

Eradication: Final report for Salmonella 2018

For each approved annual or multi-annual programme Member States shall submit to the Commission by the 30 April each year an annual detailed technical and financial report covering the previous year. That report shall include the results achieved and a detailed account of eligible costs incurred (Art 14 of Regulation (EU) No 652/2014).

This form is for information only, no submission possible.

Reporting period

From: 2018

To: 2018

Year of implementation: 2018

1. Technical implementation of the programme

1.1 Description and evaluation of the evolution of the epidemiological situation, the technical implementation of the activities foreseen under the programme and the cost-effectiveness of the programme.

The absolute claim is less high for breeding and layer flock because we had less flocks and infections than estimated. The number of breeding and layer flocks infected by a target serovar was within the target. Therefore we can state the programme is cost-effective.

1.2 Details on the level of achievement of the targets set in the approved programme and technical difficulties.

In the Netherlands there are no turkey breeding flocks, therefore no results for this group are reported. All other flock types performed again within the respective target thresholds. In line with 2017 the breeding Gallus gallus also performed within the threshold of 1% (= 0.0%). In 2017 the result was also 0.0%. Based on the achievements in 2018 derogation on breeders is continued in 2019. The layer Gallus gallus performed within the threshold of 2% with 0.68%. In line with the approved programme the target of official monitoring has been set: all (adult) flocks have been officially tested, except for the flocks of a few holdings that were blocked due to use of fipronil.

1.3 Epidemiological maps for infection and other relevant data on the disease/activities (information on serotypes involved,...) (Please attach files of data using the PDF attachment feature) Use the textbox below to provide clarifications for the maps you attach, if needed.

In case any specific information is needed, we can provide it on request.

2. Tables for Salmonella monitoring outcome of the year
