

NEWCASTLE DISEASE

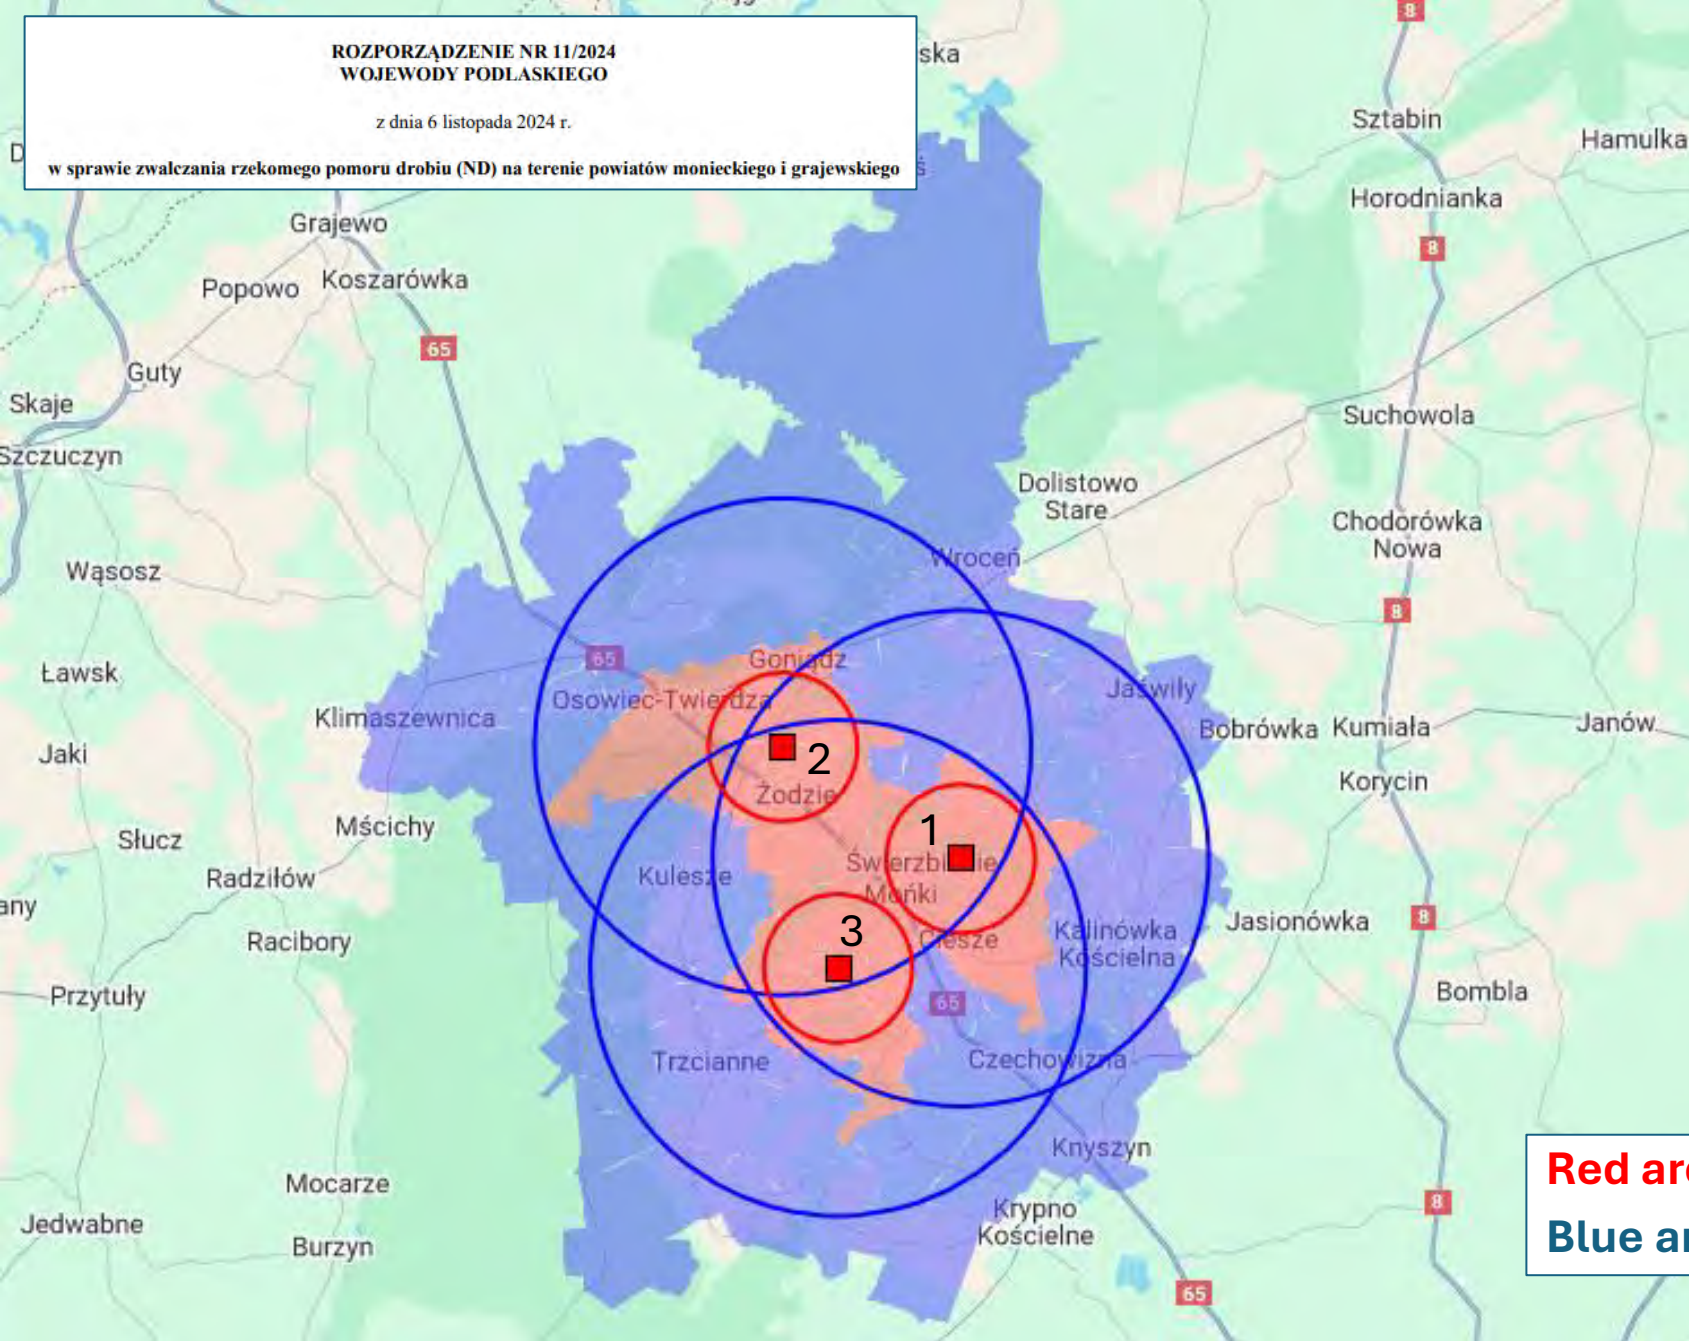

Epidemiological situation in Poland

General Veterinary Inspectorate

ROZPORZĄDZENIE NR 11/2024
WOJEWODY PODLASKIEGO

z dnia 6 listopada 2024 r.

w sprawie zwalczania rzekomego pomoru drobiu (ND) na terenie powiatów monieckiego i grajewskiego

