AI)

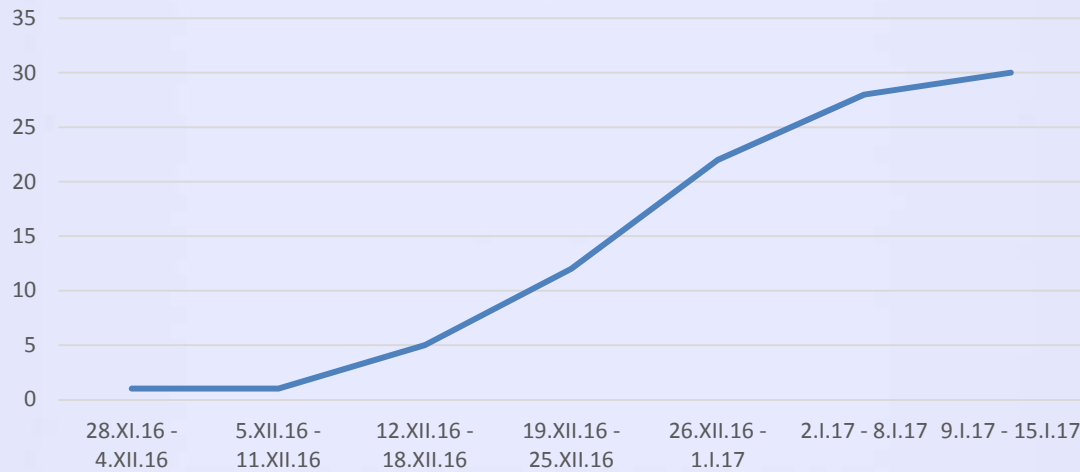

Epidemiological situation Summary

no. of outbreaks

no. of outbreaks (cumulative)

Epidemiological situation

Measures

Implemented measures:

- Measures for combating AI (stamping out, disinfection movement restrictions, etc.) in accordance with Directive 2005/94/EC
- Preventive culling of birds in protection areas (3 km) established around outbreaks (this option is used for the vast majority of outbreaks)
- Additional regulation (applicable to entire territory of PL) of Minister for Agriculture and Rural Development – biosecurity and preventive measures for all holdings
- Cooperation with other authorities (help with proper staffing for certain activities, e.g. collection of manure)
- Awareness campaigns (farmers, hunters)
- Risk assessment (contact person in the NVRI [National rellab for AI]: Krzysztof Śmietanka PhD, ScD [ksmiet@piwet.pulawy.pl])
