EU WHITE PAPER ON FOOD SAFETY (1)

COMMISSION WHITE PAPER ON FOOD SAFETY
12 January 2000

EU WHITE PAPER ON FOOD SAFETY(2)

- Need for a more coherent, effective and dynamic EU food policy
- EU food policy to be built around high food safety standards, taking into account a system that ensures a high level of protection of public health, animal health and welfare, plant health and the environment
- EU food policy must be based on a comprehensive and integrated risk analysis approach throughout all food chain

from **FARM** to

EU WHITE PAPER ON FOOD SAFETY

**IN LINE WITH THE 'FARM TO FORK' APPROACH ON THE
EU WHITE PAPER ON FOOD SAFETY**

BTSE

From Farm to Fork

CONTROLLING THE SAFETY OF THE AGRI FOOD CHAIN

NATIONAL ENFORCEMENT AUTHORITIES PERFORM CONTROLS ON FARMS, BUT ALSO...

...BORDER CONTROLS FOR IMPORTED ANIMALS, PLANTS, SPECIFIC FOODSTUFF FROM OUTSIDE THE EU AND...

CONTROLS DURING TRANSPORT WITHIN THE EU, AND...

...CONTROLS ON FOOD PROCESSING PLANTS, WHOLESAVERS, SUPERMARKETS RETAILERS AND RESTAURANTS

> THE CONTROLS CHECK FOR

- hormones
- chemical residues
- bacterial / viral contamination
- overall hygiene
- labelling
- proper refrigeration
- animal and plant health requirements
- animal welfare
- fraud

> Controls are performed on the basis of RISK for health

> 100,000-120,000

IMPARTIAL, INDEPENDENT,
WELL TRAINED STAFF
with specific inspection competences
check 25 MILLION operators
along the agrifood chain for the
safety of 500 million consumers.

EU WHITE PAPER ON FOOD SAFETY - PROPOSALS

- New legal approach in the food domain with the introduction of the principles related to food safety, including feed, animal health and welfare, food and feed hygiene, contaminants, novel food and food and feed additives
- Responsibilities for all food and feed operators
- Traceability of food and feed and their ingredients throughout the whole food chain
- Appropriate official controls in all MS, including import controls
- Consumer information and transparency
- Establishment of an independent European food safety authority, with particular responsibilities for both risk assessment and communication on food safety issues

General Food Law

28 January 2002, **REGULATION 178/2002** OF THE EUROPEAN PARLIAMENT AND THE COUNCIL

- Definitions,
- Risk analysis,
- From farm to fork,
- Precautionary principle,
- Transparency,
- Trade of food and feed,
- Standards,
- Responsibilities of food and feed business operators,
- Traceability,
- EFSA, RASFF,
- Emergency measures

GENERAL FOOD LAW

AIM AND SCOPE

Lays down the general principles governing food and feed in general, and food and feed safety in particular, providing the basis for the assurance of a high level of protection of human health and consumers' interest in relation to food

ESTABLISHES:

- The European Food Safety Authority - **EFSA**
- Procedures for matters with a direct or indirect impact on food and feed safety

APPLIES:

- To all stages of production, processing and distribution of food and feed, and the feed for food-producing animals (except primary production for private domestic use or to the domestic preparation, handling or storage of food for private domestic consumption)

Control Regulation

Official control by member states: **REGULATION 882** of 29 April 2004 on official controls performed to ensure the verification of compliance with feed and food law, animal health and animal welfare

- Definitions,
- Obligations,
- Competent authorities,
- Sampling and analysis,
- Official controls,
- Reference laboratories,
- Control plans,
- Import from third countries,
- Enforcement

BTSE

Veterinary border control

The veterinary border control is a key factor to ensure that the live animals and animal products entering to the European Union are safe and meeting the **specific import conditions** laid down in the Union legislation.

The imported live animals and animal products present the highest level of risks as they can transmit serious human and animal diseases. Therefore it is necessary to subject them to specific controls at their point of entry, so called **Veterinary Border Inspection Posts**(BIPs).

A consignment of live animals or animal products can only enter into the EU, if it has satisfactorily undergone the specific checks and a Common Veterinary Entry Document (CVED) is issued from **TRACES (Trade Control and Expert System)**. TRACES is a centralised database which allows the monitoring of consignments of live animals and animal products checked at the BIPs. TRACES may automatically exchange data on import controls with customs authorities, which has enabled DG TAXUD and DG SANTE to develop an EU CVED Single Window project.

Official controls on imported products (1)

The European Union is a major importer of food and feed. Strict import rules with respect to food and feed hygiene, consumer safety and animal health status aim at assuring that **all imports fulfill the same high standards as products from the EU itself**. Import controls are crucial in verifying compliance of food and feed products with relevant requirements.

Current **approach to import controls varies according to the sector**.

Mandatory channeling of products to border control entities and uniform frequencies for checks apply to **live animals, products of animal origin, plants and plant products** because of the risk those commodities might pose in relation to animal or plant health respectively.

