

Highly pathogenic avian influenza in Germany

Current Situation

SCoPAFF-meeting on 15.12.2021

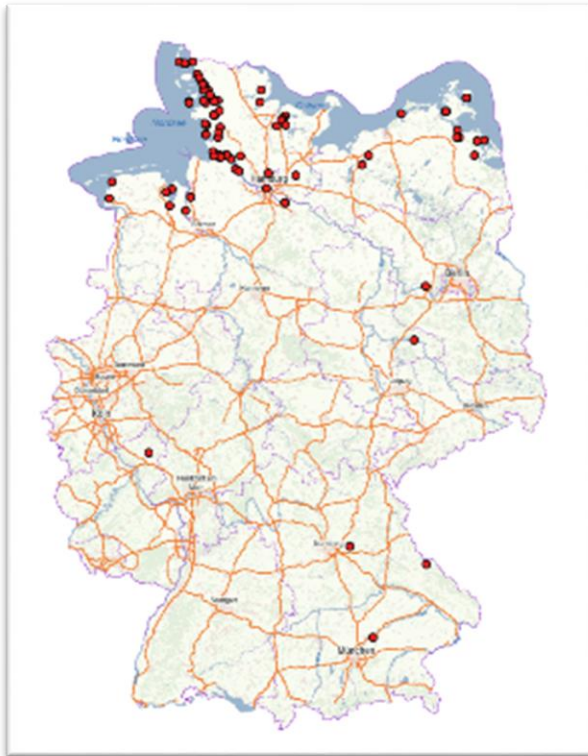

Content

Current situation in:

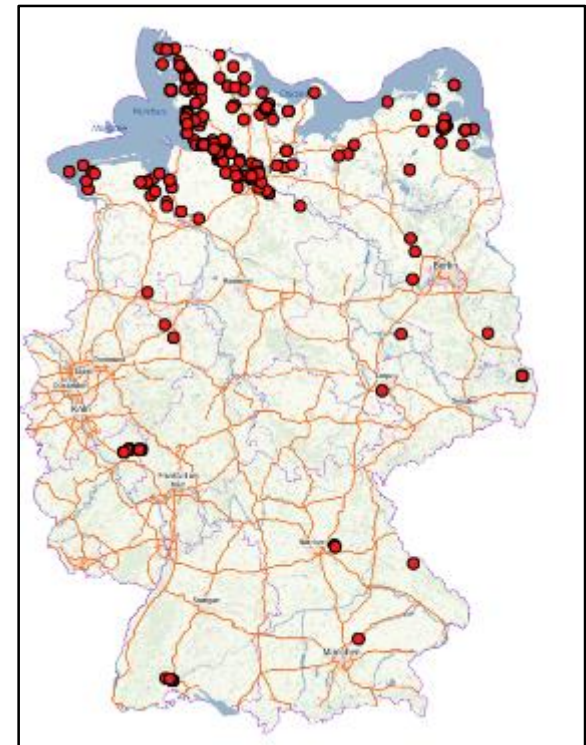

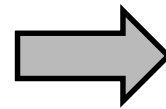

1. Wild birds
- ~~2. Captive birds~~
3. Poultry
4. LowPAI
5. Summary

Situation in wild birds

- **327** cases confirmed from 15/10/2021 up to 14/12/2021
- **Serotypes detected: H5N1**

