GUIDELINES ON STAMP USAGE

Size of stamps: 60 mm x 35 mm

Conventional symbols used during the production of stamps of phytosanitary quarantine control (supervision):

In the upper right corner there is the region code and the three-digit code of the border point for plant quarantine (phytosanitary control post) which is located under the region code.

In the upper left corner: any of the conventional symbols denoting the Customs Union member states - BY, KZ, RU.

Stamp 1 "Import permitted, subject to phytosanitary quarantine control (supervision) at the delivery point" is put at the points of entry through the Customs Union customs border on the phytosanitary certificate and transport (carriage) document if, following the phytosanitary quarantine control (supervision), the decision is made to permit the import of the quarantined products batch.

Stamp 2 "Import prohibited" is put at the points of entry through the Customs Union customs border on the phytosanitary certificate and transport (carriage) document if, following the phytosanitary quarantine control (supervision), the decision is made to prohibit the import of the quarantined products batch.

Stamp 3 "Transit permitted" is put at the points of entry through the Customs Union customs border on the phytosanitary certificate and transport (carriage) document if, following the phytosanitary quarantine control (supervision) of the quarantined products, the decision is made to permit the transit thereof.

Stamp 4 "Transit prohibited" is put at the points of entry through the Customs Union customs border on the phytosanitary certificate and transport (carriage) document if, following the phytosanitary quarantine control (supervision) of the quarantined products, the decision is made to prohibit the transit thereof through the Customs Union customs territory.

Stamp 5 "Release permitted without sale right" is put wherever the customs clearance of the quarantined products is finished, in cases when it is necessary to carry out the phytosanitary quarantine activities at the place of consignment.

Stamp 6 "Release permitted" is put wherever the customs clearance of the quarantined products is finished (delivery points), in cases when they comply with the phytosanitary quarantine requirements.

Stamp 7 "Release prohibited" is put wherever the customs clearance of the quarantined products is finished (delivery points), in cases when they fail to comply with the phytosanitary quarantine requirements.

Stamp 8 "Subject to phytosanitary quarantine control (supervision) at the discharge point" is put at anchorage of the marine and river vessels on the phytosanitary certificate and transport (carriage) document before the discharge at the river and marine points of entry through the Customs Union customs border in order to carry out the phytosanitary quarantine activities at the discharge point.
