

Oilseed rape MS8, RF3, MS8 × RF3

Organisation: The European GMO-free Citizens (De Gentechvrije Burgers)

Country: The Netherlands

Type: Others...

Comments:

We – the European GMO-Free Citizens and the Ekopark Foundation in Lelystad (the Netherlands) – do not wish to eat this genetically modified oilseed rape. We want to eat unsprayed food that has not been genetically manipulated. This is also better for the environment. Nor do we want genetically modified oilseed rape as animal feed. And we do not want you to put it back on the EU market. If you were to approve it (which we would regret), we would want every product and every end product to be labelled as a GMO, even if GMOs can no longer be detected in an end product. See all our comments on GM oilseed rape of an earlier date.
