Eradication: Final report for Salmonella 2019

For each approved annual or multi-annual programme Member States shall submit to the Commission by the 30 April each year an annual detailed technical and financial report covering the previous year. That report shall include the results achieved and a detailed account of eligible costs incurred (Art 14 of Regulation (EU) No 652/2014).

This form is for information only, no submission possible.

Reporting period

From: 2019 To: 2019 Year of implementation: 2019

1. Technical implementation of the programme

1.1 Description and evaluation of the evolution of the epidemiological situation, the technical implementation of the activities foreseen under the programme and the cost-effectiveness of the programme.

The EU targets of the infection rate were achieved in all production types in 2012. In the next years only in two cases were the infection rate higher, than the EU targets: in 2013 in breeding flocks of G.Gallus (1,1%) and in 2016 in laying flocks of G. Gallus (2,48%). In 2019 the EU targets were achieved in all production types again.

1.2 Details on the level of achievement of the targets set in the approved programme and technical difficulties.

Breeding flocks of G.Gallus:

1 adult flocks were infected (SE) and was eradicated. The flock was compensated. 2 flocks were compensated in 2019 (see last year report) where the infection were established in 2018.

Laving flocks of G. Gallus:

18 adult flocks (15 SE, 3 ST) and 2 day-old flocks (both ST) were infected. 20 flocks (including day-old flocks) were eradicated. 4 flocks will be compensated in 2020.

16 flocks were compensated.

9 flocks of 18 adult infected flocks were small flocks with less than 1000 animals.

14 flocks were infected and eradicated (3 SE, 11 ST).

Breeding flocks of turkeys:

1 flock was infected (SE), eradicated and compensated in 2019.

Fattening flocks of turkeys:

There was no infection in fattening flocks of turkeys in 2019.

1.3 Epidemiological maps for infection and other relevant data on the disease/activities (information on serotypes involved,...) (Please attach files of data using the PDF attachement feature) Use the textbox below to provide clarifications for the maps you attach, if needed.

Not relevant.

2. Tables for Salmonella monitoring outcome of the year