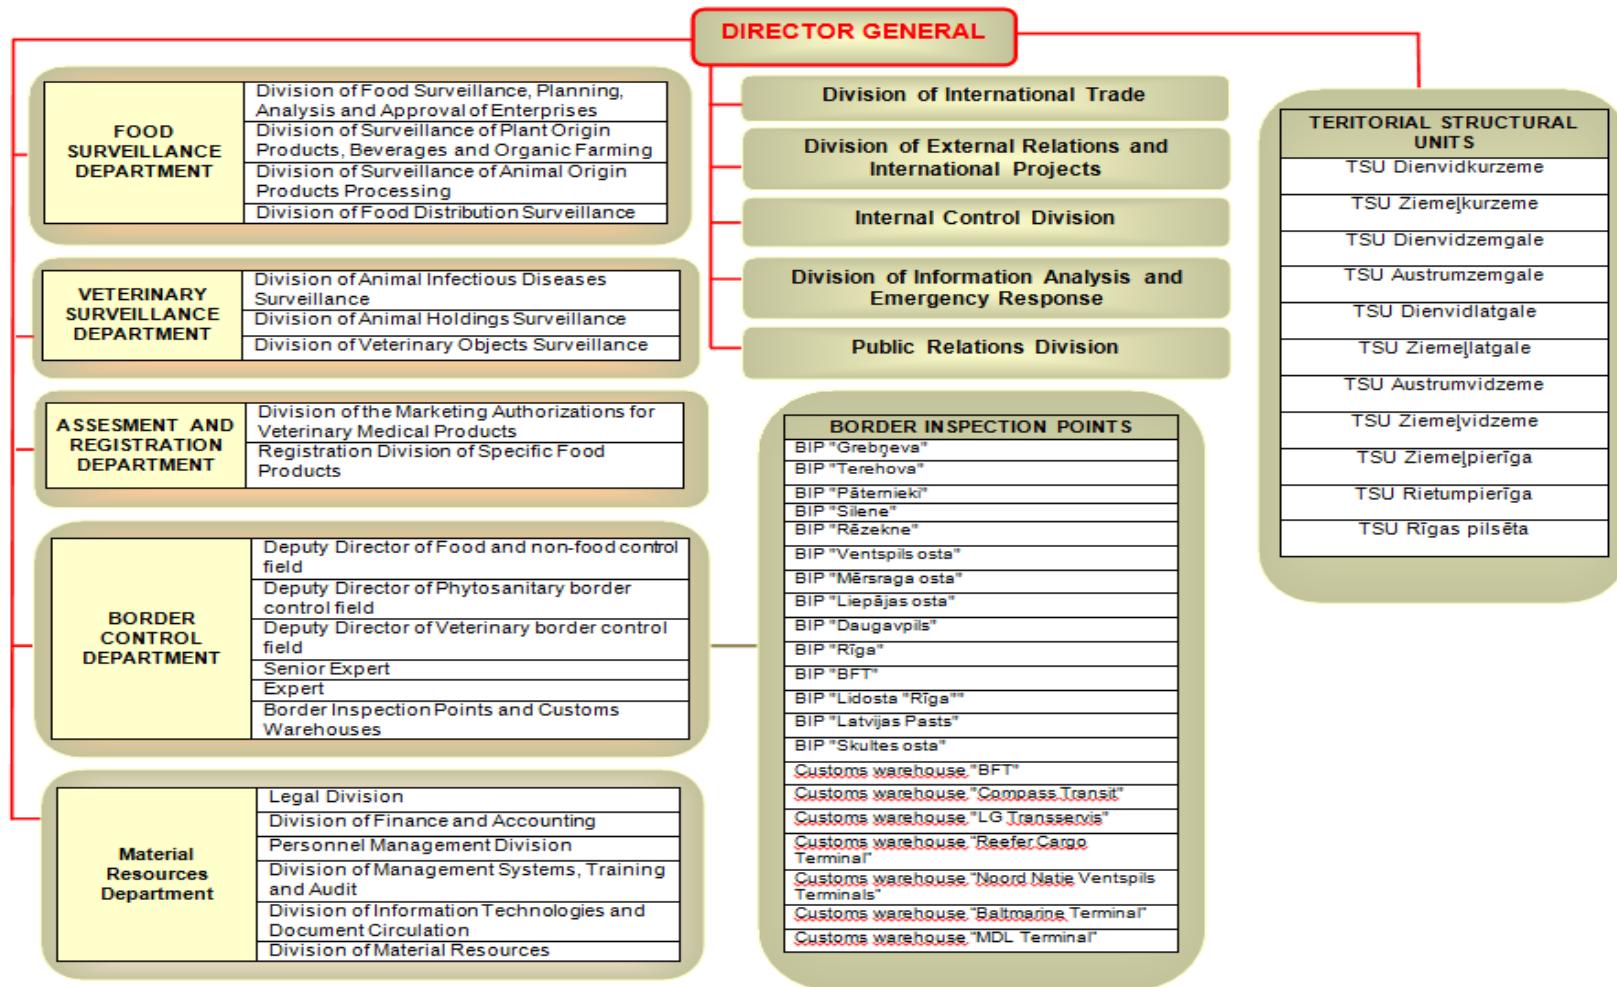

Official controls on imported products (2)

The vast majority of other products of relevance for the food chain is not channeled through specific border entities and **doesn't need to undergo mandatory checks** prior to their entry into the EU. It concerns for example feed and food which are of non-animal origin - including certain composite products, additives and other substances that might impact on the characteristics of food and feed, or materials intended to enter into contact with food.

