

EU reply to CL 2024/65-RVDF
Maximum Residue Limits for Veterinary Drugs in Foods

European Union Competence
European Union Vote

Clopidol

The EU cannot support, at this stage, the proposed MRLs for clopidol in chicken (kidney, liver, muscle, and skin/fat) due to the lack of data at the EU level and pending the outcome of the review by the EU of the JECFA monographs, once available.

Fumagillin dicyclohexylamine

The EU cannot support, at this stage, the proposed MRLs for fumagillin dicyclohexylamine in fish fillet and honey due to the lack of data at the EU level and pending the outcome of the review by the EU of the JECFA monographs, once available.

Imidacloprid

The EU supports the proposed MRLs for imidacloprid in Atlantic salmon and rainbow trout.
The MRL recommended by JECFA is coincidental to that already in place in the EU.

Tissue: Fillet (muscle with skin in natural proportions) and/or muscle

Recommended MRLs ($\mu\text{g}/\text{kg}$): 600
