In accordance with articles 13 and 17 of Commission Delegated Regulation (EU) 2020/688, Luxembourg would accept the following animals subject to the following derogations (as provided for in point 8 together with point 6 and point 7 of Section 1 of Chapter 2 of Part II of Annex V to Regulation (EU) 2020/689)

1. Animals under 70 days of age

The animals:

a) come from mothers vaccinated against all BTV serotypes detected during the last two years in the Member State or zone of origin and not in Luxembourg during the same period.

or

b) they have been protected from vector attacks by insecticides or repellents for at least 14 days prior to the date of movement; and

they have been subjected during that period to a PCR test, with negative results for the serotypes of BTV reported for the past 2 years in the Member State or zone of origin and not in Luxembourg during the same period, carried out on samples collected at least 14 days following the date of protection from vector attacks.

2. Animals over 70 days of age

The animals:

a) are vaccinated against all BTV serotypes detected during the last two years in Member State or zone of origin and not in Luxembourg during the same period.

Animals must be moved at least 30 days after the first and single injection (if the vaccine used requires a single injection); or after 10 days after the 2nd injection (if the vaccine used requires 2 injections); or

b) they have been protected from vector attacks by insecticides or repellents for at least 14 days prior to the date of movement; and

they have been subjected during that period to a PCR test, with negative results for the serotypes of BTV reported for the past 2 years in the Member State or zone of origin and not in Luxembourg during the same period, carried out on samples collected at least 14 days following the date of protection from vector attacks.