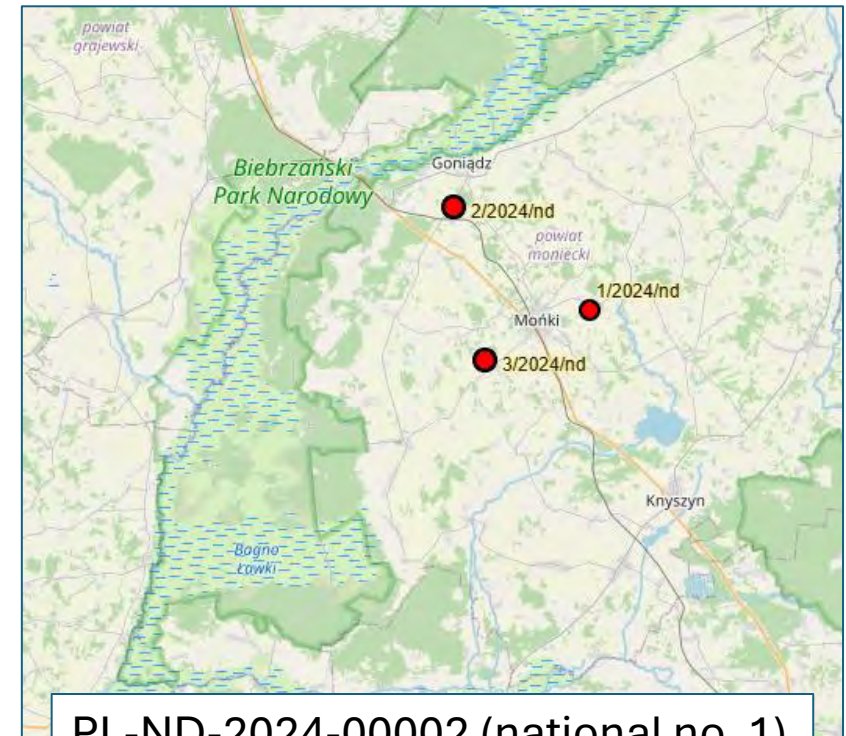

- Outbreak no. 1 was confirmed on 30th September 2024 (51 900 chicken broilers, unvaccinated flock) – primary outbreak
- Outbreak no. 2 was confirmed on 31st October 2024 (24 564 chicken broilers, vaccinated flock, birds showed clinical signs of disease) – secondary outbreak
- Outbreak no. 3 was confirmed on 31st October 2024 (35 000 chicken broilers, no clinical signs – testing before movement, vaccinated flock) – secondary outbreak

Red area – protection zone

Blue area – surveillance zone

Location of the ND outbreaks

PL-ND-2024-00002 (national no. 1)
PL-ND-2024-00003 (national no. 2)
PL-ND-2024-00004 (national no. 3)

ND outbreaks in 2024 - summary

voivodeship/district/locality	number of birds in outbreak	establishment type	outbreak type	suspicion type
podlaskie/moniecki/Potoczyna	52 000	commercial broilers	primary	clinical
podlaskie/moniecki/Owieczki	24 564	commercial broilers	secondary	clinical and surveillance
podlaskie/moniecki/Kołodziej	35 000	commercial broilers	secondary	surveillance

ND outbreaks occurred in one region (**Podlaskie**). In total, **3** outbreaks were confirmed (**111 464** birds in those outbreaks)

Vaccinations against ND

**ROZPORZĄDZENIE NR 7/2024
WOJEWODY PODLASKIEGO**

z dnia 7 października 2024 r.

w sprawie szczepień ptaków przeciwko rzekomeму pomorowi drobiu (ND) na obszarze województwa podlaskiego

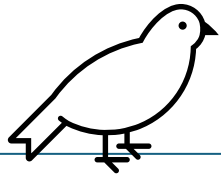

The whole **Podlaskie** region is considered as at risk of ND.

Due to current epidemiological situation, in **Podlaskie** region:

- owners of unvaccinated poultry must implement immediate vaccination actions for chickens and turkeys,
- in all hatcheries, vaccination actions of 1 day-old chicks and turkeys before the movement of consignments.

In general, vaccinations against ND, in the rest of the country, are **voluntary**.

ND surveillance programme in wild birds

**ROZPORZĄDZENIE NR 8/2024
WOJEWODY PODLASKIEGO**

z dnia 31 października 2024 r.

w sprawie badań ptaków dzikich w kierunku rzekomego pomoru drobiu (ND) na obszarze województwa podlaskiego

Columbinae excluded!

Programme includes:

- all areas, where ND outbreaks were confirmed,
- areas of high poultry establishments concentration,
- areas of high wild birds population.

Samples taken:

- from game birds,
- from birds trapped by ornithologists,
- from birds in rehabilitation centers,
- from birds caught in the area of aquaculture establishments,
- from birds in vet clinics,
- environmental samples from high risk areas (faeces).

For now, there is no ND cases in wild birds population.

Thank you!
