**A.01 Wild grapevine (*Vitis vinifera* L. subsp. *sylvestris*) conservation in European countries.**

Some delegates emphasised the importance of maintaining wild grapevine. According to a delegate wild grapevine should be notified to the common catalogue of varieties.

**A.02 Exchange of views on the application of the semantic approach to the Common catalogue of varieties of *Vitis vinifera* L.**

A delegate noted the need to update the structure of the existing Common catalogue.

**A.03 Application of the concept of officially recognised description to vine varieties.**

All vine varieties in the common catalogue have in general an official description. A delegate communicated that they would like to register vine varieties with an officially recognised description. The current legislation on vine propagating material does not foresee this possibility.
