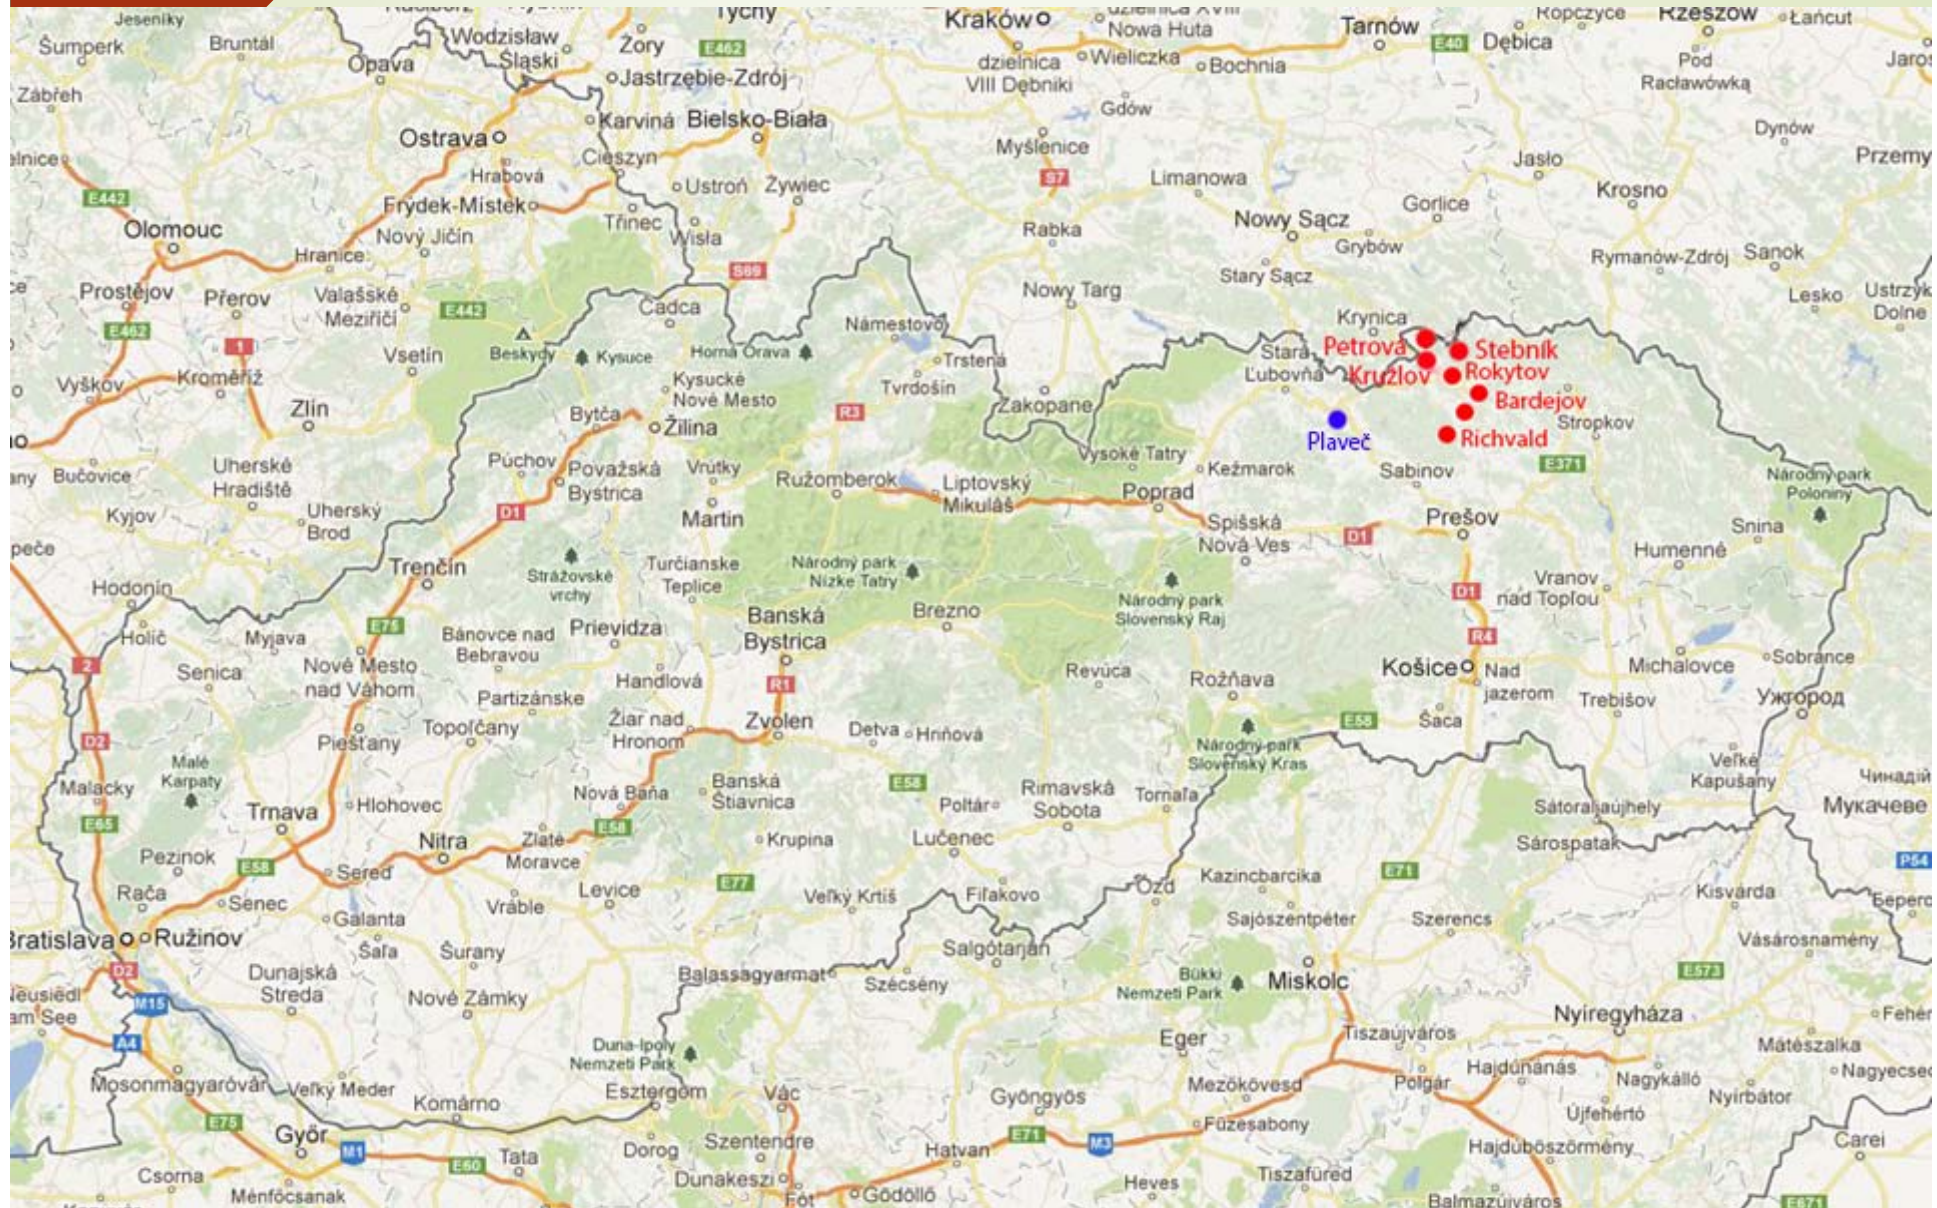

Distribution of vaccine baits for oral vaccination of fox population in the Slovak republic in the year 2015 (model map)

