

Disease listing and categorisation process

Disease listing and categorisation process

The AHL:

- **lists five most significant diseases (FMD, CSF, ASF, HPAI, AHS)**
- **sets out a list of diseases in Annex II which corresponds to the list of diseases annexed to the financial regulation.**

➔ *For those animal diseases listed, different prevention and control rules set out in the AHL apply (categorisation)*

Disease listing and categorisation process

The AHL allows reviewing the listed of diseases by a delegated act:

The following parameters have to be assessed (AHL, Art 7):

- disease profile,*
- the impact of the disease,*
- its potential to generate a crisis situation*
- the prevention and control measures available*
- the impact of disease prevention and control measures*

Disease listing and categorisation process

COM assessment is being carried out