One notable **exception** is **food and feed of non-animal** origin which is **temporarily subject to mandatory** border controls due to the existence of an identified risk (i.e. the products listed under Regulation (EC) No 669/2009).

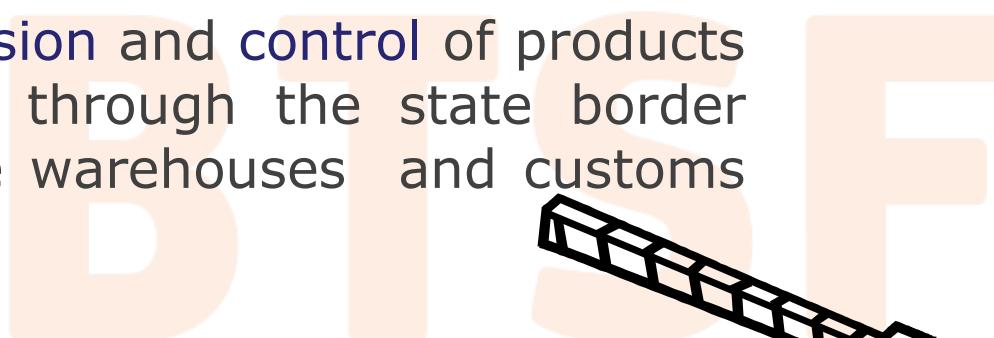

Structure of FVS

Basic Assignment of Border Control Department

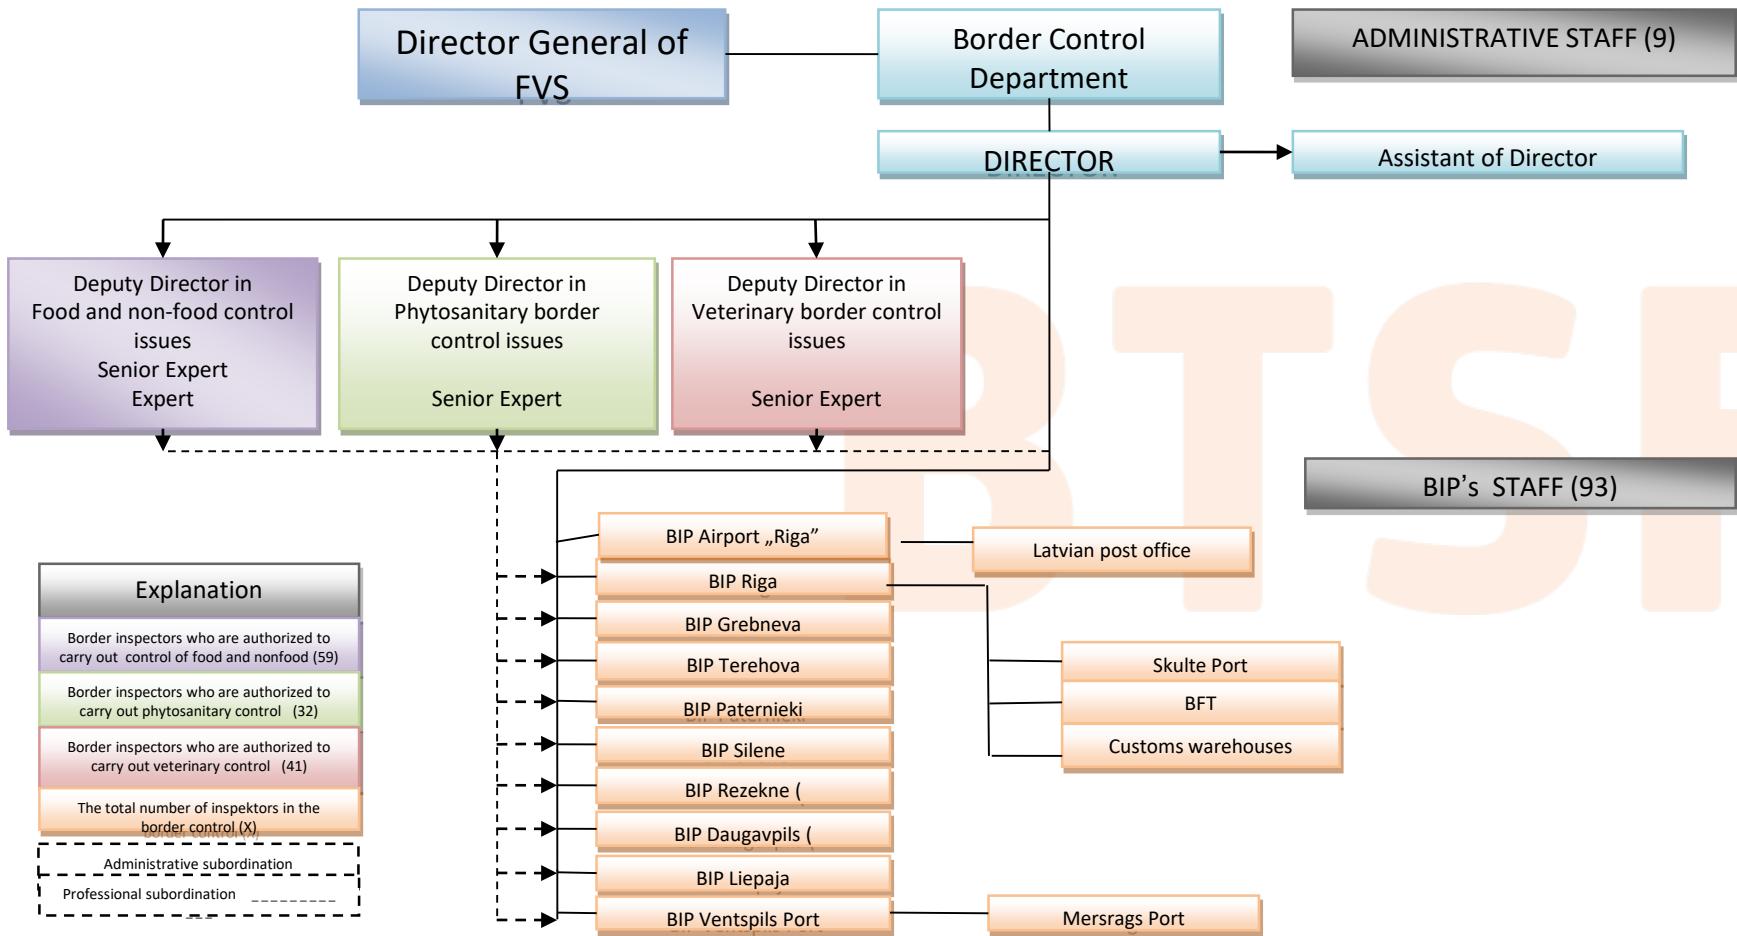

performs supervision and control of products and goods import through the state border control points, free warehouses and customs warehouses

controls import, export and transit of products and animals subordinated to the border control preventing from distribution of products and diseases hazardous for consumer health and life as well as for environment

Structure of BCD

European
Commission

FVS Border Control Points

- Veterinary control (products), - veterinary control (live animals),
- phytosanitary control,
- DPE and food safety control

Control facilities, equipment- comply with high EU standards

System in place

The BCD performs controls on:

live animals and animal origin products (**CD 2007/275 EC**)

plants and plant products (Council **Directive 2002/29/EC Annex V**)

food and feed (**Regulations (EC) No 669/2009; 884/2014**)