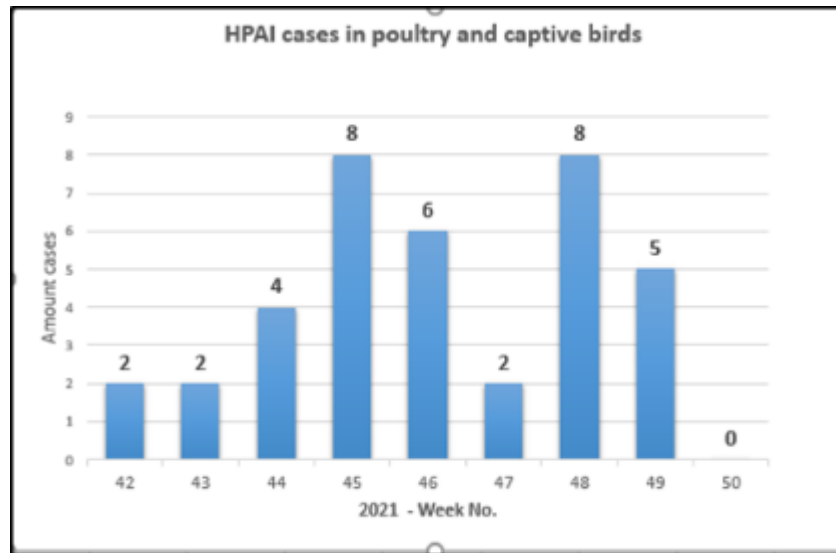

15/11/2021: **135** cases

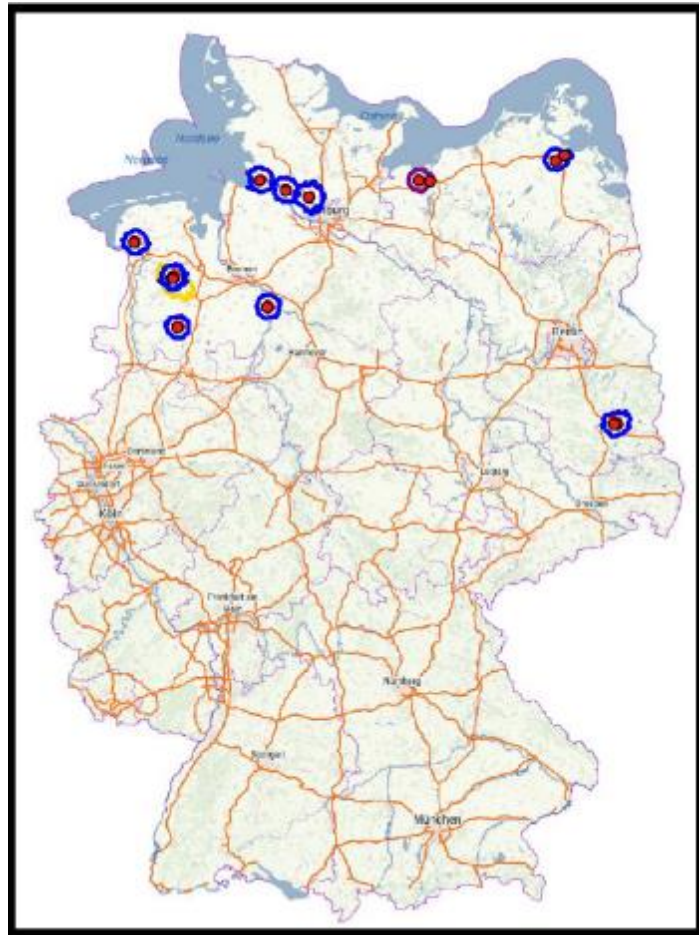

15/12/2021: **327** cases

Situation in poultry

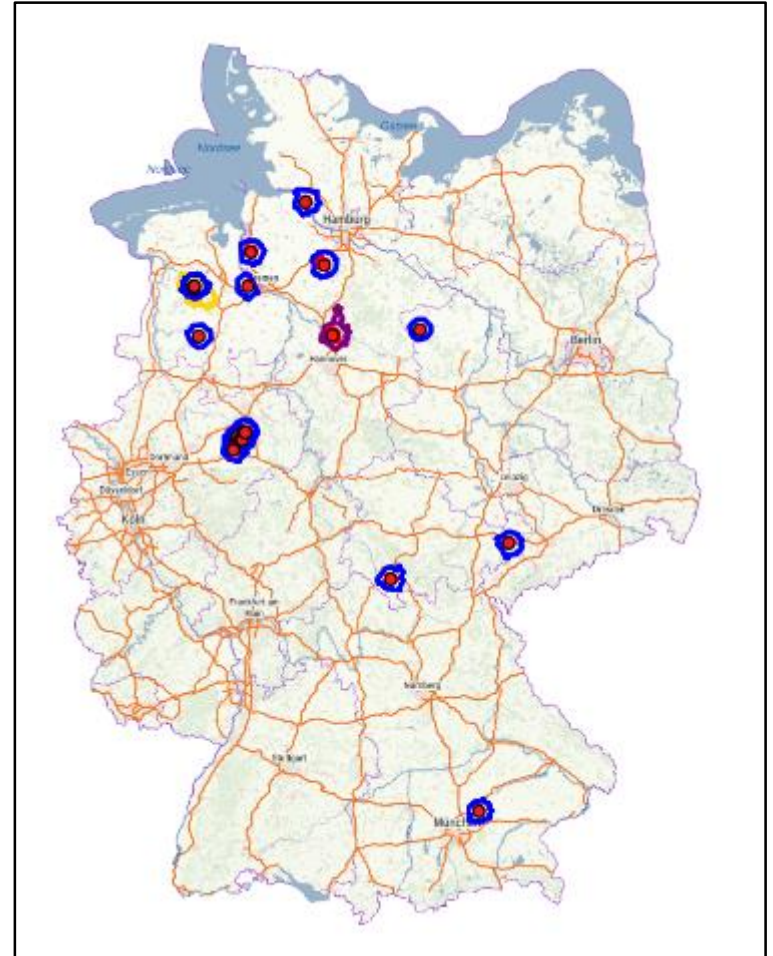

- **31 outbreaks** confirmed from 15.10.2021 up to 14/12/2021.
 - **22 still active**
 - **9 lifted**
- Serotypes detected: **H5N1**