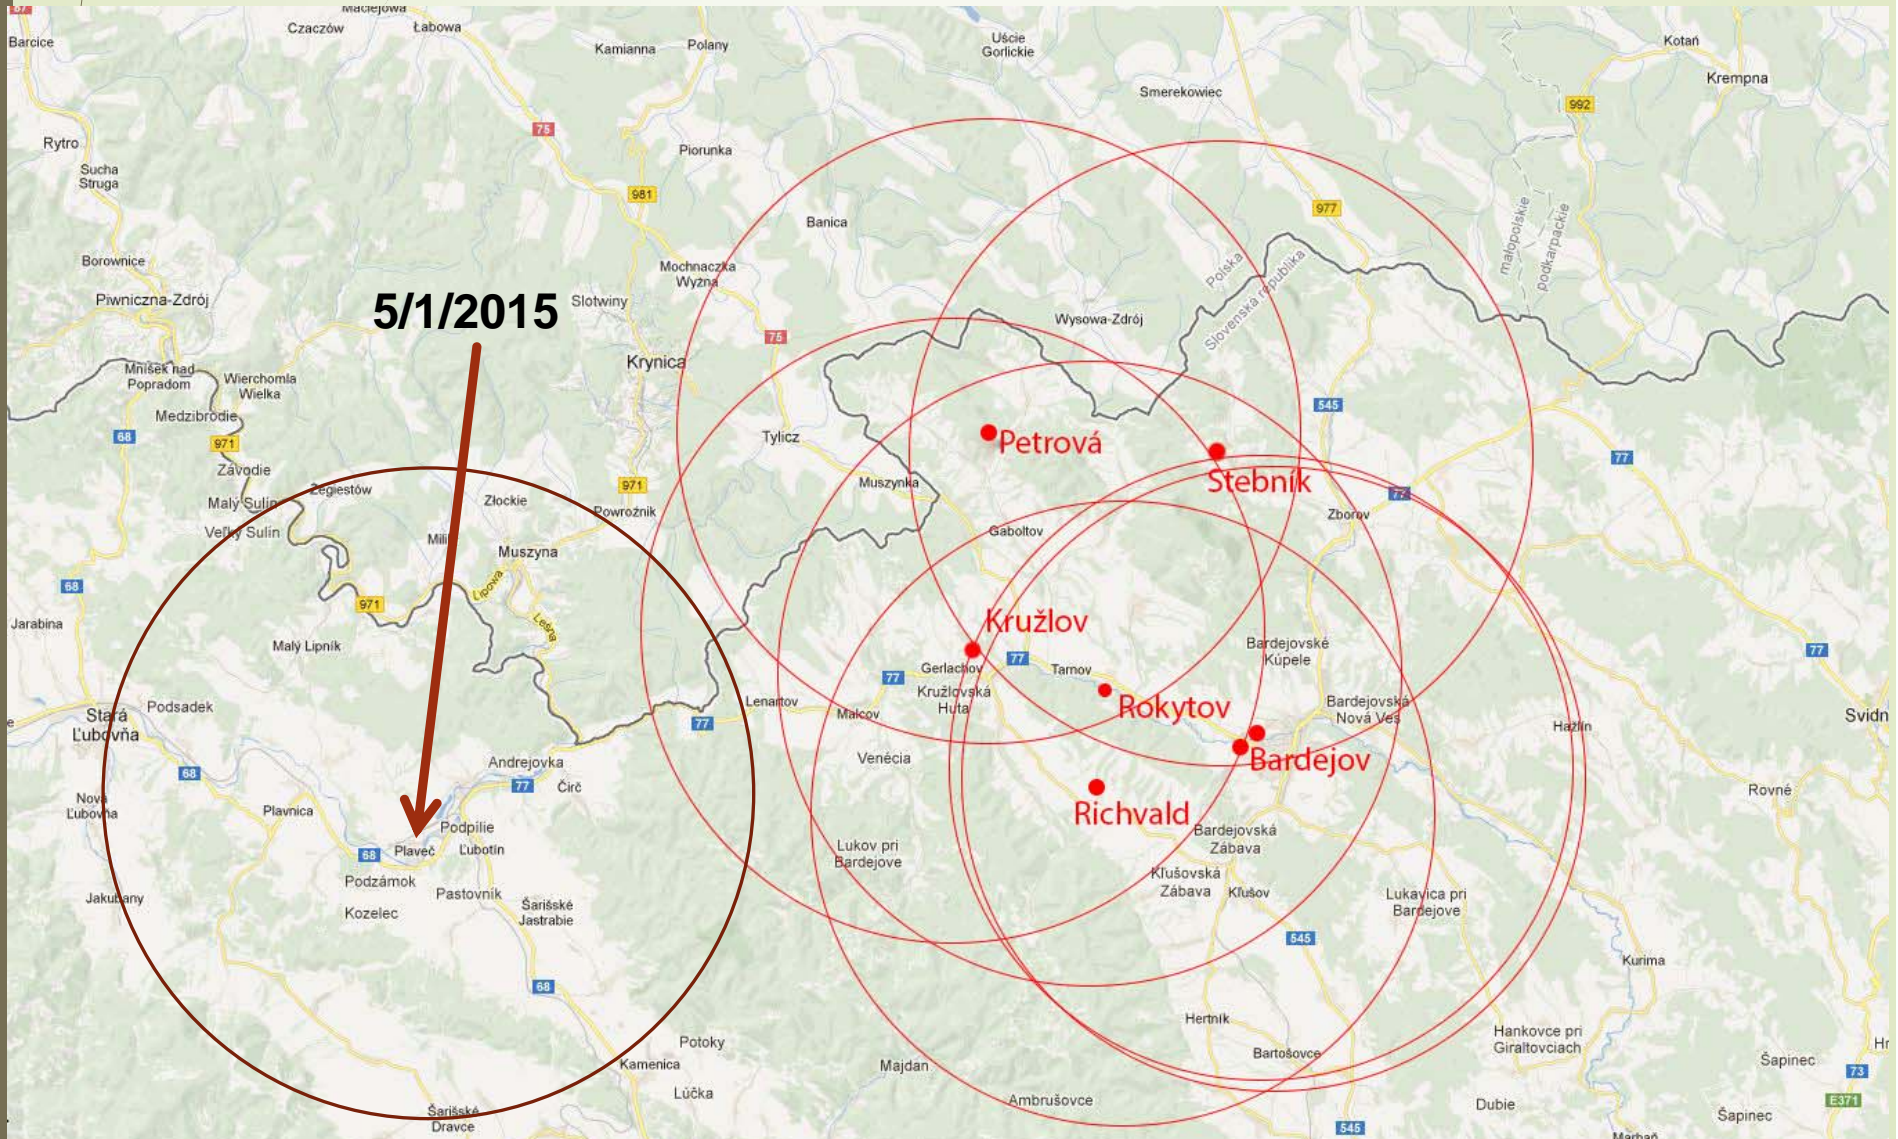

Rabies cases- SK – 2013/2015

Rabies cases- SK – 2013/2015

Rabies outbreaks 2013/2015

Measures adopted in connection with this positive result– domestic (wild) animals

outbreak definition

in the outbreak – ordered by vet. authorities

1. marking it with warning tables with wording „CAUTION RABIES !”
2. manipulation with susceptible animals which came into contact with an animal positive to the presence of rabies antigen
3. carrying out the registration of dogs and cats and protective vaccination of dogs, cats and other carnivore over 3 months of age which have not been vaccinated against rabies so far or since the last antirabic vaccination or re-vaccination period elapsed, provided that they did not come into contact or they did not have the possibility to come into contact with an animal positive to the presence of rabies antigen

SK rabies cases 2013/2015- further information

- Case has been reported to the OIE as well as via ADNS report (same procedure applied by cases occurred in 2013)
- Measures adopted by DVFA Stara Ľubovňa (on the spot) according to the law on veterinary care valid in the Slovak Republic as well as National programme of rabies eradication in the Slovak Republic for year 2015
- Oral vaccination of foxes in 2015: will be performed twice a year (spring and autumn campaign) by using of Lysvulpen a.u.v., CZ origin; manufacturer Bioveta a.s – it contains modified, attenuated rabies virus SAD Bern (+ TTC as indicator) which is given to each bait

Results of examination - wild and domestic animals (2000 - 30/09/2014)

Year	Wild animals				Domestic animals				The total number of animals	
	Red fox		Other		Dogs and cats		Other
