

In accordance with articles 13, 17 and 24 of Commission Delegated Regulation (EU) 2020/688, Luxembourg will allow the entry of bovine animals, caprine animals, ovine animals and kept camelid animals according to the following conditions (as provided for in point 6 and 7 of Section 1 of Chapter 2 of Part II of Annex V to Regulation (EU) 2020/689) from the **15th of January 2024**:

1. Animals under 70 days of age

The animals come from mothers vaccinated prior to service against all BTV serotypes detected during the last two years in the Member State or zone of origin.

Or

The animals are protected against vectors (Culicoides) by insecticides or repellents for at least 14 days preceding the date of movement; and have been subjected to a PCR test for all blue tongue serotypes (1-24) reported in the Member State or zone of origin during the previous 2 years with negative results taken at least 14 days after the onset of the protection against vectors

2. Animals over 70 days of age

The animals are vaccinated against all BTV serotypes detected during the last two years in Member State or zone of origin.

Animals can only be moved at least 30 days after the first and single injection (if the vaccine used requires a single injection); or after 10 days after the 2nd injection (if the vaccine used requires 2 injections)

or

The animals are protected against vectors (Culicoides) by insecticides or repellents for at least 14 days preceding the date of movement; and have been subjected to a PCR test for all blue tongue serotypes (1-24) reported in the Member State or zone of origin during the previous 2 years with negative results taken at least 14 days after the onset of the protection against vectors
