

ECFWF update

General introduction of the ECFWF

Overall aim:

support all players in addressing the challenge of food waste at consumer level **by establishing a forum of experts to accelerate the sharing of evidence-based best practices to reduce consumer food waste.**

Experts:

A multi-disciplinary forum of **researchers and practitioners** in the area of consumer food waste prevention.

Timeline:

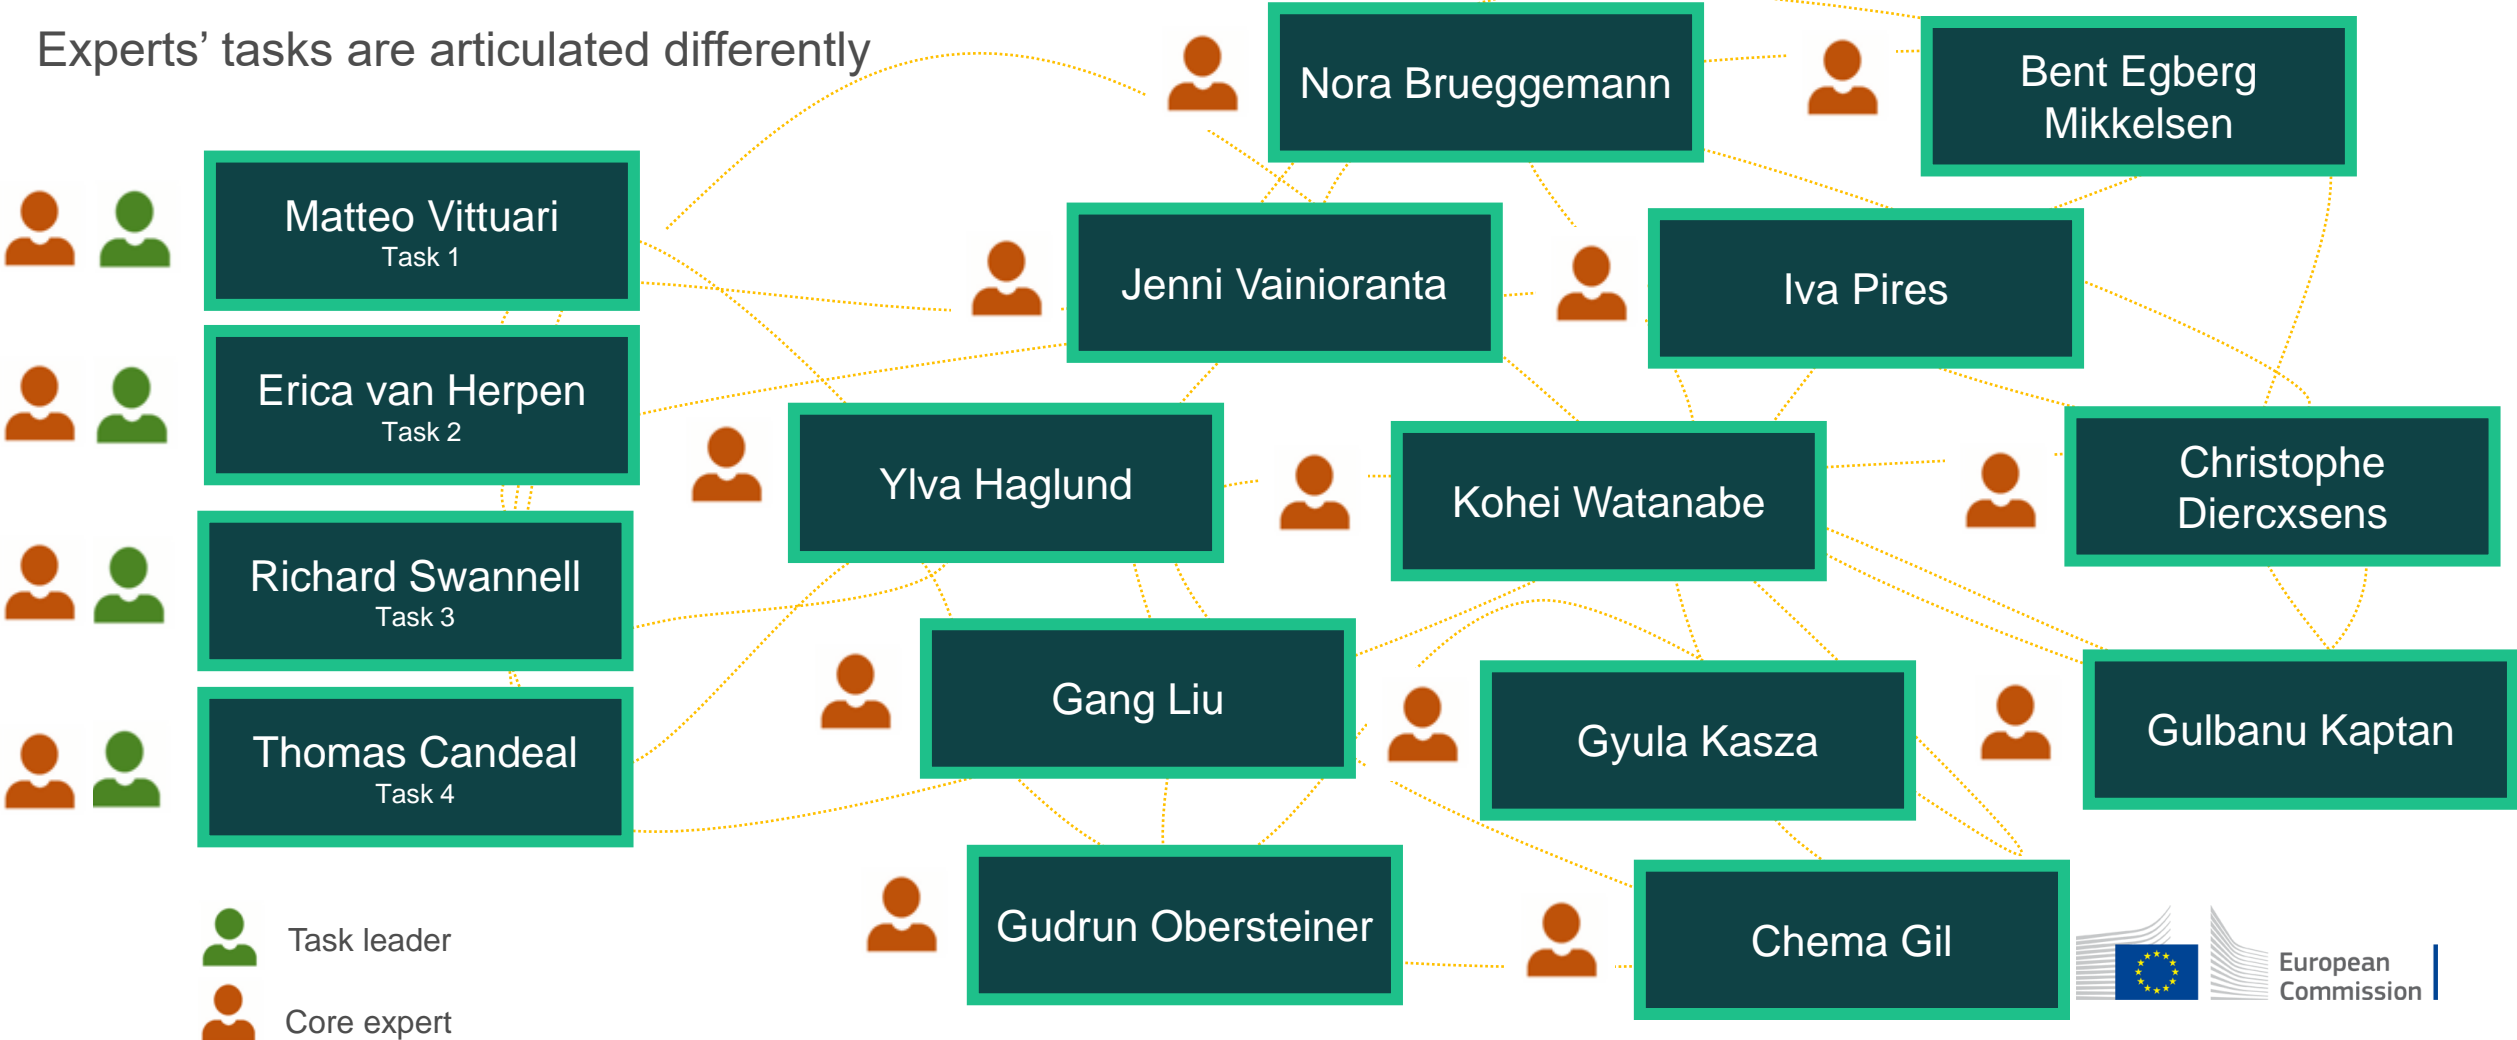

From July 2021 to July 2024 (last year to disseminate main findings).

ECFWF experts

Experts' tasks are articulated differently

Task 1 and Task 2

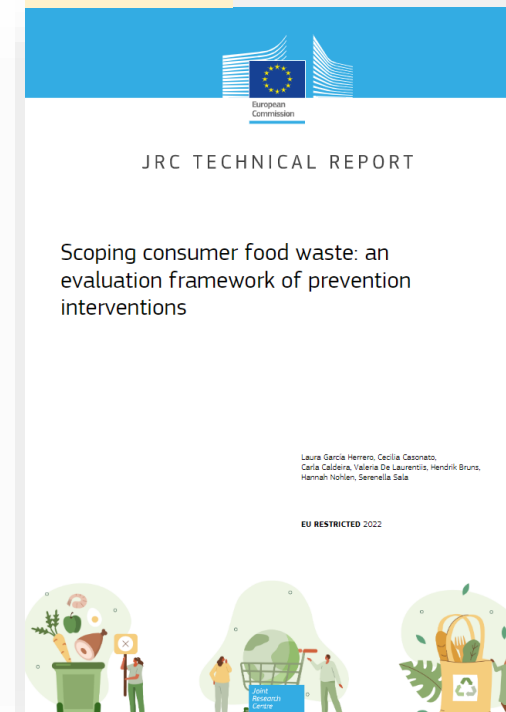

Task 1

- Reviewing scientific and grey literature on the drivers of consumer food waste
- Looking into the factors that might lead to reduced consumer food waste
- Identifying interventions that have shown poor performance in preventing food waste.

+ Scientific paper on this work

Task 2

Description of the **scope of the activities**, develop a tailored **framework for evaluating** consumer food waste prevention interventions; a protocol for the collection of information on interventions.

Provides some recommendations:

- Calculator
- Experimental settings design
- Food waste quantification
- Overview of segmentation to target audience.

Task 3 and Task 4

Task 3

- Data collection on interventions by using experts' networks as well as by launching a survey online.
- All interventions are being evaluated using the framework developed in the previous task.

HERE THE PLATFORM DID A LOT, THANKS!

Task 4

Final deliverable will contain the outcomes of this workshop and the ECFWF work on

- Developing tools to support consumer food waste prevention
- Identifying the best practices from the previous task
- Issue recommendations for different actors
