Subject: Options for the future Plant Health Regime

Dear Robert

The European Nurserystock Association is currently holding our annual Summer Meeting. Yesterday we discussed our Options Paper dated 13th May 2011.

ENA fully supports Option 3 in the paper - *Improve the substance of the regime with increased EU resources (excluding IAS plants)* - as the way forward for the regime. ENA also believes that the extra resources should not be provided from the Agriculture Budget, but from the general budget, since healthy plants and a healthy natural environment are in the best interests of all European taxpayers.

I hope our input is useful to you.

Kind regards

David Brown
ENA Secretary