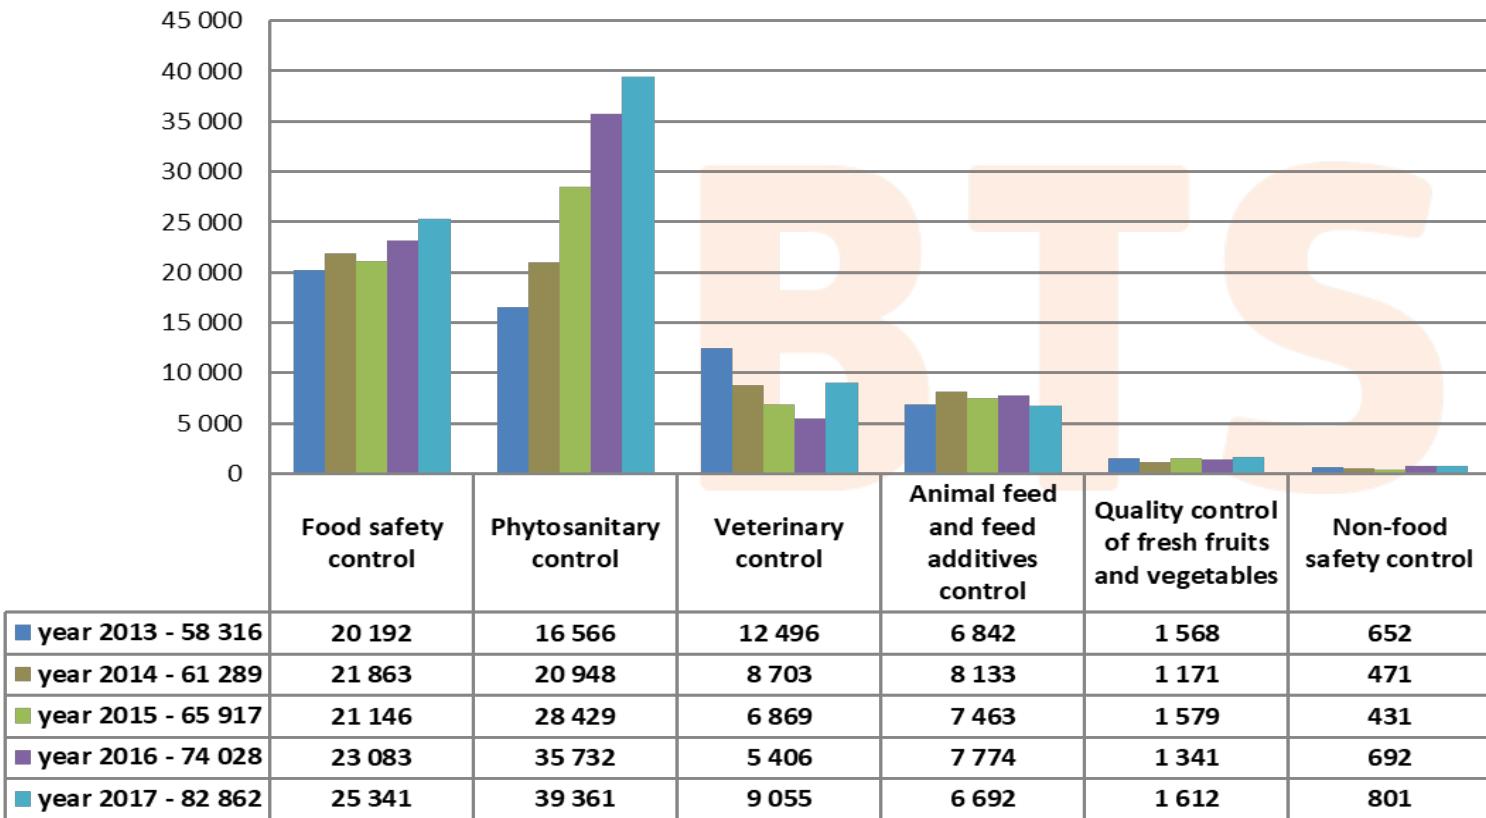

food and materials and products intended to be in contact with food products (**Regulation (EC) No 882/2004; 765/2008; 1935/2004**)

