

Eradication: Final report for Salmonella 2018

For each approved annual or multi-annual programme Member States shall submit to the Commission by the 30 April each year an annual detailed technical and financial report covering the previous year. That report shall include the results achieved and a detailed account of eligible costs incurred (Art 14 of Regulation (EU) No 652/2014).

This form is for information only, no submission possible.

Reporting period

From: 2018

To: 2020

Year of implementation: 2018

1. Technical implementation of the programme

1.1 Description and evaluation of the evolution of the epidemiological situation, the technical implementation of the activities foreseen under the programme and the cost-effectiveness of the programme.

The EU targets of the infection rate were achieved in all production types in 2012. In the next years only in two cases were the infection rate higher, than the EU targets: in 2013 in breeding flocks of G.Gallus (1,1 %) and in 2016 in laying flocks of G.Gallus (2,48 %). In 2018 the EU targets were achieved in all production types again.

1.2 Details on the level of achievement of the targets set in the approved programme and technical difficulties.

Breeding flocks of G.Gallus:

7 adult (4 ST, 1 SI, 2 SE) flocks were infected and 6 were eradicated. Only the flock infected with SI was not eradicated.

4 flocks were compensated, and 2 will be compensated in 2019.

Laying flocks of G.Gallus:

15 adult (10 SE, 5 ST) and 2 day-old (ST) flocks were infected and 16 flocks were eradicated (included day-old flocks). 2 adults (1SE, 1 ST) will be eradicated in 2019 and 1 eradication came from 2017.

11 flocks were compensated (included 1 compensation came from 2017)

10 flocks of 15 adult infected flocks were small flocks with less than 1000 animals.

Broiler flocks of G.Gallus:
6 flocks were infected and eradicated (3SE, 2 ST, 1 mST)

Breeding flocks of turkeys:
2 flocks (on 1 farm) were infected (2 SE), eradicated and compensated in 2018.

Fattening flocks of turkeys:
1 flock was infected and eradicated (ST)

1.3 Epidemiological maps for infection and other relevant data on the disease/activities (information on serotypes involved,...) (Please attach files of data using the PDF attachment feature) Use the textbox below to provide clarifications for the maps you attach, if needed.

Not relevant.
