ASF - Situation in wild boar

ASF – last positive case

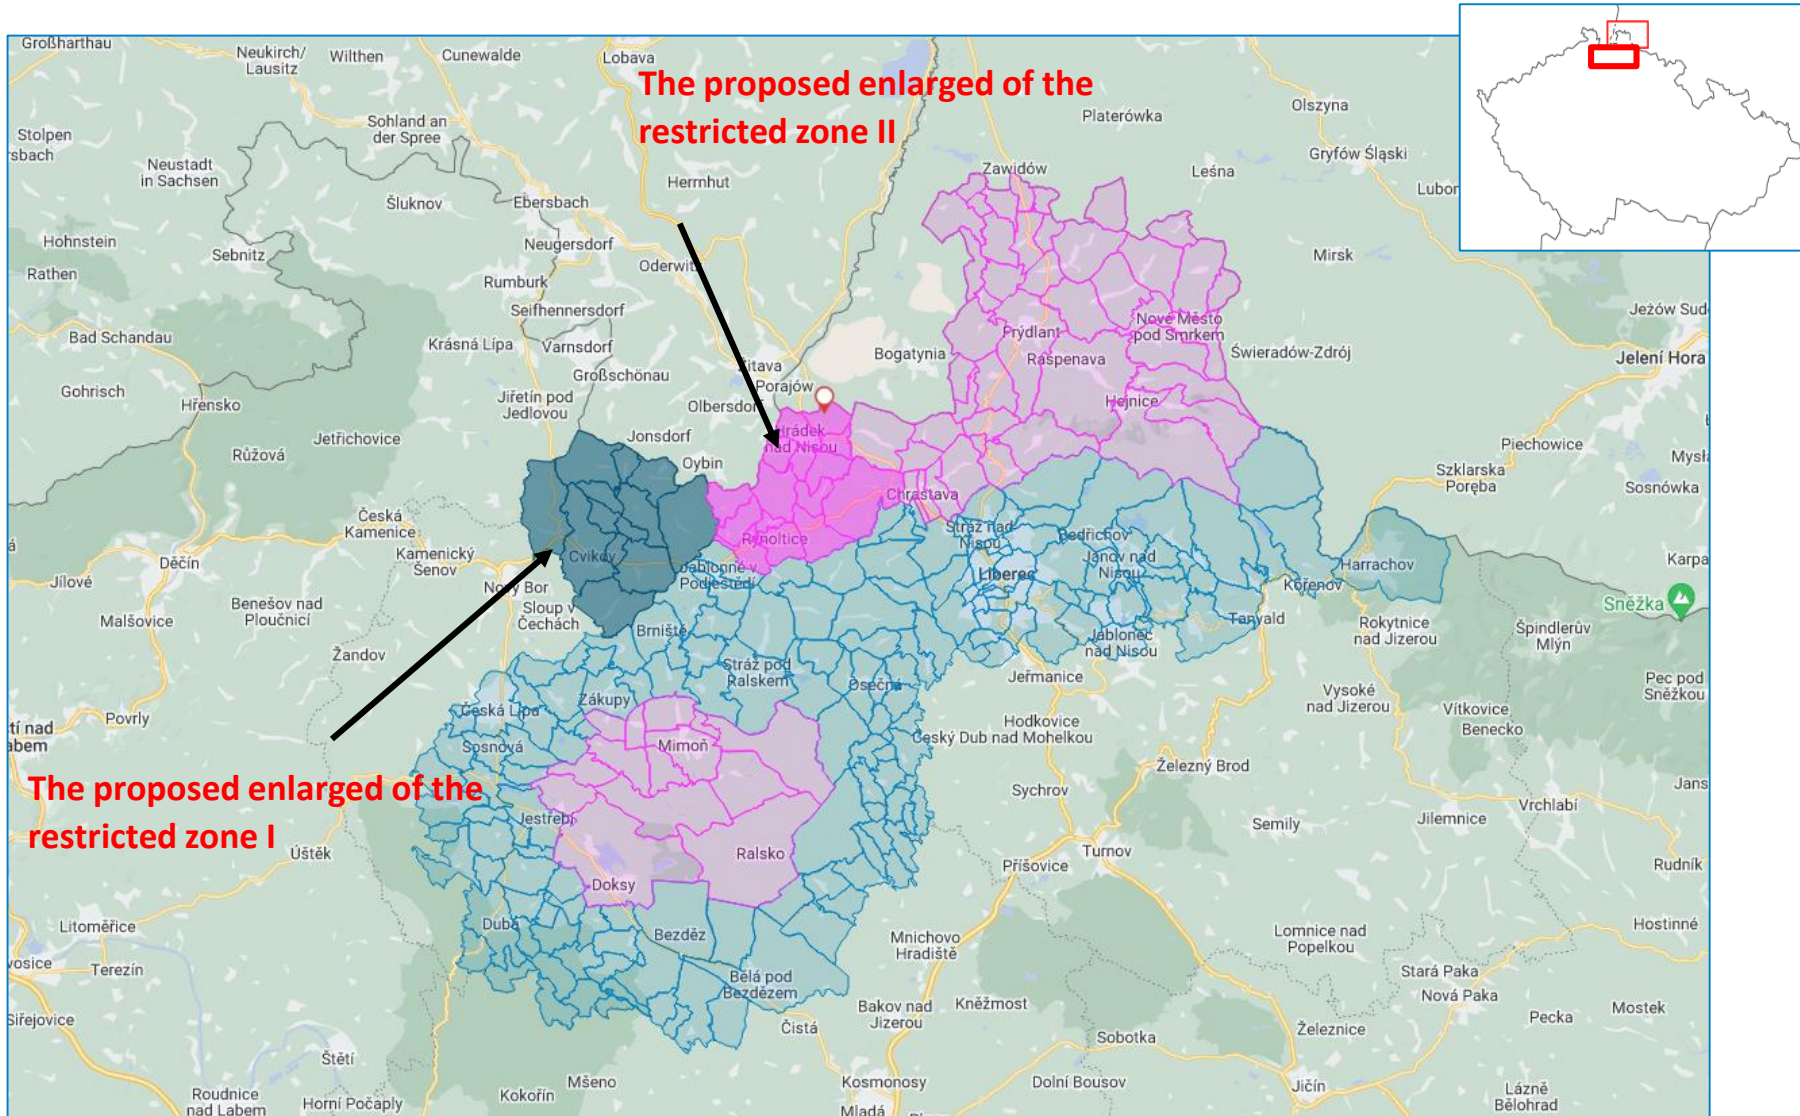

Pathological morphological finding – hunted WB from 15.4.2024 in Oldřichov na Hranicích.

In the area, where a positive wild boar was shot over the weekend, hunters found dead wild boar - we are waiting for the results of the examination for the ASF.

Restricted zone I and II update proposal - enlargement

Restricted zone I and II update proposal enlargement – surveillance of wild boars

- in 2023 - **7** found dead wild boars were tested in the laboratory with negative results of the ASF,
- in 2024 **two** found dead were tested - one with negative result of the ASF and one waiting for the result,
- in 2023, a total of **243** wild boars were tested, all with a negative results
- in 2024, **126** wild boars were tested so far, **one of them with a positive result.**

- Part of the area is currently in the restricted zone I, the following measures apply to this area:
 - wild boar hunting is authorized, but solely by trained hunters adhering to specified biosecurity rules,
 - all hunted wild boars must be tested for the ASF,
 - active search of wild boar carcasses is ordered
finder reward in the ASF RZ I is 2 000, - CZK/carcass,
 - each wild boar found dead must be tested for the ASF,
 - store the whole body of a wild boar intended for human consumption in a suitable place,
 - determination of conditions for handling products of animal origin obtained from wild boars hunted in the RZ I.