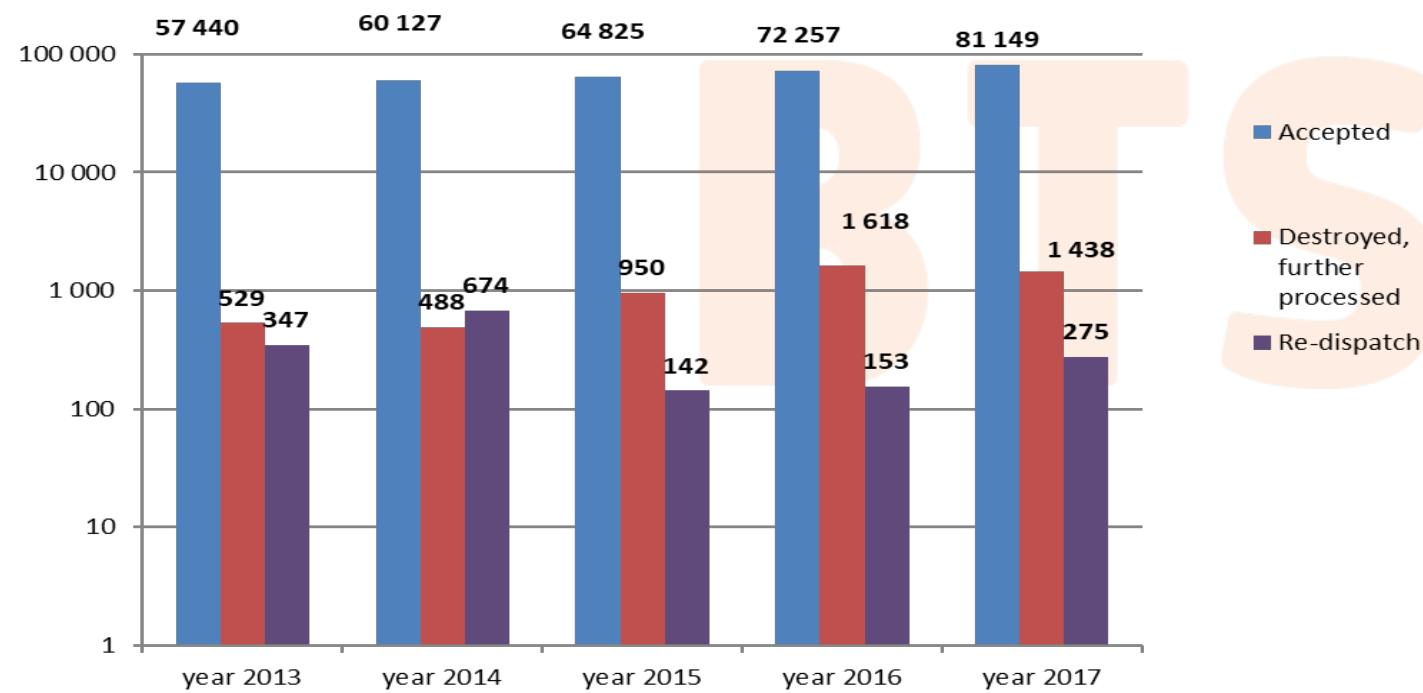

medicines for human and veterinary drugs (**Regulation (EC) No 765/2008; Directive 2001/82/EC**)