Situation in poultry

Situation 15/11/2021

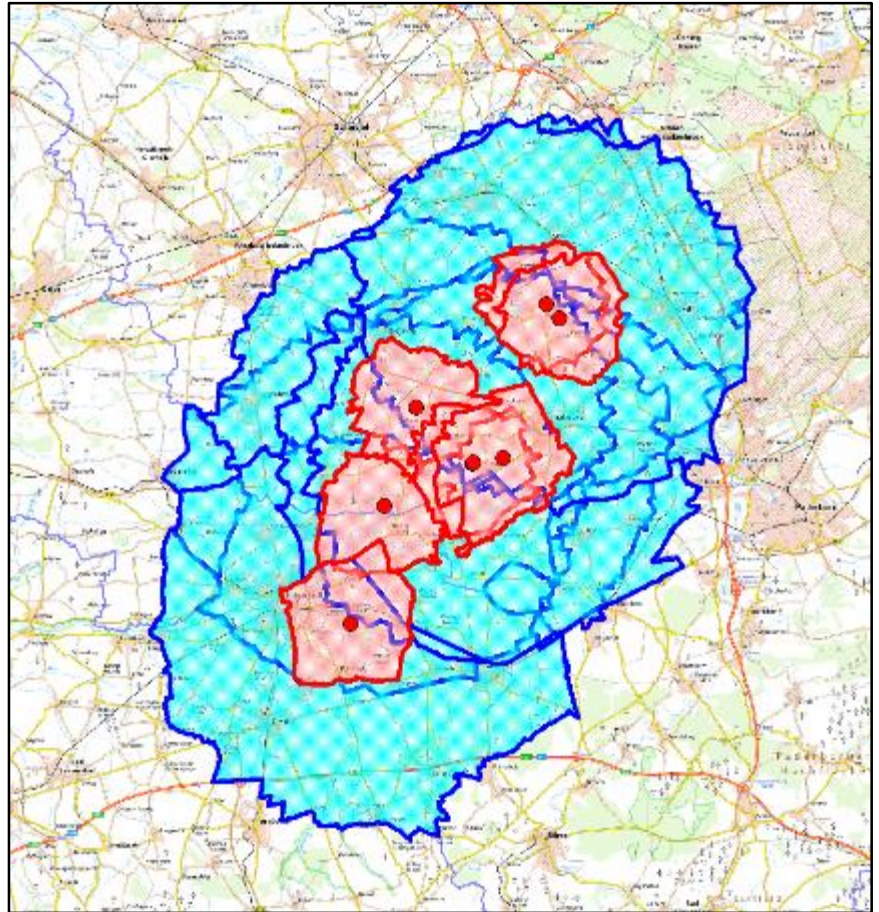

Situation 15/12/2021

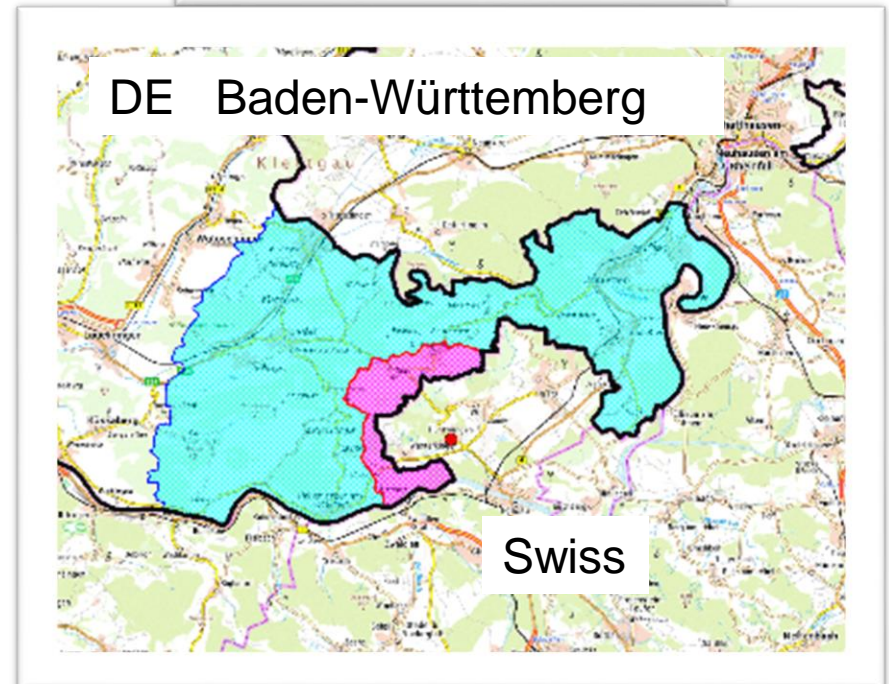

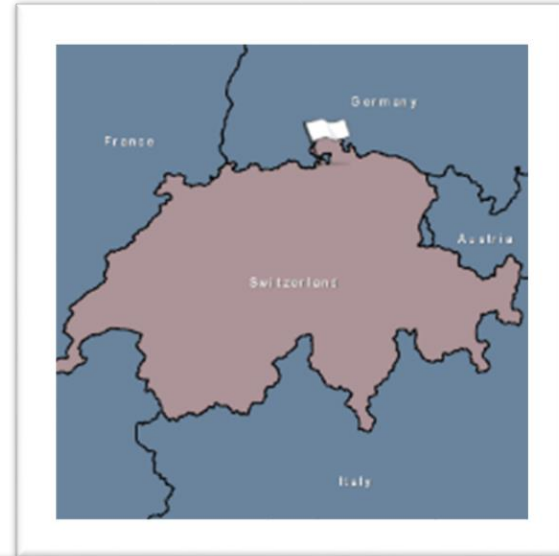

Small cluster in North Rhine-Westphalia

- 8 outbreaks in the district of Paderborn in North-Rhine Westphalia.
- No very high density of poultry
- Several establishments for breeding, fattening and trade are located there and have close business relations.
- Measures:
 - biosecurity also as regards staff,
 - restricted movement and trade in poultry and captive birds,
 - housing of poultry and captive birds in relevant regions.

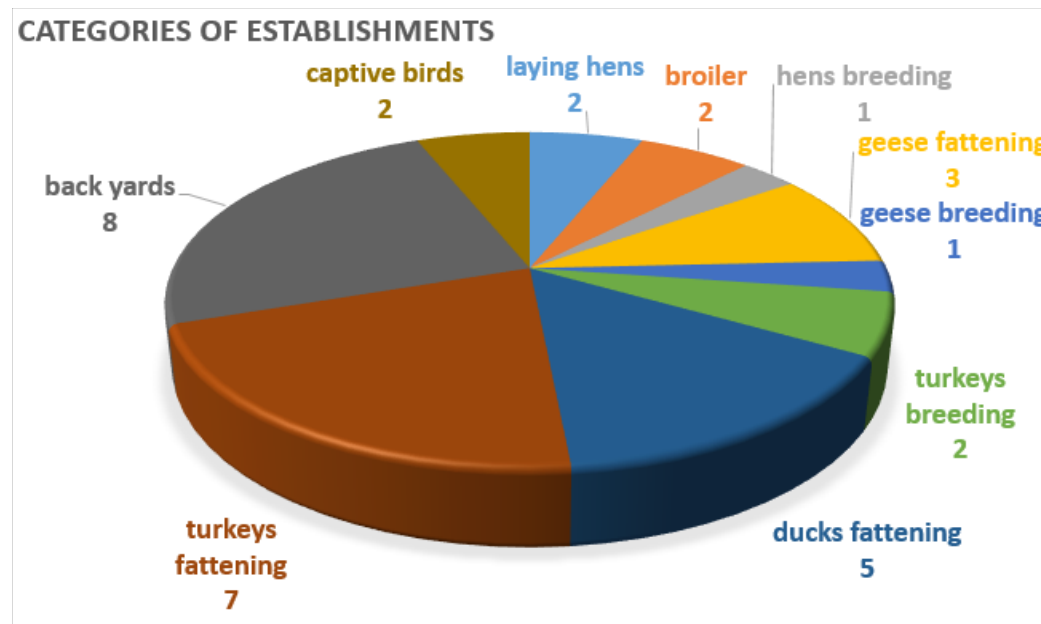

Outbreak in CH => RZ in Baden-Württemberg

- Outbreak in the Swiss on 23.11.2021
 - H5N1
 - Captive birds – 60 birds
 - Stamping out,
 - preliminary disinfection,
 - restricted zones
-
- Good communication and coordination between CH, DE, Baden-Württemberg on all administrative levels.
-
- Restricted zones will be lifted on both sides on 27.12.2021.

Categories of affected establishments

LowPAI

- Poultry:
 - Two outbreaks:
 - broiler - 1.692
 - geese for fattening - 902
 - Both H5N1
 - Slaughter/stamping out,
 - cleaning, disinfection.
-
- Wild birds:
 - one mallard H5N3,
 - one shelduck H5N?

Summary

1. The infection pressure posed by infected migratory wild birds is still high.
2. The awareness level is high.
3. The lessons learned from the last HPAI-events are applied.
4. The disease is still under control.