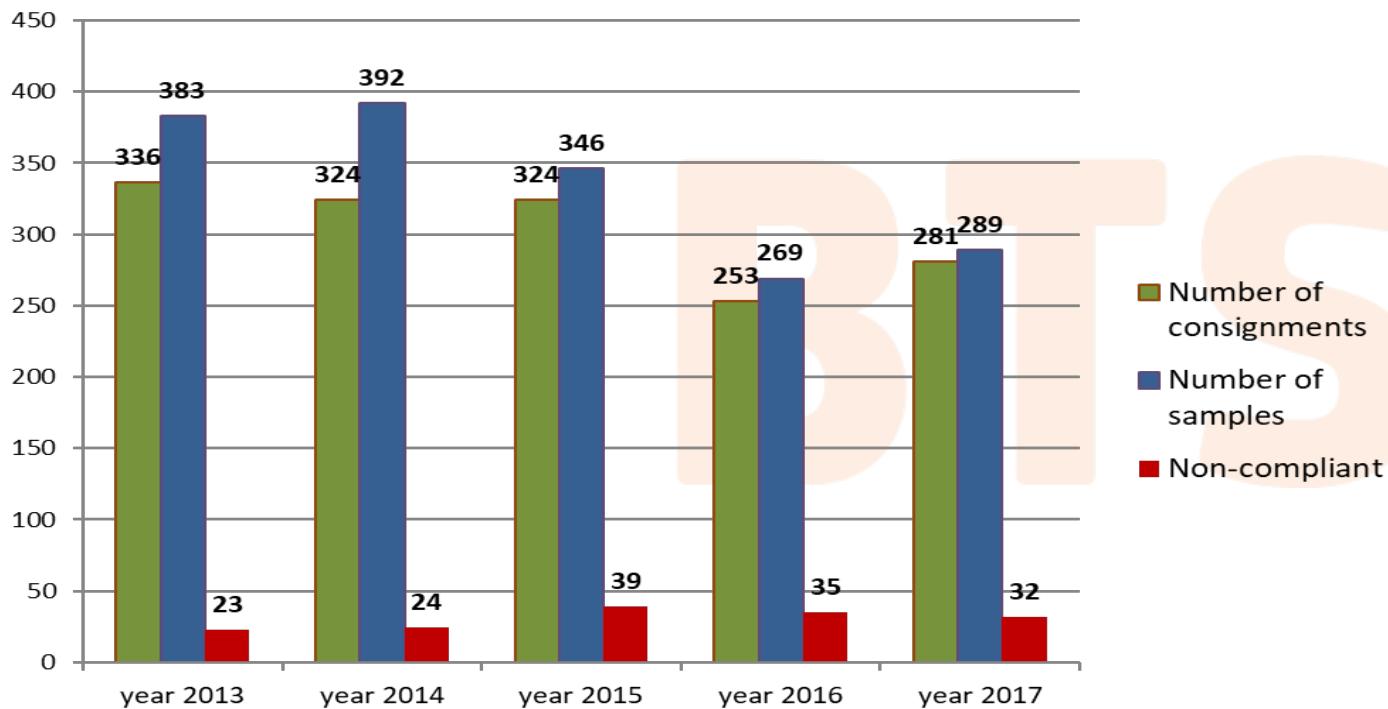

Breakdown by type of controls at FVS BIP's Years 2013-2017

Comparison of accepted and rejected consignments

Laboratory-tested consignments

Data entry in TRACES by decision of border control inspectors

From 10.12.2015.
phytosanitary field

TRACES

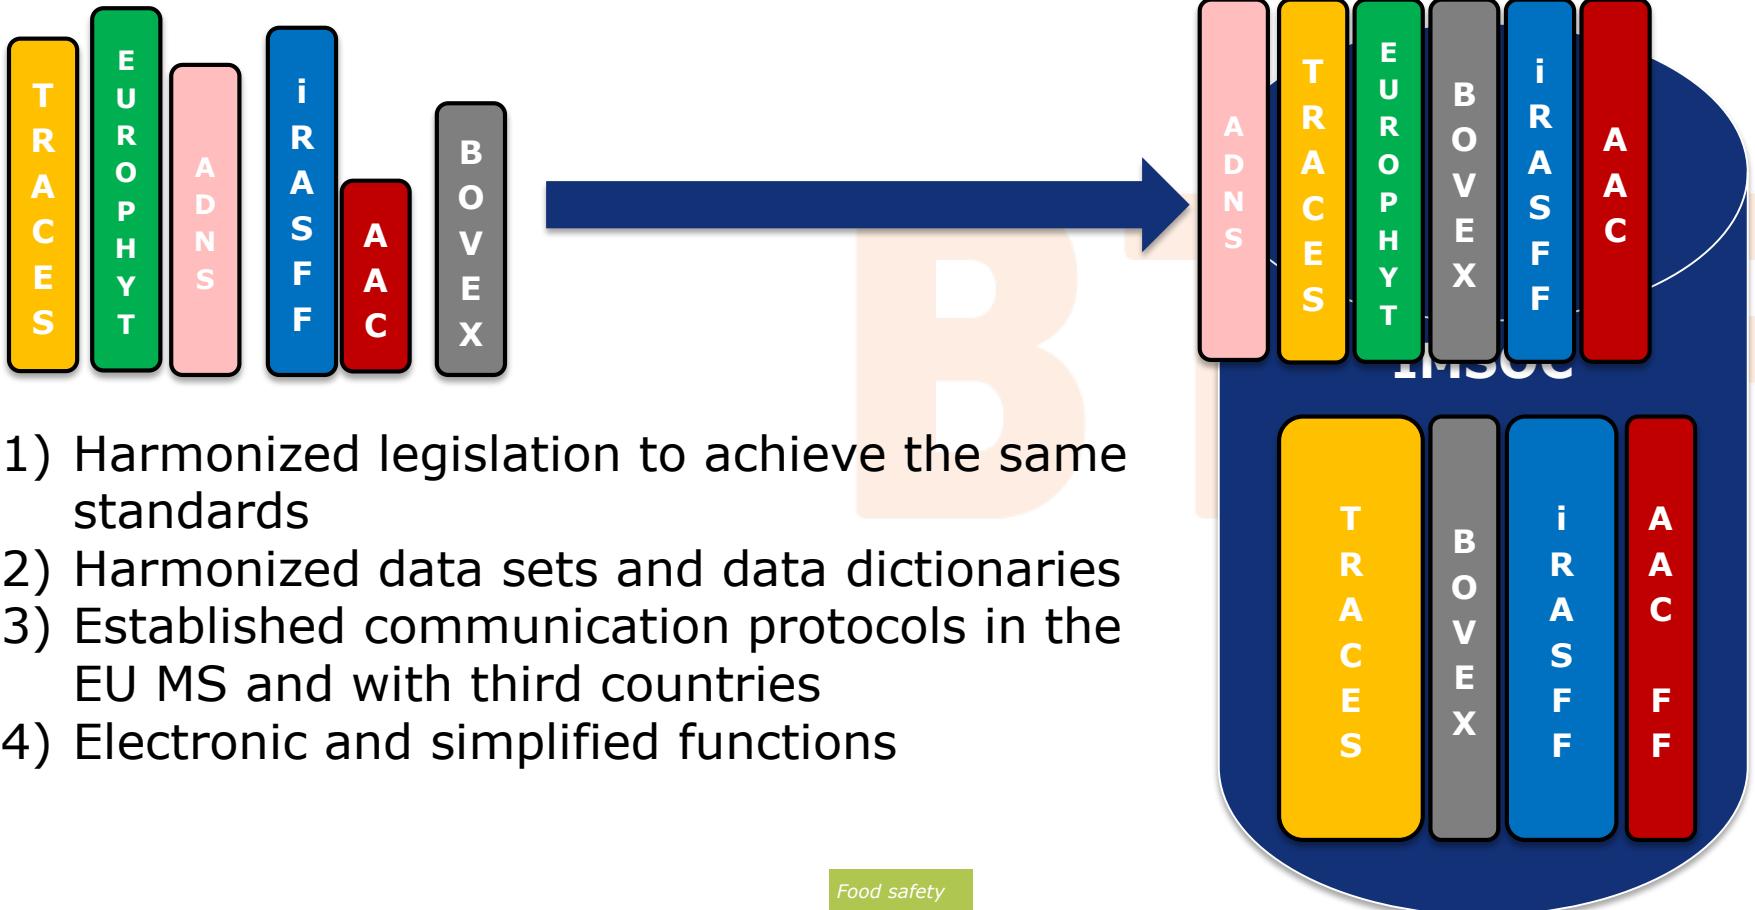

From 01.05.2004.
veterinary field

From 01.06.2014.
food field

Within the framework of the pilot project Speed 2 of the European Commission from 20.09.2015 TRACES is linked to the Electronic Customs Data Processing System (EMDAS)

How to: IMSOC Step by Step

Inspector should be checked that the live animals /products:

- come from a third **country** or a part of a third country that appears on a **Community list**,
- come from an **establishment** that appears on **a list**,
- carry a **health or identification mark**,
- are accompanied by a **certificate** issued by the representative of the competent authority of the third country,
- comply with the **animal health requirements of Directive 2002/99/EC**

Live animal movement from non-EU countries

REUTERS/Scanpix

The movement of live animals is strictly regulated by **Commission Regulation (EU) No 206/2010** laying down lists of third countries, territories or parts thereof authorized for the introduction into the European Union of certain animals and fresh meat and the veterinary certification requirements.

Prevention of ASF introduction - practical approach

1) Verification on the enforcement activities on personal luggage checks against the requirements of (EC) No 206/2009 on POAO in personal luggage

Two level (CCA and BIP level) verification system with defined criteria on personal luggage checks enforcement implemented since year 2005 by regular border crossing points inspections

2) Common extraordinary actions on border crossing points together with customs within the framework of cooperation agreement between FVS and Customs Board

Verification on the enforcement activities on personal luggage checks

BCD performs two level (CCA and BIP level) verification on personal luggage checks enforcement since year 2005 by regular border crossing points surveillance.

Surveillance criteria:

Organization of illegal import checks

Training – by whom, when, number of trained staff

Instructions available/updated

Information to public- posters, leaflets available and updated

Commission Implementing Decision 2013/426/EU

The controls on empty livestock vehicles are required by Decision 2013/426/EU are carried out by FVS staff at the road BIPs.

The enforcement of **100%** documentary and physical checks for returning livestock vehicles from **Belarus, Ukraine, Moldova, Russia** by verifying details in the declaration and vehicle conformity with the rules, notably cleanliness and disinfection

the most important of which being the need to verify that the disinfectants used and the concentrations thereof are appropriate for the African Swine Fever virus.

Commission

MODEL DECLARATION TO BE PROVIDED BY THE OPERATOR/DRIVER OF THE LIVESTOCK VEHICLE ENTERING THE UNION FROM THIRD COUNTRIES OR PARTS OF THE TERRITORY OF THIRD COUNTRIES WHERE THE PRESENCE OF AFRICAN SWINE FEVER IS CONFIRMED

I, the operator/driver of the livestock vehicle (insert number of registration plate) declare that:

— the most recent unloading of animals and feed took place at:

Country, region, place	Date (dd.mm.yy)	Time (hh:mm)

— following unloading, the livestock vehicle was subject to cleansing and disinfection. The cleansing and disinfection included the livestock or loading compartment, [the truck body] (delete if not applicable), the loading ramp, the equipment having been in contact with animals, the wheels and the driver's cabin and protective clothes/boots used during unloading.

The cleansing and disinfection took place:

Country, region, place	Date (dd.mm.yy)	Time (hh:mm)

— the disinfectant has been used at the concentrations recommended by the manufacturer (to indicate the substance and its concentration):

— the next loading of animals will take place at:

Country, region, place	Date (dd.mm.yy)	Time (hh:mm)

Date	Place	Signature of the operator/driver
------	-------	----------------------------------

Name of operator/driver of the livestock vehicle and its business address (in block letters)

Declaration

Deklarācija

Es, mājlopu transportlīdzekļa / I, the operator/driver of the livestock vehicle (insert number of registration plate) declare that:

(norādīt transportlīdzekļa reģistrācijas numuru/insert number of registration plate) operators/vadītājs, deklarēju, ka / declare that:

1. Dzīvnieku pēdējā izkraušana notikusi / the most recent unloading of animals took place at:

Valsts, reģions, vieta Country, region, place	Datums (dd.mm.gg) Date (dd.mm.yy)	Laiks (hh:mm) Time (hh:mm)
Rosja Pichaeckis, Šķērģēķi	08.11.2015	09:40

Pēc izkraušanas mājdzīvnieku transportlīdzeklis ir iztirits un dezinficēts. Iztirīts un dezinficēts mājdzīvnieku vai kravas nodalījums, [kravas transportlīdzekļa virsbūve] (ja navajā, svītroj, iekraušanas rampa, iekārtas, kas bijusi saskarē ar dzīvniekiem, ritepi un vadītāja kabīnē, kā arī izkraušanas laikā izmantošais aizsargātārs/pavadi). /Following unloading, the livestock vehicle was subject to cleansing and disinfection. The cleansing and disinfection included the livestock or loading compartment, [the truck body] (delete if not applicable), the loading ramp, the equipment having been in contact with animals, the wheels and the driver's cabin and protective clothes/boots used during unloading.

2. Tiršana un dezinficēšana notikusi / The cleansing and disinfection took place:

Valsts, reģions, vieta Country, region, place	Datums (dd.mm.gg) Date (dd.mm.yy)	Laiks (hh:mm) Time (hh:mm)
Rosja Pichaeckis, Šķērģēķi	08.11.2015	12:00

3. Dezinfekcijas līdzeklis lietots ražotāja koncentrācijā (norādīt vielu un koncentrāciju) /the disinfectant has been used at the concentrations recommended by the manufacturer (to indicate the substance and its concentration) :

Valsts, reģions, vieta Country, region, place	Datums (dd.mm.gg) Date (dd.mm.yy)	Laiks (hh:mm) Time (hh:mm)
Estonia Sõru	10.11.2015	12:00

4. Nākamā dzīvnieku iekraušana notiks/the next loading of animals will take place at:

Datums (dd.mm.gg) Date (dd.mm.yy)	Viesta Place	Operatora/vadītāja paraksts Signature of the operator/driver
08.11.2015	Grebēne	Uzvarēta līgumā

Mājlopu transportlīdzekļa operatora/vadītāja vārds, uzvārds un adrese (lielajiem burtiem) / Name of operator/driver of the livestock vehicle and its business address (in block letters): UZVARĒTA LĪGUMĀ GRESBĒNE, 14. M. K.
